Appendix to Cape Meridian Observations

"An analysis of the revenues and expenditures of the Government of Canada" (varies slightly).

The National Finances

For millions of Canadians looking ahead to retirement, the Canada Pension Plan (CPP) has become a contentious issue. Even after the recent CPP reforms, Canadians under the age of 35 will contribute more than twice the amount they will ever receive. With billions of dollars at stake and an entire generation hanging in the balance, we need to consider our alternatives now. In this timely volume, William B.P. Robson, Francois Vaillancourt, J.C. Herbert Emery, Kenneth J. McKenzie, Robert L. Brown, and Bev Dahlby assess the feasibility of a separate pension plan for Alberta, with an eye to the Quebec experience and recent federal reform. While an independent plan may offer certain benefits, it also

comes with costs and risks, to Albertans and to Canadians at large. A Separate Pension Plan for Alberta offers compelling analysis for economists, policy-makers, and anyone concerned with the future of public pension plans in Canada.

As arrhythmias may be transient in nature and not seen during the shorter recording times of the standard ECG, ECG Holter monitoring allows the physician to make better informed decisions for the cardiac patient. The devices are worn by patients on an outpatient basis for days or weeks and can also be implanted subcutaneously. ECG Holter recordings are especially useful since they can be programmed individually for activation and specific tracing analysis. Designed for rapid study, this book contains 100 illustrative cases in ECG Holter monitoring. Each case consists of a tracing followed by a brief explanation of the findings. 100 Cases in ECG Holter is the perfect resource for busy physicians looking to optimize their skills at interpreting ECG Holter readings.

Operations research, 2e is the study of optimization techniques. Designed to cater to the syllabi requirements of Indian universities, this book on operations research reinforces the concepts discussed in each chapter with solved problems. A unique feature of this book is that with its focus on coherence and clarity, it hand-holds students through the solutions, each step of the way.

"Taken together, the studies in this volume do not purport to provide a comprehensive picture of the likely future evolution of the Canadian, or world, economies. They should provide the reader with substantial food for thought on forces which will be important in shaping that future."--Preface.

The Statist

"This study examines the effects of private and public pension plans on both the level and composition of personal savings. It thus also considers personal

portfolio changes which may have occurred as a result of existing pension plans. In addition, the study examines the effects of pension plans on the amount of labour supplied by individuals and, consequently, the implications for the retirement decision and personal savings"--Abstract.

Following the successful and proven concept used in "Bioactive Heterocyclic Compound Classes" by the same editors, this book is the first to present approved pharmaceutical and agrochemical compounds classified by their carboxylic acid functionality in one handy volume. Each of the around 40 chapters describes one or two typical syntheses of a specific compound class and provides concise information on the history of development, mode of action, biological activity and field of application, as well as structure-activity relationships. In addition, similarities and differences between pharmaceuticals and agrochemicals are discussed in the introduction. Written by a team of experts in the field, this is a useful reference for researchers in academia and chemical or pharmaceutical companies working in the

field of total synthesis and natural product chemistry, drug development, and crop protection research.
