would think with all the answers contained in this book, that anyone who reads it would automatically become a better salesperson. You would be thinking wrong. To become a better salesperson, the first thing you have to do is read it. The second thing to do with this book is read it again. The third thing to do with this book is try one answer every day. If it does not work exactly right the first time, or the outcome was not what you expected, try it again and tweak it a little bit. The fourth thing you have to do is practice the answer until you feel that it is working. The fifth thing you have to do is become the master of it. Blend each answer to your selling situation and do it in a way that fits your style, and your personality. Think about the way you ask for an appointment. The way you leave a voice-mail message. The way you follow up after a sales call. The way you begin a sales presentation. The way you ask for a sale. The way you respond to an angry customer. The way you earn a referral. Or the way you get a testimonial. Wouldn't you love to have the perfect answer for every one of these situations?

The user-friendly pages are filled with easy-to-follow explanations of key algebra II concepts, followed by detailed examples that clearly demonstrate how to solve common problems. Hundreds of practice questions will help you master each concept, sharpen your problem-solving skills, and build confidence. Features include:

- Topics aligned with national and state standards for algebra II courses
- Content focused on helping you excel in the classroom and on standardized tests
- Concise, clear explanations to easily grasp key concepts
- Thorough examples that illustrate how to solve typical algebra II questions
- More than 500 math problems that provide extensive opportunities to practice your new skills
- Helpful appendixes covering matrices and probabilities

Topics covered:

- Linear Equations and Inequalities
- Functions
- Quadratic Relationships
- Complex Numbers
- Polynomial Functions
- Rational and Irrational Functions
- Exponential and Logarithmic Functions
- Sequences and Series
- Trigonometry
- Descriptive Statistics
