Algebra I

This workbook is a companion to the 5th edition of Emergency Care in the Streets. The emphasis is on vocabulary and on clinical decision making, and it includes wordgames, quizzes and puzzles to reinforce the objectives set up in the textbook.

Algebra 1

The H.I. Mencken Murder Case

Nineteen forty-eight is a leap year and a good one for Harry S Truman. The second-hand book dealers on Manhattan's Fourth Avenue are in full swing. Howard inherits his father's shabby bookshop, but Howard isn't a true bookman, and he knows how little money there is in the business until a seemingly priceless manuscript falls into his lap. But there's something odd about it. Howard decides to check out his

treasure with an acerbic fellow in Baltimore, a man Howard's late father believed could solve all literary problems: H.L. Mencken. The results are deadly.

Handbook of Palliative Care

Precalculus with Trigonometry: Concepts and Applications

Algebra and Trigonometry

In this text, algebra and trigonometry are presented as a study of special classes of functions. In the process, relationships between theory and real-world applications are thoroughly explored, bringing the material to life. Suitable for a second-year course, a trigonometry course, or a pre-calculus course.

Calculus

CPR for All

This handbook offers a practical, thorough approach to the clinical practice of palliative care. Adding North American authors to its roster of UK contributors, the third edition of this award-winning book addresses important changes in the evidence base of palliative care, as well as an emphasis on end-of-life community-based care. It features new chapters on dementia and advance care planning, a simplified lymphoedema discussion, and an ongoing commitment to providing essential guidance for physicians, nurses, and all
