## Public Policy and the Mass Media

Mass communication has long been recognized as an important contributor to national identity and nation building. This book examines the relationship between media and nationalism in Israel, arguing that, in comparison to other countries, the Israeli case is unique. It explores the roots and evolution of newspapers, journalism, radio, television, and the debut of the Internet on both the cultural and the institutional levels, and examines milestones in the socio-political development of Hebrew and Israeli mass communication. In evaluating the technological changes in the media, the book shows how such shifts contribute to segmentation and fragmentation in the age of globalization.

## Mass Communications

How has mass communication evolved in Latin America? How has the political climate in that region shaped the role of the mass media? What are the special challenges facing this turbulent area? In *Communication in Latin America*, Richard Cole has assembled a selection of articles that explores these issues, with a special emphasis on journalism, given the traditional strength of the press in Latin America. The twelve essays written exclusively for this publication - examine either an aspect of the mass media in the region or the media in a particular country during a number of stages of its political development. *Communication in Latin America* opens with an overview of the state of mass communication in the entire region. Articles in

the first part of the volume focus on topics such as the changing role of women in the media and the usefulness of propaganda in effecting political change. Essays in the second section discuss situations in individual countries, including freedom of the press in Mexico and Chile and the Argentine media's struggle to define their role under the new democratic government. Professor Cole concludes with a forecast of the future of mass communication in Latin America.

## **Mass Communication In Israel**

Critiquing the mass media, and the role those media play in our lives, requires a critical eye. *Media in Society* gives students in upper level media courses a unique narrative-based approach to media criticism, exploring the stories media tell—as well as the stories we tell about the media when we describe how it affects us. Organized thematically, *Media in Society* examines topics like narrative genre, entertainment culture, news, politics, and economics, emphasizing both the pleasures and pitfalls of the media narratives that surround us. Written by an esteemed team of media scholars, specifically for media students, this compact and affordable text makes a great backbone or addition to a media and society course.

## **Media Logic**

The Third Edition of *Women in Mass Communication* provides a new generation of students with an insightful examination of women in the journalism and mass communication professions. In this seminal volume, editors Pamela Creedon and Judith Cramer offer ideas and directions for improving the status of women—and men— working in the field.

Divided into twelve chapters, it can be used in either 16-week semesters or 12-week terms. Retaining the successful organization of the 1st edition, Peyton Paxson writes in an accessible and well-organized manner, catering to both the needs of students and instructors. He begins each chapter with a list of the current issues and trends concerning the

chapter's topic, followed by a brief history of that topic, its current state, predictions for the future, an assessment of career opportunities, and discussion questions for critical thinking. More than just updating statistical data, the 2nd edition weaves in discussions of relevant contemporary issues, including crowdsourcing, going 'viral', interactive advertising, tv industry consolidation, 'the internet of things', conflicting ideas of net neutrality and their continuing implications in a more-connected world.

### **Anthropology & Mass Communication**

Analyzes such social institutions as politics, religion, and sport as they are presented and transformed by the media to affect our shared stock of knowledge. Altheide and Snow move beyond a consideration of the reasons for the picture given by media of these institutions and the ways in which media has impact, to a more pervasive view of our culture as shaped by the media that are a part of it. 'Altheide and Snow do successfully show how a common media logic has gripped such apparently different areas as spectator politics, sport and religion. They do show how all other media tend to conform to a dominant television format.' -- The Media Reporter, Spring 1980

Digital media is changing the ways in which we communicate: we watch TV and movies online, call friends on computers, and read newspapers on cell phones. Placing convergence at the center of the discussion, *Converging Media: A New Introduction to Mass Communication*, Third Edition, by John V. Pavlik and Shawn McIntosh, uses the technologies we employ everyday to explain our current media environment - and to project where we might be headed. Rather than discussing each media industry in isolation, *Converging Media* shows how each branch of media (print, visual, and audio) relates to and influences the others. This enables students to see the inextricable and dynamic relationship between converging media and traditional media formats.

Placing the anthropological study of mass media into historical and interdisciplinary perspectives, this book examines how work in cultural studies, sociology, mass communication and other disciplines has helped shape the re-emerging interest in media by anthropologists.
