Barron's Profiles of American Colleges

A Dictionary for the Modern Trumpet Player

In the spirit of *Friday Night Lights* comes the stirring story of a marching band from small-town middle America. Every fall, marching bands take to the field in a uniquely American ritual. For millions of kids, band is a rite of passage—a first foray into leadership and adult responsibility, and a chance to learn what it means to be a part of a community. Nowhere is band more serious than at Concord High School in Elkhart, Indiana, where the entire town is involved with the success of its defending state champion band, the Marching Minutemen. In the place where this tradition may have originated, in the city that became the band instrument capital of the world, band is a religion. But it's not the only religion—as legendary director Max Jones discovers when conflicting notions of faith and purpose collide during his final year as director. In this intimate chronicle, the band marches through a season that starts in hope and promise, progresses through uncertainty and disappointment, and ends, ultimately, in redemption.

Oak Ridge is nestled in the foothills of East Tennessee, 25 miles west of Knoxville. Bordered on three sides by the Clinch River, the land first existed under other names--Elza, Robertsville, Scarboro, and Wheat--and became part of the Clinton Engineering Works later known as Oak Ridge. In 1942, 59,000 acres of land were transformed in a matter of weeks into a "secret city" that became known as the mysterious Manhattan District. As a direct result of the letter written by Albert Einstein to Pres. Franklin D. Roosevelt in 1939, the Manhattan District was created to develop new atomic weapons. Finally named Oak Ridge in 1943 and now thriving with a population of over 27,000, the town continues to be a significant center for the advancement of science and technology used throughout the world. In this pictorial history, photographs and personal descriptions guide readers on a visual journey of the construction of a city and the creation of the atomic bomb, to the post-war transformation of Oak Ridge into a major scientific community in the South.

Military history has established that musical units are an integral part of the Marine Corps (Appendix A). Marine Corps Bands are an important stimulus to morale and esprit de corps and provide the Commanding General, and the unit, a vital link to ceremonial traditions. In combat, musical units continue musical functions and augment security on a temporary basis during periods of heightened combat

intensity when use of the band in its primary role is impractical.

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Marching for Marching Bands

When the Soviet communist empire was overthrown by the Russians themselves in August 1991, the change was more clearly anticipated by humanistic students of creativity than by economic and political scientists surrounded by statistics and information. Does the Russian pattern of creativity provide any hints as to how the Russians might solve problems today? Having borrowed the democratic political model of their erstwhile American enemy, will they be able to create a distinctive Russian variant that can endure? Or will they end up destroying their own experiment at accountable, constitutional government and returning to their long tradition of authoritarianism? *The Face of Russia*--a companion book to the corresponding PBS series--addresses these questions. This is a dazzling and forward-looking history of the Russian people as told through their art--from one of the world's great experts on Russian culture. The story covers eight hundred years of Russian creativity, and introduces us to the new art forms that burst onto the Russian scene and became the vehicles for expressing the creative aspirations of an age as well as the enduring Russian quest to find salvation and entertainment in art.

Educating the Student Body

What is the function of art in the era of digital globalization? How can one think of art institutions in an age defined by planetary civil war, growing inequality, and proprietary digital technology? The boundaries of such institutions have grown fuzzy. They extend from a region where the audience is pumped for tweets to a future of “neurocurating,” in which paintings surveil their audience via facial recognition and eye tracking to assess their popularity and to scan for suspicious activity. In *Duty Free Art*, filmmaker and writer Hito Steyerl wonders how we can appreciate, or even make art, in the present age. What can we do when arms manufacturers sponsor museums, and some of the world’s most valuable artworks

are used as currency in a global futures market detached from productive work? Can we distinguish between information, fake news, and the digital white noise that bombards our everyday lives? Exploring subjects as diverse as video games, WikiLeaks files, the proliferation of freeports, and political actions, she exposes the paradoxes within globalization, political economies, visual culture, and the status of art production.
