Ure's Dictionary of Arts, Manufactures, and Mines

The Builder

"In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and to draw out implications for theory, policy and practice." --from back cover.

Electrical World

Domestic Engineering and the Journal of Mechanical Contracting

The Poetical gazette; the official organ of the Poetry society and a review of poetical affairs, nos. 4-7 issued as supplements to the Academy, v. 79, Oct. 15, Nov. 5, Dec. 3 and 31, 1910

The Academy and Literature

The Operation, Care, and Repair of Farm Machinery

Monthly magazine devoted to topics of general scientific interest.

Railway Age

Cycle and Automobile Trade Journal

A manual of the securities, traffic statistics, earnings, officers, directors, and equipment of street and interurban railways of the United States, Canada, Cuba and West Indies.

The Popular Science Monthly

This vintage book contains comprehensive guide to collecting dolls, containing information on the history of dolls, buying and selling, restoration, and a much more. Profusely illustrated and full of interesting information, "Dolls - A Guide for Collectors" constitutes a timeless resource for doll enthusiasts and is not to be missed by modern collectors. Contents include: "What is a Doll", "On Collecting Dolls-Where to Buy, What to Pay, and Dolls Worth Collecting", "Early Toy Dolls", "Dolls of the Nineteenth Century", "China-Headed Dolls and their Marks", "Bidque Dolls and their Marks", "Dolls of Papier Mache and Composition", "Hand-made Dolls", "The Christmas Crib", "The Cloth Doll", et cetera. Many vintage books such as this are increasingly scarce and expensive. We are republishing this volume now in an affordable, modern edition complete with a specially commissioned new introduction on dolls.

Automobile Trade Journal

This is a basic training and maintenance manual written to explain the principles involved in the operation of electrical equipment in an average industrial plant.

Engineering

The Automobile Handbook

This best selling text on computer organization has been thoroughly updated to reflect the newest technologies. Examples highlight the latest processor designs, benchmarking standards, languages and tools. As with previous editions, a MIPS processor is the core used to present the fundamentals of hardware technologies at work in a computer system. The book presents an entire MIPS instruction set—instruction by instruction—the fundamentals of assembly language, computer arithmetic, pipelining, memory hierarchies and I/O. A new aspect of the third edition is the explicit connection between program performance and CPU performance. The authors show how hardware and software components--such as the specific algorithm, programming language, compiler, ISA and processor implementation--impact program performance. Throughout the book a new feature focusing on program performance describes how to search for bottlenecks and improve performance in various parts of the system. The book digs deeper into the hardware/software interface, presenting a complete view of the function of the programming language and compiler--crucial for understanding computer organization. A CD provides a toolkit of simulators and compilers along with tutorials for using them. For instructor resources click on the grey "companion site" button found on the right side of this page. This new edition represents a major revision. New to this edition: * Entire Text has been updated to reflect new technology * 70% new exercises. * Includes a CD loaded with software, projects and exercises to support courses using a number of tools * A new interior design presents defined terms in the margin for quick reference * A new feature, "Understanding Program Performance" focuses on performance from the programmer's perspective * Two sets of exercises and solutions, "For More Practice" and "In More Depth," are included on the CD * "Check Yourself" questions help students check their understanding of major concepts * "Computers In the Real World" feature illustrates the diversity of uses for information technology *More detail below
