GRE Uncovered

This book brings together new essays on six of the most important British and American writers who lived in or visited Spain in the 20th century and whose work bears the impact of the Spanish Civil War of 1936-39. On the occasion of the 75th anniversary of its outbreak, the new angle on the relations between these authors and Spain is the examination of the mutual bond and its fruits from the point of view of life-writing. The six writers - five British and one American - are presented in chronological order of their birth: Gerald Brenan, Robert Graves, Ernest Hemingway, George Orwell, Stephen Spender and Laurie Lee. Their autobiographies, or what they wrote about their lives in or in relation to Spain, are contrasted with the often multiple biographies that were written on them.

Painful Yarns

This remarkable book provides a portrait of the lesser-known peoples of Sarawak, New Zealand: the Land Dayaks. Written by an anthropologist who came to know these people during a two-year stay in their remote village, the study--introduced by a folktale imparted to the author by the leading spirit-medium in the village--is a masterly analysis based on sound anthropological techniques and informed with understanding, affections, and humor. Geddes describes the life of the Land Dayaks--their traditions, beliefs, and their attitudes toward things around them--and reveals not only their differences from, but also their similarities to the greater world of humanity outside their community. Originally published in 1957,

this study has lost none of its freshness or fascination.

A Gift Upon the Shore

Not just a history of the world, this is also a history for the world. Packed full of fascinating information, it is written in the same lively and accessible style that charmed the readers of Cyril Aydon's previous books Charles Darwin and A Book of Scientific Curiosities. It follows the fortunes and misfortunes of the human race, from the time when our ancestors took their first tentative steps out of Africa, to the day when human beings set foot on the moon; from the domestication of the first donkey to the cloning of Dolly the sheep; and from the building of the pyramids to the designing of the World Wide Web. Informed by the most recent historical and archaeological research, the book focuses not on the conventional small change of kings and queens, battles, and political maneuvers, but on developments that have really shaped the lives of human beings around the globe: the Neolithic revolution in agriculture, the invention of writing, the rise and fall of empires, the birth of great religions, the industrial revolution. This book asks whether we have really changed, or are we just stone-age people living in a space age we have made but cannot control.

“A poignant expression of the durability, grace, and potential of the human spirit” set in a post-nuclear dystopia where words are worth killing for (Jean M. Auel, author of the Earth’s Children series). By the late twenty-first century, civilization has nearly been destroyed by overpopulation, economic chaos, horrific disease, and a global war that brought a devastating nuclear winter. On the Oregon coast, two women—writer Mary Hope and painter Rachel Morrow—embark on an audacious project to help save future generations: the preservation of books, both their own and any they can find at nearby abandoned houses. For years, they labor in solitude. Then they encounter a young man who comes from a group of survivors in the South. They call their community the Ark. Rachel and Mary see the possibility of civilization rising again. But they realize with trepidation that the Arkites believe in only one book—the Judeo-Christian bible—and regard all other books as blasphemous. And those who go against the word of God must be cleansed from the Earth . . . In this “thought-provoking” novel of humanity, hope, and horror, M.K. Wren displays “her passionate concern with what gives life meaning (Library Journal).

You blunder into the grand opening of a new hospital, sign up to volunteer and, with considerable reluctance, let yourself be assigned to the ER. What starts as a Monday evening lark eventually becomes a life-changing experience. Your new course leads from the ER to becoming a volunteer EMT and, later, a paramedic and a perennial night school student. Eventually, at an age when others might be thinking of retiring to play golf, you quit your job, move away from home, and go back to college as a physician assistant student with strangers less than half your age. This book details the often humorous experience that follows from a perspective that hopefully will help others follow their own paths, whatever they may be. Along the way, new experiences evoke old memories, while new friends, teachers, and patients teach important new lessons. The book comes full circle with a view of what it is like to be a PA, one of U.S. News & World Report's "50 hottest careers."

In an era of slowing growth, Africa is home to a trillion-dollar, resource-rich economy, and six of the ten fastest growing markets in the world. Success in Africa introduces the ambitious CEOs who are building the continent. These stories of growth, technology, and tradition bring life to one of the most important stories of the global economy: a successful Africa. The CEOs of General Electric, The Coca Cola Company, and Tullow Oil join Africa's leading CEOs to share insights on what wins in this fast-growth market. With twenty years of experience in frontier markets, including a decade working in Africa, author Jonathan Berman engages with top business leaders on the vast opportunities and challenges of the continent. Success in Africa pushes past the headlines on Africa's growth to answer the questions often asked by companies and investors: Who do I work with there and what drives them? How do I deal with government? What about war, disease, and poverty? What about China? How do I win? Success in Africa provides on-the-ground perspective, personal stories, and insight that Robert Rubin calls "essential reading for all who are interested in Africa for reasons of business, investment, policy, or curiosity."

This much anticipated collection of stories, written by Oxford University Fellow and Pain Scientist, Dr GL Moseley, provides an entertaining and informative way to understand modern pain biology. Described by critics as 'a gem' and by clinicians as 'entertaining and educative', Painful Yarns is a unique book. The stories, some of his travels in outback Australia, some of experiences growing up, are great yarns. At the end of each story, there is a section "so what has this got to do with pain?" in which Lorimer uses the story as a metaphor for some aspect of pain biology. The level of the pain education is appropriate for patients and health professionals. The entertainment is good for everyone. You don't have to be interested in pain to get something from this book and a laugh or two!
