There's nae power on earth can crush the men who can sing on a day like this. A powerful re-imagining of Joe Corrie's neglected classic about a Fife mining community during the General Strike. To raise funds for the soup kitchens feeding the miners and their starving families, Corrie wrote In Time O' Strife in 1926 whilst on strike himself, exposing the brutal lives of a family staring hunger and defeat in the face. Some 87 years later, Graham McLaren has adapted, designed and directed this rarely performed classic play. Created by Graham McLaren (Men Should Weep, A Christmas Carol), the production uses fragments of Corrie's other plays, poems and songs, celebrating his ability as a writer and his contribution to Scottish culture. This edition pairs Corrie's original text with the script created by McLaren's adaptation process.

Unsound magazine was published from 1983-1987. Before the inception of the internet and on the brink of the desktop publishing revolution, Unsound created a forum for cutting-edge musicians and artists to connect. Each featured some of the first coverage of some of the best bands of the period including: Sonic Youth, Swans, Test Department, Hunting Lodge, Negativland, Chris & Cosey, Borbetomagus, The Haters, Problemist, and many more. The pages of Unsound are filled with unique creativity and an obvious relish for the weird. This re-issue is reproduced in its original form.

The Annual Update compiles reviews of the most recent developments in experimental and clinical intensive care and emergency medicine research and practice in one comprehensive reference book. The chapters are written by well recognized experts in these fields. The book is addressed to everyone involved in internal medicine, anesthesia, surgery, pediatrics, intensive care and emergency medicine.

This cookbook was written for all the dogs who rely on their master for all their needs and ask nothing in return. Good nutrition is as important to your dog as it is to you. Cancer is the leading cause of death in dogs and cats today, so the food they ingest is paramount to their health, as well as exercise and annual visits to the veterinarian. This cookbook was written to have fun in the kitchen cooking delicious recipes that your dog will love. He will probably join you in the kitchen when he starts to know that the aroma of good food is for him. P.J.'s Bichon Frise lived to be 22 years old and spunky to the end of her life. P.J. attributes her Bichon Frise's excellent health to the meals she cooked for her, long before the pet food recall scare. You have control of all the ingredients your dog eats. If your dog had to cook for you, don't you think it would give you the best possible food to keep you healthy and living longer? You bet they would. Do you feed your dog the same thing, day after day, week after week? Yuk. This cookbook will get you out of this rut and you will see a happier and healthier dog if you start cooking these easy and fun recipes. The book is also filled with fun facts, dog jokes, dog sayings, astrology, dog breeds, and trivia to make this cookbook a must for you to have. A portion of the proceeds of this book will be donated to the Cancer Society for Animals.

The success of every great company or popular brand is often the vision of a great leader. Here in this book, we profile 100 Great Business Leaders, giving an account of their business career, demonstrating the innovations, opportunities and business principles that have been introduced in their companies. Also included is a practical section to demonstrate how a reader might apply these ideas in their own lives. The 100 chosen business leaders are from companies located all over the world and include a mixture of business founders (for example Henry Ford, Bill Gates, Kiichira Toyoda, Liu Chuanzhi of Lenovo) and famous business executives (Jack Welch of GE, Lee Iacocca of Chrysler, Indra Nooyi of PepsiCo, Chua Sock Koong of Singapore Telecommunications).

### **Stereo Review**

Ciro Donati was many things: My father's most valued and trusted soldier. My brother's best friend and second in command. And the only man I would give up everything for. I fell hard for the Mafioso at the tender age of eleven. This beast of a man who I knew made people disappear-and probably enjoyed every second of it-was also the sixteen-year-old boy who had picked me up after I'd fallen flat on my face during my dance recital and told me I was the best ballerina he'd ever seen. He's watched over me, protected me like I was the most precious thing in the world to him. And then he sent me away. Scarlett Vitucci was many things: The daughter of the biggest Cosa Nostra boss from New York to Chicago. The sister of the man I would gladly take a bullet for. And the only woman I would ever love. Sending her away was the hardest thing I've ever done, but I didn't deserve her or her love. For three years I stayed away, ignoring the gnawing ache that her absence

left in my chest. Now, she was back and fighting what I felt for her was impossible. Letting her go had been a huge mistake. One I would never repeat.

### **2016 XXV2016 XXV International Scientific Conference Electronics (et)**

It is remarkable that African Americans, the descendants of slaves, embrace Christianity at all. The imagination that is necessary to parse biblical text and find within it a theology that speaks to their context is a testimony to their will to survive in a hostile land. Black religion embraces the cross and the narrative of Jesus as savior, both theologically and culturally. But this does not suggest that African Americans have not historically, and do not now, struggle with the reconciliation of the cross, black life, suffering. African Americans are well aware of the shared relationship of Christianity with the white oppressors of history. The religion that helped African Americans to survive is the religion that was instrumental in their near genocide.

Join author, speaker, teacher, and business coach Al Katz as he takes you on A Journey with Mac. A ride you will not likely forget. In a unique and engaging way, Mac takes Gregg on a journey through the day-to-day life of the business world. Combining a passion for business and education, Mac offers Gregg, and readers alike, powerful tools for success in both their business and personal lives. In doing so he shares his message in a humorous and entertaining manner. You will likely see yourself and your organization in the many situations and circumstances Mac and Gregg encounter and find the tools and lessons to be both practical and effective.

Handbook for Sound Engineers is the most comprehensive reference available for audio engineers, and is a must read for all who work in audio. With contributions from many of the top professionals in the field, including Glen Ballou on interpretation systems, intercoms, assistive listening, and fundamentals and units of measurement, David Miles Huber on MIDI, Bill Whitlock on audio transformers and preamplifiers, Steve Dove on consoles, DAWs, and computers, Pat Brown on fundamentals, gain structures, and test and measurement, Ray Rayburn on virtual systems, digital interfacing, and preamplifiers, Ken Pohlmann on compact discs, and Dr. Wolfgang Ahnert on computer-aided sound system design and room-acoustical fundamentals for auditoriums and concert halls, the Handbook for Sound Engineers is a must for serious audio and acoustic engineers. The fifth edition has been updated to reflect changes in the industry, including added emphasis on increasingly prevalent technologies such as software-based recording systems, digital recording using MP3, WAV files, and mobile devices. New chapters, such as Ken Pohlmann's Subjective Methods for Evaluating Sound Quality, S. Benjamin Kanter's Hearing Physiology—Disorders—Conservation, Steve Barbar's Surround Sound for Cinema, Doug Jones's Worship Styles in the Christian Church, sit aside completely revamped staples like Ron Baker and Jack Wrightson's Stadiums and Outdoor Venues, Pat Brown's Sound System Design, Bob Cordell's Amplifier Design, Hardy Martin's Voice Evacuation/Mass Notification Systems, and Tom Danley and Doug Jones's Loudspeakers. This edition has been honed to bring you the most up-to-date information in the many aspects of audio engineering.

## **Readers' Guide to Periodical Literature**

"Josh Rosenthal is a record man's record man. He is also a musician's record man. He is in the line of Samuel Charters and Harry Smith. In this age where we have access to everything and know the value of nothing, musicians need people like Josh to hear them when no one else can." T Bone Burnett Grammy-nominated producer and Tompkins Square label founder Josh Rosenthal presents his first book, *The Record Store of the Mind*. Part memoir, part "music criticism," the author ruminates over unsung musical heroes, reflects on thirty years of toil and fandom in the music business, and shamelessly lists some of the LPs in his record collection. Crackling with insightful untold stories, *The Record Store of the Mind* will surely delight and inspire passionate music lovers especially those who have spent way too many hours in record stores.

Celebrating ten years in 2015, Rosenthal's San Francisco-based independent record label Tompkins Square has received seven Grammy nominations and wide acclaim for its diverse catalog of new and archival recordings.

This comprehensive book on audio power amplifier design will appeal to members of the professional audio engineering community as well as the student and enthusiast. Designing Audio Power Amplifiers begins with power amplifier design basics that a novice can understand and moves all the way through to in-depth design techniques for very sophisticated audiophiles and professional audio power amplifiers. This book is the single best source of knowledge for anyone who wishes to design audio power amplifiers. It also provides a detailed introduction to nearly all aspects of analog circuit design, making it an effective educational text. Develop and hone your audio amplifier design skills with in-depth coverage of these and other topics: Basic and advanced audio power amplifier design Low-noise amplifier design Static and dynamic crossover distortion demystified Understanding negative feedback and the controversy surrounding it Advanced NFB compensation techniques, including TPC and TMC Sophisticated DC servo design MOSFET power amplifiers and error correction Audio measurements and instrumentation Overlooked sources of distortion SPICE simulation for audio amplifiers, including a tutorial on LTspice SPICE transistor modeling, including the VDMOS model for power MOSFETs Thermal design and the use of ThermalTrak(tm) transistors Four chapters on class D amplifiers, including measurement techniques Professional power amplifiers Switch-mode power supplies (SMPS). design Static and dynamic crossover distortion demystified Understanding negative feedback and the controversy surrounding it Advanced NFB compensation techniques, including TPC and TMC Sophisticated DC servo design MOSFET power amplifiers and error correction Audio measurements and instrumentation Overlooked sources of distortion SPICE simulation for audio amplifiers, including a tutorial on LTspice SPICE transistor modeling, including the VDMOS model for power MOSFETs Thermal design and the use of ThermalTrak(tm) transistors Four chapters on class D amplifiers, including measurement techniques Professional power amplifiers Switch-mode power supplies (SMPS). the use of ThermalTrak(tm) transistors Four chapters on class D amplifiers, including measurement techniques Professional power amplifiers Switch-mode power supplies (SMPS).
