To succeed in life, you must top your class, get Band One for school tests, and obtain four A stars for the PSLE. Or at least, that is the world according to Ling, a typical Singaporean mum who has made it her goal in life to help her children succeed in school. Ling's older daughter, April, has all the makings of a model student and looks set to ace the Primary Six national exams. In the meantime, Ling's younger son, Noah, is free-spirited and more interested in canteen food than what goes on in class. This (almost) kiasu mum records her journey diary-style, describing hilarious episodes involving crazy worksheets, assessment book overload and jittery parent-teacher meetings. Ling's humorous take on surviving Singapore schools will have you laughing and give you serious food for thought, all at the same time!

New Syllabus Mathematics (NSM) is a series of textbooks specially designed to provide valuable learning experiences to engage the hearts and minds of students sitting for the GCE O-level examination in Mathematics. Included in the textbooks are Investigation, Class Discussion, Thinking Time, Journal Writing, Performance Task and Problems in Real-

World Contexts to support the teaching and learning of Mathematics. Every chapter begins with a chapter opener which motivates students in learning the topic. Interesting stories about Mathematicians, real-life examples and applications are used to arouse students' interest and curiosity so that they can appreciate the beauty of Mathematics in their surroundings. The use of ICT helps students to visualise and manipulate mathematical objects more easily, thus making the learning of Mathematics more interactive. Ready-to-use interactive ICT templates are available at <http://www.shinglee.com.sg/StudentResources/>

In recent times, there has been intense global interest on and scrutiny of Islamic education. In reforming Islamic schools, what are the key actions initiated and are they contested or negotiated by and among Muslims? This edited collection brings together leading scholars to explore current reforms in Islamic schools. Drawing together international case studies, *Reforms in Islamic Education* critically discusses the reforms, considering the motivations for them, nature

of them and perceptions and experiences of people affected by them. The contributors also explore the tensions, resistance, contestations and negotiations between Muslims and non-Muslims, and among Muslims, in relation to the reforms. Highlighting the need to understand and critique reforms in Islamic schools within broad historical, political and socio-cultural contexts, this book is a valuable resource for academics, policymakers and educators.

Vorschule Im Klavierspiel, Op. 101, by Ferdinand Beyer (1803--1863) was first published in 1860. Since that time, it has been used by piano students throughout the world, especially in Asian countries. When compared with piano methods written in the 20th and 21st centuries, it appears more like a technique book than a piano method. This edition has been edited to be useful for today's piano students, either as a method (with teacher guidance) or as a supplementary book.
