## **Nursing Documentation**

Provide quality resident care with 395 expert-reviewed, regulatory-compliant procedures. Ensure consistent documentation and care across all disciplines-a critical component to survey success. Every nursing home needs procedures to ensure

quality care is provided and for legal protection. Don't put your facility in jeopardy with in-house procedures that may not be up to current clinical and regulatory standards. This book offers: - A quick reference when treating residents-The procedures will guide frontline staff through clinical issues they encounter every day. - Preparation for your next survey-Surveyors will check your facility's procedures to verify you're providing quality care that meets the regulations. - Training for new long-term care nurses-Many nurses have little formal long-term care training before they start working in nursing homes. These procedures will provide guidance and ensure that nursing staff provide consistent, compliant care. - A consistent format-Every procedure includes a list of supplies and the exact steps to take to perform it.

### **Nursing Procedure Guide for Long-Term Care**

For all Administrators, Directors of Nursing, and Quality Assurance (QA)/Quality Improvement (QI) Directors or Coordinators, this is not only required reading for your facilities, but more important, it is a practical tool to guide you as you prepare for your survey. As the saying goes, Your facility must be survey-ready 365 days a year. So use this book to help you get ready and stay ready. The Fundamentals of Quality for LTC, Part I gives you the F-Tags, as well as the Centers for Medicare and Medicaid (CMS) Interpretive Guidelines and Guidance to Surveyors. This is a comprehensive monitoring tool for all disciplines to use in an interdisciplinary format. It covers the Federal Long Term Care Regulations 42 CFR 483.10 Resident Rights through 483.20 Resident Assessment. Because this is such a practical tool, it is a book that staff will keep handy at their desks to use for monitoring purposes and for quick reference. It will help the Interdisciplinary Team (IDT) including one of the most important and busiest groups, the Certified Nursing Assistants (CNAs) maintain awareness of the expectations of the Federal and State Surveyors. It will also keep the staffs focus on Quality of Care and Quality of Life.

### **Home Health Assessment Criteria**

As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

### **The Long-term Care Director of Nursing Field Guide**

Building on the revolutionary Institute of Medicine reports *To Err is Human* and *Crossing the Quality Chasm, Keeping Patients Safe* lays out guidelines for improving patient safety by changing nurses'™ working conditions and demands. Licensed nurses and unlicensed nursing assistants are critical participants in our national effort to protect patients from health care errors. The nature of the activities nurses typically perform " monitoring patients, educating home caretakers, performing treatments, and rescuing patients who are in crisis " provides an indispensable resource in detecting and remedying error-producing defects in the U.S. health care system. During the past two decades, substantial changes have been made in the organization and delivery of health care " and consequently in the job description and work environment of nurses. As patients are increasingly cared for as outpatients, nurses in hospitals and nursing homes deal with greater severity of illness. Problems in management practices, employee deployment, work and workspace design, and the basic safety culture of health care organizations place patients at further risk. This newest edition in the groundbreaking Institute of Medicine Quality Chasm series discusses the key aspects of the work environment for nurses and reviews the potential improvements in working conditions that are likely to have an impact on patient safety.

## **Restorative Care Nursing for Older Adults**

Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.
