Apples, Etc

The truth that parents learn as much from their children as their children learn

from them is poignantly captured in this book by father and son.

Manifold Destiny

Mallard Fillmore lampoons everything from political correctness to Phil, Oprah, and Geraldo to our government's insatiable appetite for spending our money. His marvelous supporting cast includes wickedly wonderful caricatures of everyone who's anyone, from Hollywood to D.C. to Arkansas.

Finding Your Inner Moose

Pakistani Assistance For The Anti-Government Of India Activities Was Not Due To Only Its Revanchist Spirit Following Its Loss Of East Pakistan But For Keeping Its military Preoccupied With Internal Security Duties Thereby Trying To Neutralize The Superiority Of The Indian Armed Forces. Such A Policy Could Ultimately Weaken The Unity Of India Just As The Bleeding Of Soviet Troops In Afghanistan Contributed To The Break-Up Of Ussr. Terrorism Is An Absolute Evil And Has To Be Treated As Such.

A lively, intimate memoir from an icon of the gay rights movement, describing gay life in 1950s and 60s New York City and her longtime activism which opened the door for marriage equality. "Mesmerizing." —Rosie O'Donnell Edie Windsor became internationally famous when she sued the US government, seeking federal recognition for her marriage to Thea Spyer, her partner of more than four decades. The Supreme Court ruled in Edie's favor, a landmark victory that set the stage for full marriage equality in the US. Beloved by the LGBTQ community, Edie embraced her new role as an icon; she had already been living an extraordinary and groundbreaking life for decades. In this memoir, which she began before passing away in 2017 and completed by her co-writer, Edie recounts her childhood in Philadelphia, her realization that she was a lesbian, and her active social life in Greenwich Village's electrifying underground gay scene during the 1950s. Edie was also one of a select group of trailblazing women in computing, working her way up the ladder at IBM and achieving their highest technical ranking while developing software. In the early 1960s Edie met Thea, an expat from a Dutch Jewish family that fled the Nazis, and a widely respected clinical psychologist. Their partnership lasted forty-four years, until Thea died in 2009. Edie found love again, marrying Judith Kasen-Windsor in 2016. *A Wild and Precious Life* is remarkable portrait of an iconic woman, gay life in New York in the second half of the twentieth century, and the rise of LGBT activism.

Genius and Eminence

This book takes a pragmatic approach to deploying state-of-the-art optical networking equipment in metro-core and backbone networks. The book is oriented

towards practical implementation of optical network design. Algorithms and methodologies related to routing, regeneration, wavelength assignment, sub rate-traffic grooming and protection are presented, with an emphasis on optical-bypass-enabled (or all-optical) networks. The author has emphasized the economics of optical networking, with a full chapter of economic studies that offer guidelines as to when and how optical-bypass technology should be deployed. This new edition contains: new chapter on dynamic optical networking and a new chapter on flexible/elastic optical networks. Expanded coverage of new physical-layer technology (e.g., coherent detection) and its impact on network design and enhanced coverage of ROADM architectures and properties, including colorless, directionless, contentionless and gridless. Covers 'hot' topics, such as Software Defined Networking and energy efficiency, algorithmic advancements and techniques, especially in the area of impairment-aware routing and wavelength assignment. Provides more illustrative examples of concepts are provided, using three reference networks (the topology files for the networks are provided on a web site, for further studies by the reader). Also exercises have been added at the end of the chapters to enhance the book's utility as a course textbook.

Possum Bourne: rally driver, sporting icon, family man, team-builder and 'great bloke'. Three-time winner of the Asia- Pacific Rally Championship, winner seven times in a row of the Australian Rally Championship, and eight times the best placed New Zealand driver in the Rally of New Zealand. In 2003, he finally achieves his long cherished dream of competing in the World Rally Championship, but is fatally injured in a freak car crash. This is the story of how his positive attitude, his determination to succeed, and his ability to inspire others to help him brought him motorsport fame. "Very few New Zealanders pass the first name test - instantly recognisable when just their first name is used. Ed Hillary, Zinzan Brooke, Jonah Lomu, Stacey Jones and Onny Parun are or have been examples of this rudimentary litmus test of fame. Possum Bourne was another." Joseph Romanos

Lettering & Type: Creating Letters and Designing Typefaces

In 1974, Dennis Lynn Rader stalked and murdered a family of four in Wichita, Kansas. Since adolescence, he had read about serial killers and imagined

becoming one. Soon after killing the family, he murdered a young woman and then another, until he had ten victims. He named himself "B.T.K." (bind, torture, kill) and wrote notes that terrorized the city. He remained on the loose for thirty years. No one who knew him guessed his dark secret. He nearly got away with his crimes, but in 2004, he began to play risky games with the police. He made a mistake. When he was arrested, Rader's family, friends, and coworkers were shocked to discover that B.T.K. had been among them, going to work, raising his children, and acting normal. This case stands out both for the brutal treatment of victims and for the ordinary public face that Rader, a church council president, had shown to the outside world. Through jailhouse visits, telephone calls, and written correspondence, Katherine Ramsland worked with Rader himself to analyze the layers of his psyche. Using his drawings, letters, interviews, and Rader's unique codes, she presents in meticulous detail the childhood roots and development of one man's motivation to stalk, torture, and kill. She reveals aspects of the dark motivations of this most famous of living serial killers that have never before been revealed. In this book Katherine Ramsland presents an intelligent, original, and rare glimpse into the making of a serial killer and the potential darkness that lives next door.

Jamie Comes Of Age

This volume presents the basic issues and up-to-date research findings in the area

of genius, giftedness and creative behaviour. It gives an appreciation of the potential that exists among talented children and adults and how this can be transformed into highly significant and personally satisfying achievements. It also shows that such achievement involves great personal effort but can be facilitated by human relationships, institutional interventions, and historical conditions which present parents, educators and society with opportunities for maximizing the development of genius, giftedness, and creativity.

These are the cars that drove Aussie on- and off-road adventures for decades.

Neither Dead Nor Red

A powerful story of spiritual awakening, reconnection with Nature, and rekindling of ancestral wisdom • Details the author's encounters with ancestral spirits and animal teachers, such as Coy-Wolf, and profound moments of direct connection with the natural world • Shows how ancestral connections and intimate communications with Nature are not unique or restricted to those with indigenous cultural roots • Reveals how reconnection with ancestors and the natural world

offers insight and solutions for the complex problems we face. We are but a few generations removed from millennia spent living in intimate contact with the natural world and in close communion with ancestral spirits. Who we are and who we think we are is rooted in historical connections with those who came before us and in our relationships with the land and the sentient natural world. When we wander too far from our roots, our ancestors and kin in the natural world call us home, sometimes with gentle whispers and sometimes in loud voices sounding alarms. In this powerful story of spiritual awakening, Randy Kritkauský shares his journey into the realm of ancestral Native American connections and intimate encounters with Mother Earth and shows how anyone can spiritually reconnect with their ancestors and Nature. Like 70 percent of those who identify as Native American, Kritkauský grew up off the reservation. As he explains, for such “off reservation” indigenous people rediscovering ancestral practices amounts to a reawakening and offers significant insights about living in a society that is struggling to mend a heavily damaged planet. The author reveals how the awakening process was triggered by his own self-questioning and the resumption of ties with his Potawatomi ancestors. He details his encounters with ancestral spirits and animal teachers, such as Coy-Wolf. He shares moments of direct connection with the natural world, moments when the consciousness of other living beings, flora and fauna, became accessible and open to communication. Through his profound storytelling, Kritkauský shows how ancestral connections and intimate communications with Nature are not unique or restricted to those with indigenous cultural roots. Offering a bridge

between cultures, a path that can be followed by Native and non-Native alike, the author shows that spiritual awakening can happen anywhere, for anyone, and can open the gateway to deeper understanding.

I am pleased to present a work which marks a milestone in the history of public

works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.

Howling at the Moon

A Terrorist State as a Frontline Ally

Published by the VMI Keydet Club, this captivating book tells the story of VMI football coach John McKenna, as told by sports author Roland Lazenby, VMI Class of 1974, along with veteran sportswriter Mike Ashley. McKenna was head coach at VMI for 13 seasons during an era in which the NCAA mandated one platoon football. A staunch disciplinarian, who was feared, loved, and always respected by his players, McKenna led his teams to four Southern Conference Championships, six consecutive winning seasons, and an undefeated season in 1957. Lazenby and Ashley weave McKenna's life story, prior to his departure from VMI in February 1966, with the many successes of his teams and players both on and off the field from a bygone era of college athletics. The text also includes highlights from the Bob Thalman era and takes a look at the unique culture of VMI football.

The traditional utility Land Rover remains as much an enthusiast's choice as ever now that its production has been ended. Between 1948 and 2016, there was a far greater variety of models produced – an astonishing 300-plus – than even the most ardent enthusiasts recognise, and this comprehensive and highly illustrated book is a guide to all of them – both those built in Britain and those built (often with unique features) overseas. Laid out with an easy-to-follow catalogue format, *The Complete Catalogue of the Land Rover* offers masses of detail on both production variants and also on many that never went beyond the prototype stage, as well as on the multiple special editions that were sold around the world in more recent years.

Hannah's list: Ghosts are cold to the touch. Being tied up isn't much fun. And danger is a sure-fire prescription for amazing sex! When Hannah Campbell attends a memorial service for the neurosurgeon who once saved her life, the last thing she expects is a lightning strike that knocks her out cold and blasts her lungs full of the departed's ashes. Things only get weirder when she wakes up to find the deceased standing over her hospital bed, insisting she help him track down the terrorists who blew up his plane. Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary

psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupressure techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Without some "spiritual" help, they haven't a ghost of a chance. Warning, this title contains the following: explicit sex, graphic language and violence.

GOOD HABITS OF GREAT CHAMPIONS

Behind the passionate debate over gun control and armed crime lurk assumptions about the link between guns and violence. Indeed, the belief that more guns in private hands means higher rates of armed crime underlies most modern gun control legislation. But are these assumptions valid? Investigating the complex and controversial issue of the real relationship between guns and violence, Joyce Lee Malcolm presents an incisive, thoroughly researched historical study of England, whose strict gun laws and low rates of violent crime are often cited as proof that gun control works. To place the private ownership of guns in context, Malcolm offers a wide-ranging examination of English society from the Middle Ages to the late twentieth century, analyzing changing attitudes toward crime and punishment, the impact of war, economic shifts, and contrasting legal codes on violence. She

looks at the level of armed crime in England before its modern restrictive gun legislation, the limitations that gun laws have imposed, and whether those measures have succeeded in reducing the rate of armed crime. Malcolm also offers a revealing comparison of the experience in England experience with that in the modern United States. Today Americans own some 200 million guns and have seen eight consecutive years of declining violence, while the English--prohibited from carrying weapons and limited in their right to self-defense have suffered a dramatic increase in rates of violent crime. This timely and thought-provoking book takes a crucial step in illuminating the actual relationship between guns and violence in modern society.

Norman the Snail

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed

and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing Thriller (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of “Sexual Healing”—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

Jamestown Rediscovery

After seven years of service as the president of Tulane University, Scott Cowen watched the devastation of his beloved New Orleans at the hands of Hurricane Katrina. When federal, state, and city officials couldn't find their way to decisive action, Cowen, known for his gutsy leadership, quickly partnered with a coalition of civic, business, and nonprofit leaders looking to work around the old institutions to revitalize and transform New Orleans. This team led the charge to restore equilibrium and eventually to rebuild. For the past nine years, Cowen has

continued this work, helping to bring the city of New Orleans back from the brink. The Inevitable City presents 10 principles that changed the game for this city, and, if adopted, can alter the curve for any business, endeavor, community—and perhaps even a nation. This is the story of the resurgence and reinvention of one of America's greatest cities. Ordinary citizens, empowered to actively rescue their own city after politicians and government officials failed them, have succeeded in rebuilding their world. Cowen was at the leading edge of those who articulated, shaped, and implemented a vision of transformative change that has yielded surprising social progress and economic growth: a drowned city identified with the shocking images of devastation and breakdown has transformed itself into a mecca of growth, opportunity, and hope.

Shaking Off the Dust

A set of six volumes, telling the story of the attempt to uncover the first Jamestown fortification. As William M. Kelso records, by the fall of 1996, over 150,000 artefacts had been found, all of a military nature and old enough to be from the relevant period.

Mallard Fillmore--

You see, people forever say history is written by the victors. It's not. It's written by those who can shape the simplest narrative. David is a man struggling to hold together his marriage when the small town he lives in is rocked by the sudden, untimely death of a local girl. As details are uncovered, rumours and talk take hold of the town, and start to force David to revisit old memories. Set in 1960s Ireland, *Before Monsters Were Made* tells the story of how a few small words can have a very big impact. When suspicion and old stories start to spread like a virus, how well do we know the people we trust the most? Can we ever know what goes on inside other people's lives? And do we really want to? *Before Monsters Were Made* is an unnerving and moving thriller about loyalty, lies and love.

Confession of a Serial Killer

Emily Carr was primarily a painter, but she first gained recognition as an author for her seven books about her journeys to remote Native communities and stories about life as an artist, as a small child in Victoria at the turn of the last century—and as a reluctant landlady. Before winning recognition for her painting and writing, Carr built a small apartment building with four suites (she lived in one of them) that she hoped would earn her a living. But things turned out worse than expected, and in her forties, the gifted artist found herself shoveling coal and cleaning up after people for 23 years. *The House of All Sorts* is a collection of 41 stories of those hard-working days and the parade of tenants- young couples,

widows, sad bachelors and rent evaders— all the tears and travails of being a landlady confronted with the startling foibles of humanity. Carr is at her most acerbic and rueful, but filled with energy and inextinguishable hope. Carr's writing is vital and direct, aware and poignant, and as well regarded today as when *The House of All Sorts* was first published in 1944 to critical and popular acclaim. The book has been in print ever since.

Green Hills

When Renee Hodges invited her nephew, Bobby, to come stay with her for a few weeks so he could visit a doctor about his back pain, she knew he was recovering from an addiction to prescription painkillers. She believed that if he could address his back problems, he would have a better chance of staying clean—but she had no idea what a roller coaster ride she was getting on. Unlike other books about addiction, *Saving Bobby* begins after rehab is over. Told in part through journal entries, e-mails, and personal recollections, this raw, honest, deeply moving memoir—begun to keep the family accountable—describes the sixteen months that Hodges, her husband, and their community struggled alongside Bobby as he attempted to successfully re-enter the day-to-day world. Using a holistic and open approach, the shame and stigma associated with addiction was lessened—and ultimately, Bobby learned he had to save himself. A gripping and heartrending story of survival, *Saving Bobby* is an essential, timely read for those concerned

about America's most pressing epidemic.
