There has never been a book about Stephen Harper, yet on June 28 he came close to being our prime minister. If Paul Martin miscalculates, Stephen Harper could be our next prime minister in months, not years. Who is this man? Everyone knows that he became leader of the Alliance Party and, against all odds, gathered in the old Conservative Party to create a force designed to win power, coming very close in 2004. Yet what are his core beliefs? To what extent does he agree with his party's social conservatives, who scared away voters in the last election? Where will he take us if he gets power? William Johnson has researched the Harper family background and the historical context that shaped his political career. He paints a fascinating picture of a man who, like Pierre Trudeau, trained mentally for political power like an athlete training for the Olympics, yet is not a natural politician and never really wanted the political leader's life. By studying Harper's approach to the main issues in Canadian politics, he shows that Harper is a sophisticated political operative, far more complex and intellectual than the right-wing Republican image that has been created for him. This is a serious, objective political biography, short on gossip but long on clear discussion of Harper's political views - and how he got them. Johnson's message? Don't underestimate this man. From the Hardcover edition.

The Canadian World Almanac & Book of Facts 1990

The overnight success of the 'Hoodride' phenomenon inspired a generation of car fanatics, who couldn't afford to restore a car to show condition but still wanted a good looking cool car. At last, you could be cool and stand out from the crowd on the tiniest of budgets. The look of the cars that resulted was often so honest, unspoiled and characterful, that it began to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, embracing the rising prices, finding ways to still be cool on a tight budget and producing a micro-industry that still manages to embrace the 'Built not bought' ethos. Patina Volkswagens, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, clubs and hobbyists, as well as the different styles of build, meaning every single car has a style all of its own.
