Writing Without Rules

In the 2010 article 'Building a Better Teacher' the article that 'launched' Teach Like a Champion, journalist Elizabeth Green compared two schools of thought: one that teaching skills were the most important driver of classroom learning, the other that content knowledge was the true driver. Some readers saw a conflict between these two perspectives. The authors of Reading Reconsidered have always thought that the answer was more complex: that technique was irreplaceable and helped teachers maximize the application of their subject knowledge but there was also no substitute for content knowledge. Moreover, they believed, there were in fact techniques specific to each of the content areas that drive results and could be delineated and learned like the general techniques in Teach Like a Champion. Reading Reconsidered is the authors' first effort to take on the challenge of defining subject specific methods. It is an anxious time for many teachers but also a time of great opportunity. This book will provide a road map from confusion to success.

Lord of the Flies

It is Edinburgh, 1822, and young Robbie is eight years old when he witnesses his mother's pain and subsequent death from an operation - without anaesthetic - to remove a tumour from her breast at the hands of Dr Knox. Haunted by this terrible event, Robbie, his hapless father and baby sister Essie attempt to move on with their lives. But when Robbie's father loses all their money and disappears, Robbie is left to look after himself and his sister in the Edinburgh slums. Somehow he falls in with Burke and Hare, the two men whom Knox employs to 'collect' bodies for medical research. Robbie sees a way to avenge his mother's death. Convincing himself that Knox is having people killed for him to experiment on, Robbie eventually confronts him. But Robbie comes to realise that for all his hard-heartedness and corrupt methods, Knox's motives are ultimately for the good: to improve surgical conditions, and operate on patients with the greatest speed and therefore minimum risk. Robbie eventually trains to be a surgeon, finally giving meaning to his mother's tragic death.

Escape from Pompeii

“An intense snapshot of the chain reaction caused by pulling a trigger.” —Booklist (starred review) “Astonishing.” —Kirkus Reviews (starred review) “A tour de force.” —Publishers Weekly (starred review) A Newbery Honor Book A Coretta Scott King Honor Book A Printz Honor Book A Los Angeles Times Book Prize Winner for Young Adult Literature Longlisted for the National Book Award for Young People’s Literature Winner of the Walter Dean Myers Award An Edgar Award Winner for Best Young Adult Fiction Parents’ Choice Gold Award Winner An Entertainment Weekly Best YA Book of 2017 A Vulture Best YA Book of 2017 A BuzzFeed Best YA Book of 2017 An ode to Put the Damn Guns Down, this is New York Times bestselling author Jason Reynolds’s electrifying novel that takes place in sixty potent seconds—the time it takes a kid to decide whether or not he’s going to murder the guy who killed his brother. A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That’s what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching.

Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

Understanding Lord of the Flies: A Student Casebook to Issues, Sources, and Historical Documents

A seemingly simple tale of schoolboys marooned on an island, Lord of the Flies has proven to be one of the most enigmatic and provocative pieces of literature ever published. This casebook probes the many layers of meaning in the novel, examining its literary, philosophical, historical, scientific, and religious significance. Beginning with a literary analysis that explores the universality of the novel's characters, the story is considered as subversion of the adventure tale, comparing it to such classics as Treasure Island and Robinson Crusoe. From these literary depictions of savagery, this study delves deeper, confronting the long-running philosophical and biological debates about human nature that have absorbed such influential thinkers as Rousseau and Darwin. The full meaning of Lord of the Flies is further contextualized by tracing historical views on civilization, from the Victorian perspective, to the very real horrors of World War II. This casebook integrates analysis and primary documents, with excerpts from materials as diverse as the Bible, the writings of Darwin, and war crimes interviews, to explore the very nature of human aggression and evil. This book will spark students to consider intriguing connections between Golding's masterpiece and broader concepts of civilization, altruism, political leadership responsibilities, and the history of western imperialism. The interdisciplinary approach of this casebook helps students situate the lessons of Lord of the Flies in the context of Education, War and Postwar, the Adventure Story, Religion, and Biology and Evolution. The six topic sections integrate original illustrations and photos, literary excerpts, and primary documents and historic writings that help contextualize the work. Thought-provoking ideas for class discussions and research topics, with carefully chosen further reading suggestions enhance this volume as a teaching tool.

Scar Island

Human beings are born to learn. During the last few decades, developmental science has exploded with discoveries of how, specifically, learning happens. This provides us with an unprecedented window into children's minds: how and when they begin to think, perceive, understand, and apply knowledge. Wendy Ostroff builds on this research and shows you how to harness the power of the brain, the most powerful learning machine in the universe. She highlights the processes that inspire or propel learning--play, confidence, self-regulation, movement, mnemonic strategies, metacognition, articulation, and collaboration--and distills the research into a synthesis of the most important takeaway ideas that teachers will need as they design their curriculum and pedagogy. Each chapter has suggested activities for exactly how teachers can put theory into practice in the classroom. When you understand how your students learn, you will know how to teach them in ways that harness the brain's natural learning systems. Dr. Wendy L. Ostroff is Associate Professor in the Program for the Advancement of Learning at Curry College.
