Point Man

Our world is in desperate need of bold, passionate men of integrity. Yet such men aren't born; they're

built, shaped, and formed by God. Best-selling author Steve Farrar will guide you through the story of Joseph, a humble shepherd who overcame tremendous odds to become an influential leader. It's here you will discover the process that creates true men of God, where He works providentially, strangely, and slowly. Uncover the biblical pattern for growth, gain insights into common frustrations and difficulties, and become equipped for the journey ahead.

Point Man

One of the most important texts of modern times, Herbert Marcuse's analysis and image of a one-dimensional man in a one-dimensional society has shaped many young radicals' way of seeing and experiencing life. Published in 1964, it fast became an ideological bible for the emergent New Left. As Douglas Kellner notes in his introduction, Marcuse's greatest work was a 'damning indictment of contemporary Western societies, capitalist and communist.' Yet it also expressed the hopes of a radical philosopher that human freedom and happiness could be greatly expanded beyond the regimented thought and behaviour prevalent in established society. For those who held the reigns of power Marcuse's call to arms threatened civilization to its very core. For many others however, it represented a freedom hitherto unimaginable.

How to Survive Combat as Point Man If You're Lucky

What's the fastest a human can run the 100-meter sprint? What's the longest a human can hold his breath? What are the limits of human performance? Welcome to *The Perfection Point*. Until 1954, common wisdom and scientific knowledge considered a sub-four-minute mile an impossible feat for a human. But then Roger Bannister broke that mark, followed quickly by a host of other athletes. Today the world record stands at 3 minutes, 43 seconds, yet even that number doesn't tell the full story of how fast humans can run a mile—records are a mark of how well people have done, not how well they can do. What's the actual limit? The answer lies in *The Perfection Point*. In this fascinating and thought-provoking book, John Brenkus, the host, co-creator, and executive producer of ESPN's *Sport Science*, ventures across the sports world to provide an in-depth look at the absolute limits of human performance. Beginning with the current world records for a variety of sports, Brenkus finds the “perfection point” for each, zeroing in on the speeds, heights, distances, and times that humans will get closer to but never exceed. Combining cutting-edge science with the fundamentals of each sport, Brenkus answers questions as old as competition itself, exploring the outer realm of what's possible in athletics. Using engrossing and accessible language, he applies statistics, physics, and physiology to uncover perfection points such as: the highest dunk the longest home run the fastest mile the longest golf drive the heaviest bench press Intriguing, detailed, and controversial, the answers that Brenkus provides are essential reading for every sports fan. For years, coaches, pundits, and experts have speculated about

the extremes of human ability. The Perfection Point finally provides the answers.

The Classics

Point Man

Chief Petty Officer James "Patches" Watson was there at the start. One of the first to come out of the famed Underwater Demolition Team 21, he was an initial member -- a "plank owner" -- of America's deadliest and most elite fighting force, the U.S. Navy SEALs. Through three tours in the jungle hell of Vietnam, he walked the point -- staying alert to trip wires, booby traps and punji pits, guiding his squad of amphibious fighters on missions of rescue, reconnaissance and demolition -- confronting a war's unique terrors head-on, unprotected . . . and unafraid. This is the story of a hero told from the heart and from the gut -- an authentic tour of duty with one of the most legendary commandoes of the Vietnam War.

God Is My Point Man

The point man leads the patrol into battle, looking for signs of danger. He is the first to face ambushes, hidden bombs and snipers. Few survive for long. Between 2007 and 2008, 20-year-old Kenny Meighan was the longest-serving point man in Helmand province. An exceptionally skilful and brave private, he was lucky to make it home alive. But in his hometown in Essex, where prospects are bleak and his father still suffers from the nightmares of his own war experience, Kenny's struggle is far from over.

Whoa Man! See What God Did With a Rib

The authors experiences in training as an infantry replacement and in infantry combat as a soldier private, scout and point man in Normandy, Northern Europe and Germany from mid-July through early October 1944 (when the author was seriously wounded and evacuated to England) with the 30th Infantry Division. Excellent, sometimes humorous account of what it was really like to be a foot soldier in the months following the Normandy invasion.

Ancients

If you thought your parenting responsibilities ended after eighteen years per child, you thought wrong. Instead, it's your privilege to lead your family-and influence succeeding generations-for a century or more. Anchor Man presents the high calling of fatherhood, the traits of a Christian father, the adventures that await him as he interacts with his children, and the significance of his role as a good

family man. Steve Farrar presents these roles and responsibilities in a way any man wanting to increase his understanding of his place in the family, and our society, can put into action every day. Anchor Man encourages, exhorts, and demonstrates with biblical concepts how to raise a godly family and how to anchor that family in Christ for the next one hundred years. Farrar's unique teaching style blends humor and practicality with the tools fathers need to become all that God intended them to be as the leaders of their families. "When a man gets serious about following Christ with his whole heart," Farrar says, "God desires to not only pour out His blessing on that man, but on his children, and his children's children.

The Price of Global Health

Reminiscent of the works of James Rollins and Matthew Reilly comes the latest in an action-packed series about the nation's most secret agency---the Event Group Ten thousand years before the Roman Empire marched great legions across the known world, there was a civilization dedicated to the sciences of earth, sea, and sky. In the City of Light lived people who made dark plans to lay waste to their uncivilized neighbors using the very power of the planet itself. As the great science of their time was brought to bear on the invading hordes, hell was set loose on Earth. And the civilization of Atlantis disappeared in a suicidal storm of fire and water. Now history threatens to repeat itself. The great weapon of the Ancients has been uncovered in the South Pacific, and it is being deciphered by men of hatred---by an

evil once thought banished from history. Again, the black swastika of hate is rising. Their plan is to attempt to control and direct the most destructive force this world has yet to see, a weapon that would make nuclear arms pale in comparison. The world starts to tremble under the power of the ancient science. The seas rise, the earth cracks, and entire cities crumble to dust as the evil plan mapped out thousands of years before takes shape. The Event Group, the most secret department of the United States government, staffed by the most brilliant men and women of science, philosophy, and the military, must take the lead and try to stop the power of the Ancients. With a presidential mandate to discover the truth behind the myths and legends of history, the Event Group fights to ensure that mistakes from the past are never repeated. Headed by Colonel Jack Collins, the Group must face its most dangerous assignment ever: to find the lost trail of the Ancients and unearth the missing key before the new Reich. Can the most secret federal service of the United States track down the lost trail that will lead them to the lair of this secret power? Or will the world explode in a chain reaction that began more than eleven thousand years ago? The Event Group is the world's only hope as they search and battle for the lost power of the Ancients. Heart-pounding action combines with historical adventure as the Event Group discovers that some myths never die. . . .

The Old Man and The Sea

Public debate on the rising cost of new biotechnology

drug treatments has intensified over the last few years as healthcare budget pressures have mounted under a strained economy. Meanwhile, the demand for new, effective medical and drug treatments continues to rise as unhealthy lifestyles cause further increases in diabetes and cardiovascular disease. Global drug pricing is one of the most hotly debated yet least understood aspects of the pharmaceutical industry. How should drug prices be set and what does it mean for patients? Why do governments increasingly get involved, and what is its impact on the global competitive environment? How can a life-saving industry have a poorer image than gun and tobacco industries, whose products are associated with death? Ed Schoonveld explains how pharmaceutical prices are determined in a complex global payer environment and what factors influence the process. His insights will help a wide range of audiences, from healthcare industry professionals to policy makers and the broader public, to gain a better understanding of this highly complex and emotionally charged field. *The Price of Global Health* is recognized as a valued and unique reference book that covers a complete array of topics related to global pharmaceutical pricing. It contains an in-depth but straightforward exploration of the pharmaceutical pricing strategy process, its underlying market access, general business and ethical considerations, and its implications for payers, physicians and patients. It is a much-needed and invaluable resource for anybody interested or involved in, or affected by, the development, funding and use of prescription drugs. In particular, it is of critical importance to pharmaceutical company executives and other

leaders and professionals in commercialization and drug development, including marketing, business development, market access and pricing, clinical development, drug discovery, regulatory affairs, health outcomes, market research and public affairs. The second edition includes new chapters on payer value story development, oncology, orphan drugs and payer negotiations. Furthermore, many country chapters have been substantially updated to reflect changes in the healthcare systems, including the Affordable Care Act in the US, AMNOG in Germany, medico-economic requirements in France and many other country-specific changes. Lastly, almost every chapter has been updated with new examples and illustrations.

respected and provocative advocates of the role of technology in our future. In his classic *The Age of Spiritual Machines*, he argued that computers would soon rival the full range of human intelligence at its best. Mega Man 6: Breaking Point

Pointman is one platoon's story of the Vietnam War and the horrors that most veterans of the conflict would rather keep buried. While most soldiers gritted their teeth, kept their heads down and prayed for their time to be up, some looked at the war as a way to win glory and acclaim. Others took advantage of illicit opportunities for personal gain, no matter the price to others. Sgt. Mike Brooks is counting the days until his tour of duty is up. All he wants is to marry his Vietnamese girlfriend. But butting heads with his lieutenant has put his meager happiness in jeopardy. Lt. Gomez's obsession with promotion and accolades will send the entire platoon on an almost-impossible mission. And high-purity heroin, readily available and dirt cheap, could be the death of them all. - Renee Struthers, East Oregonian newspaper

Patrols in the rice paddies of the Mekong Delta, the triple canopy jungle of Cambodia, the firefights, the mosquitoes and mud, the Plain of Reeds, Shakey's Hill, Binh Phuoc, Rach Kien, Bien Hoa, Long Binh - I wanted to remember it all. I especially remember the camaraderie and the courage demonstrated by these soldiers. Pointman was originally started as a diary more than 40 years ago and I love the story - it's fictionalized, but it acknowledges the suffering and sacrifices these young men endured. - Author, Robert L. Courage of the Mountain Man

Point Man

Bestselling author Steve Farrar has good news for the average man: it doesn't matter if you've had a great start in the Christian life, or a rough one. It doesn't matter if you've stumbled time and again, or even fallen flat on your face. What matters most in this all-important race of life is how you finish. According to Farrar, the man who hangs in there for the long haul with his wife, his kids, and his Lord is an exception these days. *Finishing Strong*, now in trade paperback, offers lively use of Scripture, contemporary illustrations, and study questions to equip every reader to be that exception. For the man who wants to climb the character ladder more than the corporate one, this is an essential tool. From the Trade Paperback edition.

For nearly five centuries, Cornelius Agrippa has fought against an evil that has threatened to corrupt and destroy everything good and untainted in the world. Now, Max has joined the battle. Point Man

Using kings of the Old Testament as character studies, Steve Farrar examines the critical role a father plays in preparing his son to become a godly man. What separated the good kings from the bad kings was a father who made time commitments to mentor his son, by modeling biblical manhood. Do you want your son to become a man of regal character? Then this book is for you!

Confessor

It seems that for decades, women in talk shows, books, and movies have been notorious men bashers. Real men are tired of hearing women say that there are no good men out there and that "men are dogs."

Now it's the man's turn! From a Man's Point of View is about one popular man's view of love and relationships, as well as the games men and women play during the dating process, starting from his first love, first heartbreak, and all the other interactions that occur up to the present. Women are so quick to blame men for the bad choices in men that they make, but is it the man's fault for getting away with the lying and manipulating of women, or is the women who are at fault for putting up with it? Most women would answer that wrong! It's time to hear what men have to say about how they have to deal with women in relationships and what men expect from women. It's finally time to hear from a man's point of view!

God Built

Terry Goodkind's bestselling, epic fantasy series *Sword of Truth* continues with *Confessor*. Join Richard and Kahlan in the concluding novel of one of the most remarkable and memorable journeys ever written. It started with one rule, and will end with the rule of all rules, the rule unwritten, the rule unspoken since the dawn of history. When next the sun rises, the world will be forever changed. King Me

(Book Jacket Status: Jacketed)When it was published in 1955, "Lolita" immediately became a cause célèbre because of the freedom and sophistication with which it handled the unusual erotic predilections of its protagonist. But Vladimir Nabokov's wise, ironic, elegant masterpiece owes its stature as one of the twentieth century's novels of record not to the

controversy its material aroused but to its author's use of that material to tell a love story almost shocking in its beauty and tenderness. Awe and exhilaration—along with heartbreak and mordant wit—abound in this account of the aging Humbert Humbert's obsessive, devouring, and doomed passion for the nymphet Dolores Haze. Lolita is also the story of a hypercivilized European colliding with the cheerful barbarism of postwar America, but most of all, it is a meditation on love-love as outrage and hallucination, madness and transformation. With an Introduction by Martin Amis "From the Hardcover edition."

Point Man

Reading this book will make you less sure of yourself—and that's a good thing. In *The Invisible Gorilla*, Christopher Chabris and Daniel Simons, creators of one of psychology's most famous experiments, use remarkable stories and counterintuitive scientific findings to demonstrate an important truth: Our minds don't work the way we think they do. We think we see ourselves and the world as they really are, but we're actually missing a whole lot. Chabris and Simons combine the work of other researchers with their own findings on attention, perception, memory, and reasoning to reveal how faulty intuitions often get us into trouble. In the process, they explain:

- Why a company would spend billions to launch a product that its own analysts know will fail
- How a police officer could run right past a brutal assault without seeing it
- Why

award-winning movies are full of editing mistakes • What criminals have in common with chess masters • Why measles and other childhood diseases are making a comeback • Why money managers could learn a lot from weather forecasters Again and again, we think we experience and understand the world as it is, but our thoughts are beset by everyday illusions. We write traffic laws and build criminal cases on the assumption that people will notice when something unusual happens right in front of them. We're sure we know where we were on 9/11, falsely believing that vivid memories are seared into our minds with perfect fidelity. And as a society, we spend billions on devices to train our brains because we're continually tempted by the lure of quick fixes and effortless self-improvement. The Invisible Gorilla reveals the myriad ways that our intuitions can deceive us, but it's much more than a catalog of human failings. Chabris and Simons explain why we succumb to these everyday illusions and what we can do to inoculate ourselves against their effects. Ultimately, the book provides a kind of x-ray vision into our own minds, making it possible to pierce the veil of illusions that clouds our thoughts and to think clearly for perhaps the first time. From the Hardcover edition.

Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.
