Diffusion of Innovations

A New York Times bestseller *The Great Deformation* is a searing look at Washington's craven response to the recent myriad of financial crises and fiscal cliffs. It counters conventional wisdom with an eighty-year revisionist history of how the American state—especially the Federal Reserve—has fallen prey to the politics of crony capitalism and the ideologies of fiscal stimulus, monetary central planning, and financial bailouts. These forces have left the public sector teetering on the edge of political dysfunction and fiscal collapse and have caused America's private enterprise foundation to morph into a speculative casino that swindles the masses and enriches the few. Defying right- and left-wing boxes, David Stockman provides a catalogue of corrupters and defenders of sound money, fiscal rectitude, and free markets. The former includes Franklin Roosevelt, who fathered crony capitalism; Richard Nixon, who destroyed national financial discipline and the Bretton Woods gold-backed dollar; Fed chairmen Greenspan and Bernanke, who fostered our present scourge of bubble finance and addiction to debt and speculation; George W. Bush, who repudiated fiscal rectitude and ballooned the warfare state via senseless wars; and Barack Obama, who revived failed Keynesian “borrow and spend” policies that have driven the national debt to perilous heights. By contrast, the book also traces a parade of statesmen who championed balanced budgets and financial market discipline including Carter Glass, Harry Truman, Dwight Eisenhower, Bill Simon, Paul Volcker, Bill Clinton, and Sheila Bair. Stockman's analysis skewers Keynesian spenders and GOP tax-cutters alike, showing how they converged to bloat the welfare state, perpetuate the military-industrial complex, and deplete the revenue base—even as the Fed's massive money printing allowed politicians to enjoy “deficits without tears.” But these policies have also fueled new financial bubbles and favored Wall Street with cheap money and rigged stock and bond markets, while crushing Main Street savers and punishing family budgets with soaring food and energy costs. *The Great Deformation* explains how we got here and why these warped, crony capitalist policies are an epochal threat to free market prosperity and American political democracy.

Hunters at the Margin examines the conflict in the Northwest Territories between Native hunters and conservationists over three big game species: the wood bison, the muskox, and the caribou. John Sandlos argues that the introduction of game regulations, national parks, and game sanctuaries was central to the assertion of state authority over the traditional hunting cultures of the Dene and Inuit. His archival research undermines the assumption that conservationists were motivated solely by enlightened preservationism, revealing instead that commercial interests were integral to wildlife management in Canada.

Feminism and the Politics of Travel After the Enlightenment

In 2016, scientist Rosaly Lopes and artist Michael Carroll teamed up as fellows of the National Science Foundation to travel to Mount Erebus, the world's southernmost active volcano in Antarctica. The logistics of getting there and complex operations of Antarctica's McMurdo Station echo the kinds of strategies that future explorers will undertake as they set up settlements on Mars and beyond. This exciting popular-level book explores the arduous environment of Antarctica and how it is similar to other icy worlds in the Solar System. The bulk of this story delves into Antarctica's infrastructure, exploration, and remote camps, culminating on the summit of Erebus. There, the authors explored the caves and ice towers on the volcano's flanks, taking photographs and generating original art depicting scenes in Antarctica and terrestrial analogs on other planets and moons. Readers will see an intimate side of Mount Erebus and Antarctica while surveying

the region's history, exploration, geology, and volcanology, which includes research funded by the National Science Foundation's United States Antarctic Programs. Richly illustrated with photographs and stunning paintings showcasing the beauty of the harsh continent, the book captures the spirit and splendor of the authors' journey to Erebus.

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

The new edition makes use of the important ideas of uncertainty and information. The author presents an important discussion of how new innovations generate uncertainty for individuals and organizations, how this uncertainty holds the promise of alternatives superior to practice, and how it thereby provides the motivation to seek information. Thus the diffusion of innovations is essentially presented as a social process in which subjectively perceived information about a new phenomenon is communicated.

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

Operations Management in the Supply Chain: Decisions and Cases is an ideal book for the instructor seeking a short text with cases. This book employs a cross-functional perspective that emphasizes strategy and critical thinking, appealing to non-majors and practical for use in an MBA level or undergraduate course in operations management. The size and focus of the book also make the text attractive for the cross-functional curriculum where students are required to

purchase more than one text. The sixteen cases offer variety in length and rigor; and several are from Ivey, Stanford, and Darden. This mix makes the book appropriate for both undergraduates and MBA students.

Eternal Horizon

This book presents the latest scientific views on resource use conflicts in the Arctic seas. The main areas of focus are the biological resources of Arctic seas vs. exploitation of oil and gas resources, and the conflicts in between. In addition, climate change is presented as a stressor, which both limits and facilitates the economic availability of resources in the Arctic. The book is divided into five parts. Part 1 examines Arctic ecosystems, resilience of the marine environment and possible conflicts between industrial sector and biological world. The focus of Part 2 is on transport infrastructure along the northern routes. Issues such as Arctic maritime operations, black carbon and unmanned aerial vehicles are considered. Part 3 focuses on resource use conflicts in Arctic seas and on the most recent threats in terms of Arctic oil and gas exploration, offshore logistics operations as well as transportation of oil and oil products. Discussions in Part 4 of the book are concentrated around social aspects and involvement of local communities. Tourism development, preservation of indigenous culture, engagement of communities on relevant Arctic issues, search and rescue in the cold marine environment are examples of questions raised. The book reviews Arctic-specific petroleum regulations, the state of preparedness to oil spill accidents in the region as well as the latest developments in oil spill response technologies and their limitations. Search and rescue operations are reviewed and how working in this harsh Arctic environment affects the ability of rescue technicians to perform the required technical skills. Part 5 considers the sustainability challenges arising from the marine resource exploitation. The focus is on the vulnerability of Arctic ecosystems to disturbance – both natural and anthropogenic.

A Slice of the Pie

In this enchanting debut novel, Galen Beckett weaves a dazzling spell of adventure and suspense, evoking a world of high magick and genteel society—a world where one young woman discovers that her modest life is far more extraordinary than she ever imagined. Of the three Lockwell sisters—romantic Lily, prophetic Rose, and studious Ivy—all agree that it's the eldest, the book-loving Ivy, who has held the family together ever since their father's retreat into his silent vigil in the library

upstairs. Everyone blames Mr. Lockwell's malady on his magickal studies, but Ivy alone still believes—both in magic and in its power to bring her father back. But there are others in the world who believe in magick as well. Over the years, Ivy has glimpsed them—the strangers in black topcoats and hats who appear at the door, strangers of whom their mother will never speak. Ivy once thought them secret benefactors, but now she's not so certain. After tragedy strikes, Ivy takes a job with the reclusive Mr. Quent in a desperate effort to preserve her family. It's only then that she discovers the fate she shares with a jaded young nobleman named Dashton Rafferdy, his ambitious friend Eldyn Garritt, and a secret society of highwaymen, revolutionaries, illusionists, and spies who populate the island nation of Altania. For there is far more to Altania than meets the eye and more to magick than mere fashion. And in the act of saving her father, Ivy will determine whether the world faces a new dawn—or an everlasting night. . . .

How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. *A Slice of the Pie* will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

Libraries have existed for millennia, but today many question their necessity. In an ever more digital and connected world do we still need places of books in our towns, colleges, or schools? If libraries aren't about books, what are they about? In *Expect More*, David Lankes, winner of the 2012 ABC-CLIO/Greenwood Award for the Best Book in Library Literature, walks you through what to expect out of your library. Lankes argues that communities need libraries that go beyond bricks and mortar and beyond books. We need to expect more out of our libraries. They should be places of learning and advocates for our communities in terms of learning, privacy, intellectual property, and economic development. *Expect More* is a rallying call to communities to raise the bar, and their expectations, for great libraries.

Many of us are alarmed by the accelerating rates of extinction of plants and animals. But how many of us know that human cultures are going extinct at an even more shocking rate? While biologists estimate that 18 percent of mammals and 11 percent of birds are threatened, and botanists anticipate the loss of 8 percent of flora, anthropologists predict that fully 50 percent of the 7,000 languages spoken around the world today will disappear within our lifetimes. And languages are merely the canaries in the coal mine: what of the knowledge, stories, songs, and ways of seeing encoded in these voices? In *The Wayfinders*, Wade Davis offers a gripping and enlightening account of this urgent crisis. He leads us on a fascinating tour through a handful of indigenous cultures, describing the worldviews they represent and reminding us of the encroaching danger to humankind's survival should they vanish.

Hunters at the Margin

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon,

Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.
