Teacher's Handbook

In 2014, College Board rolled out a new AP® U.S. History course, which centered less on memorizing content and more on developing skills. Since then, the course has been modified here and there, but very little has changed in AP® textbooks--content is still king. Until now. *Fabric of a Nation* is the first book to truly embrace this dramatic shift in the AP® course and in how history is taught. Built from the ground up by long-time AP® leaders Jason Stacy and Matthew Ellington, this book offers a new approach to AP® US History by seamlessly integrating: A brief historical narrative AP® skills practice Primary source documents Exact alignment to the AP® course Now, that's revolutionary!

Books in Print, 2004-2005

Building Vocabulary from Word Roots provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. *Building Vocabulary from Word Roots: Level 9* kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and

more.

Magico-Religious Groups and Ritualistic Activities

A woman lays unconscious on the floor surrounded by charcoaled symbols, burning candles, a bowl of viscous red liquid, and an array of dried herbs. Was this a healing ritual gone wrong or just straightforward foul play? Increasingly, first responders must deal with foreign practices and cultures that are often disturbing in their unfamiliarity. Understanding cultural variations and nuances can make the difference between much-needed emergency treatment and the aggravation of an already sensitive situation. The first book of its kind, *Magico-Religious Groups and Ritualistic Activities: A Guide for First Responders* provides a cultural bridge for emergency personnel when interacting with various magico-religious cultures. More than just a litany of artifacts, rituals, and symbols, this valuable book draws from cultural anthropology and religious studies to unearth hidden meanings and place the information in a context relevant for the first responder. It offers crucial keys for improving communication, assessment, and treatment in culturally sensitive situations. Beginning with an introduction to the importance of trans-cultural communication, the book devotes subsequent chapters to the common and contrasting elements of several magico-religious groups. It considers the practices of Neo-Paganism, Santeria, Bantu religion (Palo Mayombe), Voodoo, and Curanderismo. The

book separates fact from fantasy regarding sacred spaces and dates, ceremonies, group structure, sacred objects, cultural taboos, and beliefs about sickness and healing. It also includes a detailed review of the common herbs used in healing and ritual, as well as a glossary of cultural terms and an index of symbols. Promoting functional cultural competency, this book gives public service agencies and emergency responders the tools to properly assess situations, open lines of communication, protect cultural diversity and beliefs and, above all, provide effective emergency treatment.

This volume is witness to a spirited and fruitful period in the evolution of corpus linguistics. In twenty-two articles written by established corpus linguists, members of the ICAME (International Computer Archive of Modern and Mediaeval English) association, this new volume brings the reader up to date with the cycle of activities which make up this field of study as it is today, dealing with corpus creation, language varieties, diachronic corpus study from the past to present, present-day synchronic corpus study, the web as corpus, and corpus linguistics and grammatical theory. It thus serves as a valuable guide to the state of the art for linguistic researchers, teachers and language learners of all persuasions. After over twenty years of evolution, corpus linguistics has matured, incorporating nowadays not just small, medium and large primary corpus building but also specialised and multi-dimensional secondary corpus building; not just corpus analysis, but also corpus evaluation; not just an initial application of theory, but self-reflection and a new concern with theory in the light of experience. The volume also highlights the growing emphasis on language as a changing phenomenon, both in terms of established historical study and the newer short-range diachronic study of 20th century and current English; and the growing area of overlap between

these two. Another section of the volume illustrates the recent changes in the definition of 'corpus' which have come about due to the emergence of new technologies and in particular of the availability of texts on the world wide web. The volume culminates in the contributions by a group of corpus grammarians to a timely and novel discussion panel on the relationship between corpus linguistics and grammatical theory.
