Complete GED Preparation

Teaching for Democracy in an Age of Economic Disparity addresses the intersections between democratic education and economic inequality in American society. Drawing upon well-established theoretical constructs in the literature on democratic citizenship as well as recent events, this volume outlines the ways in which students can not only be educated about democracy, but become actively engaged in the social issues of their time. The collection begins with an examination of how the confluence of capitalism and education have problematized the current model of democratic education, before transitioning into discussions of how teachers can confront economic disparity both economically and civically in the classroom. The authors then introduce a variety of ways in which teachers can engage and empower students' civic action at all grade levels. As a final component, the volume explores new avenues for civic action, including the use of social media for democratic engagement in schools and opportunities for critical reflection and cross-cultural dialogue. This book is a valuable resource for both scholars interested in the research on democratic education and practicing teachers wishing to turn their students into critical, active citizens.

Understanding Second Language Learning Difficulties

A new collection of persona poems from award-winning poet Frank X Walker that tell the untold story of legendary African American jockey Isaac Burns Murphy (1861-1896).

Seniors Online

Raises issues about teaching and curriculum development and invites readers to share their experiences, make their assumptions about literacy explicit and work together to investigate instructional methods. The book describes how adult ESL literacy teachers and students can collaborate so that a literacy curriculum is relevant to students life experiences and helps them confront the challenges they face as workers, parents, and community members.

Infant Care

A comprehensive critique showing that training has been a near-total failure. Examines the economic assumptions and track record of training policy, and provides a political analysis of why job training has remained so popular despite widespread evidence of its failure. [book jacket].

Teaches the attitudes and competencies necessary for success at work.

Raising Confident Readers

Is the United States justified in seeing itself as a meritocracy, where stark inequalities in pay and employment reflect differences in skills, education, and effort? Or does racial discrimination still permeate the labor market, resulting in the systematic under hiring and underpaying of racial minorities, regardless of merit? Throughout the 1980s and early 1990s African Americans have lost ground to whites in the labor market, but this widening racial inequality is most often attributed to economic restructuring, not the racial attitudes of employers. It is argued that the educational gap between blacks and whites, though narrowing, carries greater penalties now that we are living in an era of global trade and technological change that favors highly educated workers and displaces the low-skilled. *Stories Employers Tell* demonstrates that this conventional wisdom is incomplete. Racial discrimination is still a fundamental part of the explanation of labor market disadvantage. Drawing upon a wide-ranging survey of employers in Atlanta, Boston, Detroit, and Los Angeles, Moss and Tilly investigate the types of jobs employers offer, the skills required, and the recruitment, screening and hiring procedures used to fill them. The authors then follow up in greater depth on selected employers to explore the attitudes, motivations, and rationale underlying their hiring decisions, as well as decisions about where to locate a business. Moss and Tilly show how an employer's perception of the merit or suitability of a candidate is often colored by racial stereotypes and culture-bound expectations. The rising demand for soft skills, such as communication skills and people skills, opens the door to discrimination that is rarely overt, or even conscious, but is nonetheless damaging to the prospects of minority candidates and particularly difficult to police. Some employers expressed a concern to race-match employees with the customers they are likely to be dealing with. As more jobs require direct interaction with the public, race has become increasingly important in determining labor market fortunes. Frequently, employers also take into account the racial make-up of neighborhoods when deciding where to locate their businesses. Ultimately, it is the hiring decisions of employers that determine whether today's labor market reflects merit or prejudice. This book, the result of years of careful research, offers us a rare opportunity to view the issue of discrimination through the employers' eyes. A Volume in the Multi-City Study of Urban Inequality

Focused on Practice

Metaliteracy in Practice

This publication aims to identify what works in the policy and practice of adult learning, drawing on the experience of nine OECD countries.

Information Needs of Communities

The 13 chapters in this volume explore what is known and what still needs to be learned about the complex relationships between speaking and writing. The first chapter in the book provides a detailed overview of linguistic studies of oral and written language relationships. The next three chapters focus on the relationships between children's oral and written language skills and what these relationships imply about the teaching of writing and reading. Chapters five and six consider oral and written language in a societal context, while chapters seven, eight, and nine are concerned with methodological issues in the study of speaking-writing relationships, each suggesting a way to broaden the understanding of these relationships. The next two chapters broaden the understanding of oral-written relationships by considering two special groups of individuals who often struggle to learn English--speakers of other languages and the profoundly deaf. The final two chapters focus on pedagogy, such as integrating speaking and writing in a business communications course. (RL)

Laubach Way to English

With more than 900 pages, this comprehensive guide covers all six GED testing areas thoroughly with step-by-step instructions, practice tests and answers, helpful test-taking strategies, reviews, and more! Its self-study instruction and extensive practice exercises provide everything a GED candidate needs to succeed.

International Handbook of Health Literacy

Podcasting For Dummies

"A rich tale of healing, redemption, and social responsibility." -- Publishers Weekly "A compelling, skillfully told story?. Lyon's finest achievement." -- Lexington Herald-Leader "Lyon gives readers a story rich in precise, gorgeous language that glows like a sword on the forge and cuts as deep?. Tragedies old and new weave a tiny Kentucky town into the center of the universe." -- Booklist (starred review) "Lyon consistently reveals in her work an ability to render the peculiarities of the people and the places she knows best, while at the same time exploring concerns that lend her stories and poems universal appeal. The same is true of *With a Hammer for My Heart*, a powerful first novel that catapults Lyon into the ranks of other well-respected contemporary novelists." -- Southern Register

Literacy in American Lives

This essential guide provides practical help and encouragement for those who have not previously studied at a distance and is idea for students returning to study after a break. This edition is significantly revised and has been updated to include comments from distance learning tutors as well as extracts from student handbooks from distance learning courses.

Metaliteracy

Teaching for Democracy in an Age of Economic Disparity

To maintain their own health and the health of their families and communities, consumers rely heavily on the health information that is available to them. This information is at the core of the partnerships that patients and their families forge with today's complex modern health systems. This information may be provided in a variety of forms ranging from a discussion between a patient and a health care provider to a health promotion advertisement, a consent form, or one of many other forms of health communication common in our society. Yet millions of Americans cannot understand or act upon this information. To address this problem, the field of health literacy brings together research and practice from diverse fields including education, health services, and social and cultural sciences, and the many organizations whose actions can improve or impede health literacy. Health Literacy: Prescription to End Confusion examines the body of knowledge that applies to the field of health literacy, and recommends actions to promote a health literate society. By examining the extent of limited health literacy and the ways to improve it, we can improve the health of individuals and populations.

The Annual Review of Adult Learning and Literacy

Promotes verbal and written communication strategies that nurses can use to effectively meet the individualized needs of an increasingly diverse patient population in an effort to enhance patient-provider communication across the entire continuum of care.

Stories Employers Tell

Raise a Child Who Loves to Read How do kids really learn to read? And how can you encourage interest in reading and writing from the start? In Raising Confident Readers, based on the five phases of literacy development, Dr. J. Richard Gentry provides fun and easy ways to teach your child to read and write successfully. When it comes to language, the most critical brain growth happens in early childhood. Raising Confident Readers shows you how to activate and accelerate this capacity

for learning: The key is to introduce the right activities at the right time. Whether your child is a baby or toddler, in preschool or kindergarten, or first or second grade, Dr. Gentry helps you identify your child's literacy phase and take the next steps to build writing, reading, and spelling skills. You'll discover: How your child's brain learns to read—and why encouraging drawing and scribbling is as essential as reading aloud The best at-home activities to develop literacy early, naturally, and joyfully Recommended children's books for each phase Strategies for overcoming dyslexia, delayed reading, and other challenges Checklists and a milestones diary to celebrate your child's progress As your child moves through the five phases, they'll soon be sounding out and spelling words correctly, reading chapter books independently, and writing creative stories on their own. Complete with samples of children's writing throughout, *Raising Confident Readers* is an essential resource to foster your child's lifelong love of reading.

Health Literacy in Nursing

As societies grow more complex and people are increasingly bombarded with health information and misinformation, health literacy becomes essential. People with strong health literacy skills enjoy better health and well-being, while those with weaker skills tend to engage in riskier behavior and have poorer health. With evidence from the recent European Health Literacy Survey, this report identifies practical and effective ways public health and other sector authorities and advocates can strengthen health literacy in a variety of settings, including educational settings, workplaces, marketplaces, health systems, new and traditional media and political arenas. The report can be used as a tool for spreading awareness, stimulating debate and research and, above all, for informing policy development and action.

Making Meaning, Making Change

A girl provides a lighthearted account of the spring floods at her rural home.

Come a Tide

The story of a poor family in Appalachia, pulled between the despair of their meager farm and the promise offered by the mining camp, as seen through the eyes of a small boy.

Learning and Education in Developing Countries

The insights, techniques and skills needed to understand why some adult students have difficulties with learning a second language are presented in this book. The author's premise is that what appears on the surface is often not the real source

of the learner's difficulty. A correct diagnosis of the cause of the problem is important if intervention is to prove effective. The book presents a large number of theories and models of learning, and covers areas including: learning styles and personality dispositions; student motivation, self-efficacy and anxiety; and how to interview students.

River Of Earth

"This project forms part of a national research project investigating how literacy can be best provided for groups with special needs. The research was conducted in 1999 by the Tasmanian Centre of the Adult Literacy and Numeracy Australian Research Consortium (ALNARC) with funding from the Australian National Training Authority (ANTA) and the Department of Education, Training and Youth Affairs (DETYA). It focuses on the learning needs of older rural Tasmanians and the potential of online technologies to foster local literacies and community well being" --p.g. 1.

Cracking the GED

Available Open Access under CC-BY-NC license. Health literacy addresses a range of social dimensions of health including knowledge, navigation, communication as well as individual and organizational skills for accessing, understanding, evaluating and using of information. Especially over the past decade, health literacy has become a major public health concern globally as an asset for promoting health, wellbeing and sustainable development. This comprehensive handbook provides an invaluable overview of current international thinking about health literacy, highlighting cutting edge research, policy and practice in the field. With a diverse team of contributors, the book addresses health literacy across the life-span and offers insights from different populations and settings. Providing a wide range of major findings, the book outlines current discourse in the field and examines necessary future dialogues and new perspectives.

GED Test Power Practice

This unique publication is written for practitioners in the field of adult learning and literacy. This third volume in the series from the National Center for the Study of Adult Learning and Literacy (NCSALL). This is a collection of the best new knowledge and practice in the field, and includes an introduction by the editors and six articles by distinguished writers and practitioners, as well as reviews of the best books and key journal articles published in the past year.
