The South Will Rise Again

Deep in the mean badlands of Western Texas lies Hell, a renegade town protected by a gun-toting band of Comanches. When the Floating Outfit moves in, disguised as a ruthless arms-running gang, the days are numbered for this deadly community of outlaws. First U.S. publication.

Arizona Gun Law

The oceans and atmosphere interact through various processes, including the transfer of momentum, heat, gases and particles. In this book leading international experts come together to provide a state-of-the-art account of these exchanges and their role in the Earth-system, with particular focus on gases and particles. Chapters in the book cover: i) the ocean-atmosphere exchange of short-lived trace gases; ii) mechanisms and models of interfacial exchange (including transfer velocity parameterisations); iii) ocean-atmosphere exchange of the greenhouse gases carbon dioxide, methane and nitrous oxide; iv) ocean atmosphere exchange of particles and v) current and future data collection and synthesis efforts. The scope of the book extends to the biogeochemical responses to emitted / deposited material and interactions and feedbacks in the wider Earth-system context. This work constitutes a highly detailed synthesis and reference; of interest to higher-level university students (Masters, PhD) and researchers in ocean-atmosphere interactions and related fields (Earth-system science, marine / atmospheric biogeochemistry / climate). Production of this book was supported and funded by the EU COST Action 735 and coordinated by the International SOLAS (Surface Ocean- Lower Atmosphere Study) project office.

Cherry Popper

The Rushers

Law beyond the limits In wide-open Arizona, outlaws run rampant, since the

authority of the local marshal ends at his town's borders. A different breed of peace officer is needed, and rancher Bentram Mosehan has accepted the responsibility of organizing a new Arizona State Police force. He's looking for men who are brave, honest, and lightning fast with a six-gun -- talents that a drifter named Waco and his amigo, Doc Leroy, possess in abundance. But the two young Texans remember all too well their run-ins with the Lone Star law, and the last thing Waco and Doc want is to wear a badge. But Mosehan knows these are men you need at your side when all Hell breaks loose. And Waco'll be facing one tough choice once the bullets start flying in earnest: serve or die.

Field Programmable Logic and Application

Vascular Surgery

What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by Rare Earth, and its implications for those who look to the heavens for companionship.

The Rio Hondo War

Rancher Sam Catlin and his two sons are murdered and Waco, a young man who had been raised by the kindly rancher, swears to hunt down the killer and avenge the deaths

Waco's Badge

The over-eager settlers and gold-hunters are dead set on sneaking into the Black Hills, even if it provokes the Sioux into a bloody war. The only thing standing in their way is the U.S. Cavalry. And the only man who can lead the cavalry is the one and only, Yankee-hating ex-Reb named Dusty Fog.

Mississippi Raider

The corrupt Yankee state police were terrorizing Texas, and only the lightening guns of the Floating Outfit could stop them.

The Lone Star Killers

The Floating Outfit was too busy smuggling guns to notice the Civil War was over. But when they run into trouble passing the Henry repeaters over the border to Juarez, they call Comanche fast and Texas tough Ysabel for help.

Mark Counter's Kin

When the beautiful daughter of an English Lord is chosen Mayor of a wide-open Kansas cowtown, she needs a Marshall who can think as well as shoot-and who can shoot better than any man alive. That's where Dusty Fog and the Floating

Outfit come in.

Kill Dusty Fog!

They didn't have any law in Quiet Town--except that of the gun. Three good men had the badge of Sheriff and died wearing it. The good citizens felt that their town needed a real lawman, someone who would play the killers and hard cases at their own game. They knew of one man who could do the job. His name was Dusty Fog.

Gunsmoke Thunder

This book contains the papers presented at the 14th International Conference on Field Programmable Logic and Applications (FPL) held during August 30th - September 1st 2004. The conference was hosted by the Interuniversity Micro-Electronics Center (IMEC) in Leuven, Belgium. The FPL series of conferences was founded in 1991 at Oxford University (UK), and has been held annually since: in Oxford (3 times), Vienna, Prague, Darmstadt, London, Tallinn, Glasgow, Villach, Belfast, Montpellier and Lisbon. It is the largest and oldest conference in reconfigurable computing and brings together academic researchers, industry experts, users and newcomers in an informal, welcoming atmosphere that encourages productive exchange of ideas and

knowledge between the delegates. The fast and exciting advances in field programmable logic are increasing steadily with more and more application potential and need. New ground has been broken in architectures, design techniques, (partial) run-time reconfiguration and applications of field programmable devices in several different areas. Many of these recent innovations are reported in this volume. The size of the FPL conferences has grown significantly over the years. FPL in 2003 saw 216 papers submitted. The interest and support for FPL in the programmable logic community continued this year with 285 scientific papers submitted, demonstrating a 32% increase when compared to the year before. The technical program was assembled from 78 selected regular papers, 45 additional short papers and 29 posters, resulting in this volume of proceedings. The program also included three invited plenary keynote presentations from Xilinx, Gilder Technology Report and Altera, and three embedded tutorials from Xilinx, the University at Karlsruhe (TH) and the University of Oslo.
