Behind the Masque

The fourth edition of Foundations of Legal Research and Writing gives equal weight to research and writing making it a perfect resource to be used for both legal research and legal writing classes. An entire chapter providing a detailed explanation of legal reasoning and analysis has been added. Each of the research chapters ends with legal research assignments, allowing the professor to cut down on preparation time. Cyberlaw exercises are included at the end of most of the chapters, requiring students to perform computer-assisted legal research. Another chapter is devoted to computer-assisted legal research and explains the use of citators in detail. This chapter is written by an expert in the field, a law librarian

who spent a number of years offering computer-assisted legal research seminars to practicing attorneys. The writing portion of the book devotes entire chapters to writing client opinion letters, pleadings, contracts, office memos, memoranda of law, and appellate briefs. Because the documents are covered in separate chapters, the professor can select the documents to be covered in class. The legal writing chapters contain sample documents, heavily footnoted with writing tips. The writing tips are designed to give the students as much help in their writing as possible. They also help to aid the less-experienced professor. The book contains case excerpts illustrating material introduced in the text and emphasizing the perils of performing inadequate legal research and writing poorly. The excerpts were selected to emphasize to students the importance of good legal research and writing. The book is designed to be professor-friendly by providing information gathered by the authors over the years, and appeals to the inexperienced and experienced professor alike.

The aim of this book is to show how wine tourism can be used as a model for sustainable economic development, driving economic growth and social development in some locations. It will explore the interaction between tourism and viticulture in wine tourism destinations, while also explaining some of the

repercussions of these activities. This book covers various topics including regional development, environmental management, sustainable viticulture, quality management in wineries and wine tourism routes among others. Wine tourism, which combines two important yet distinct economic activities (i.e., tourism and viticulture), has recently emerged as a new tourism product driven by tourists' search for new experiences and wineries' need to diversify their businesses and seek new revenue streams to boost sales. This new form of tourism, which typically takes place in rural areas and which combines wine production with tourist activities, is becoming important for such regions by providing a complementary income source. It provides a model for sustainable economic development for these regions, which for various reasons may otherwise struggle to develop. Featuring cases and business implications from various locations, this book provides an important source of knowledge—both theoretical and practical—suitable to academics, scholars, researchers, and practitioners in the tourism sector and the wine industry.

Women with Attention Deficit Disorder, psychotherapist Sari Solden's, groundbreaking book, explains how every year, millions of withdrawn little girls and chronically overwhelmed women go undiagnosed with Attention Deficit Disorder because they don't fit the stereotypical profile: they're not fast-talking, hyperactive, or inattentive, and they are not male. This pioneering book explores treatment and counseling options, and uses real-life case histories to examine the special challenges women with AD/HD face, such as the shame of not fulfilling societal expectations. Solden explains that AD/HD affects just as many women as men, and often results in depression, disorganization, anxiety, and underachievement. Included in this revised edition is a brand new chapter on friendship challenges for women with AD/HD. Three empowering steps -- restructuring one's life, renegotiating relationships, and redefining self-image -- help women take control of their lives and enjoy success on their own terms. "Sari Solden has used her personal and professional experience to shine some light into the dark closet inhabited by far too many ADD women She empowers ADD women by validating their experience as worthwhile human beings who struggle with serious organizational problems in many areas of their lives." (Kate Kelly and Peggy Ramundo, authors of You Mean I'm Not Lazy, Stupid, or Crazy")

This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled "The Modified Lecture" offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion

explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based instruction, cooperative learning, debates, drama, role playing, simulations, games, and peer teaching. In this charming story about celebrating differences a Chinese-American girl wishes for a garden of bright flowers instead of one full of bumpy, ugly, vegetables. Come harvest time, everyone agrees as those ugly Chinese vegetables become the tastiest, most aromatic soup they have ever known. THE WORDS WE LIVE BY takes an entertaining and informative look at America's most important historical document, now with discussions on new rulings on hot button issues such as immigration, gay marriage, gun control, and affirmative action. In THE WORDS WE LIVE BY, Linda Monk probes the idea that the Constitution may seem to offer cut-and-dried answers to questions regarding personal rights, but the interpretations of this hallowed document are nearly infinite. For example, in the debate over gun control, does "the right of the people to bear arms" as stated in the Second Amendment pertain to individual citizens or regulated militias? What do scholars say? Should the Internet be regulated and censored, or does this impinge on the freedom of speech as defined in the First Amendment? These and other issues vary depending on the interpretation of the Constitution. Through entertaining and informative annotations, THE WORDS WE LIVE BY offers a new way of looking at the Constitution. Its pages reflect a critical, respectful and appreciative look at one of history's greatest documents. Why do people who are more socially connected live longer and have better health than those who are socially isolated? Why are social ties at least as good for your health as not smoking, having a good diet, and taking regular exercise? Why is treatment more effective when there is an alliance between therapist and client? Until now, researchers and practitioners have lacked a strong theoretical foundation for answering such questions. This ground-breaking book fills this gap by showing how social identity processes are key to understanding and effectively managing a broad range of health-related problems. Integrating a wealth of evidence that the authors and colleagues around the world have built up over the last decade, *The New Psychology of Health* provides a powerful framework for reconceptualising the psychological dimensions of a range of conditions – including stress, trauma, ageing, depression, addiction, eating behaviour, brain injury, and pain. Alongside reviews of current approaches to these various issues, each chapter provides an in-depth analysis of the ways in which theory and practice can be enriched by attention to social identity processes. Here the authors show not only how an array of social and structural factors shape health outcomes through their impact on group life, but also how this analysis can be harnessed to promote the delivery of ‘social cures’ in a range of fields. This is a must-have volume for service providers, practitioners, students, and researchers working in a wide range of disciplines and fields, and will also be essential reading for anyone whose goal it

is to improve the health and well-being of people and communities in their care.
