The electrification of the watch led to massive upheaval in the watch industry as mechanical chronometers built by Old World masters developed into electromechanical devices mass produced in Asia. In nearly 600 images and in-depth text, this book retraces the often circuitous paths that led from the electromagnetic pendulum clock to the modern quartz wristwatch. This well-researched volume focuses on the period between 1950 and 1985, but it also

covers the long process of electrifying big clocks, which goes back to Alexander Bain's 1841 patent for an electrically operated magnetic pendulum clock. But the crowning achievement of this process was the further miniaturization of the timepiece into the modern quartz wristwatch. Follow the many different technical developments in Switzerland, France, Germany, Russia, Japan, South Korea, and the United States and see detailed images of components, schematics, and complete wristwatch movements from hundreds of makers, including Bulova, Hamilton, Omega, Rolex, and Seiko. This is an ideal book for horologists as well as those interested in the history of science and industry.

The early 2000s were an important period, spanning a time when mechanical watches had quite rightly retaken their place in the world market. We all may have a digital device in our pocket that is more accurate than a mechanical watch, but a timepiece has soul, personality, and history. The collection in this book is a step into the world of vintage watch collecting, with a range of photographs, intricate research, and accessible reference material that will intrigue both the casual and avid enthusiast. The collection showcases some of the most interesting, luxurious, and functional 20th-century (1930-1980) mechanical timepieces ever to be produced, including Heuer's Autavia, Rolex's Submariner, Gallet's MultiChron, Zenith's De Luca, and the Universal Space Compax.

"Rolex was established in 1908, a century ago, so one hundred years have passed from that day to the publication of this volume in which the author, John Goldberger, illustrates what he considers to be the 100 most beautiful examples ever produced. One hundred years of life, and one hundred examples, traced back through time thanks to painstaking research, with the collaboration of some of the most renowned collectors in the world, and photographed to show the characteristics of the movement, case and dial of each example in the best possible way. The top one hundred, we could say, also to narrow down the field of research, which would otherwise have been incredibly vast, to grasp the essence of a brand that has probably contributed more than any other to the development of the wristwatch. Giampiero Negretti Over 700 colour illustrations and 400 descriptions provide the collector and watch enthusiast with invaluable information on reference numbers, watchcases, faces, movements, related calibres and the year of production of each watch. The book is divided into seven chapters: Watches with a destiny; Oyster; Chronograph and moon phases; Oyster chronograph and moon phases; Datejust, Day-Date; Sport Models; Cosmograph."--BOOK JACKET.

**PRESENTATION: HOW TO KNOW EVERYTHING ABOUT THE ROLEX GMT-MASTER** The GMT-Master was created to meet the needs of Pan American Airways to supply its pilots with a wristwatch able to indicate the time back home and the time in their arrival destination simultaneously. It was necessary to give the pilots a “technical” wristwatch, which indicated simultaneously the two different times. It is from this point that the request arose from Pan Am to Rolex, to create a new watch for modern age aviators: a watch with two time zones. The name GMT-Master was chosen... The International Bestseller "This book blew my mind. More importantly, it made financial independence seem achievable. I read Financial Freedom three times, cover-to-cover." --Lifehacker Money is unlimited. Time is not. Become financially independent as fast as possible. In 2010, 24-year old Grant Sabatier woke up to find he had \$2.26 in his bank account. Five years later, he had a net worth of over \$1.25 million, and CNBC began calling him "the Millennial Millionaire." By age 30, he had reached financial independence. Along the way he uncovered that most of the accepted wisdom about money, work, and retirement is either incorrect, incomplete, or so old-school it's obsolete. Financial Freedom is a step-by-step path

to make more money in less time, so you have more time for the things you love. It challenges the accepted narrative of spending decades working a traditional 9 to 5 job, pinching pennies, and finally earning the right to retirement at age 65, and instead offers readers an alternative: forget everything you've ever learned about money so that you can actually live the life you want. Sabatier offers surprising, counter-intuitive advice on topics such as how to: \* Create profitable side hustles that you can turn into passive income streams or full-time businesses \* Save money without giving up what makes you happy \* Negotiate more out of your employer than you thought possible \* Travel the world for less \* Live for free--or better yet, make money on your living situation \* Create a simple, money-making portfolio that only needs minor adjustments \* Think creatively--there are so many ways to make money, but we don't see them. But most importantly, Sabatier highlights that, while one's ability to make money is limitless, one's time is not. There's also a limit to how much you can save, but not to how much money you can make. No one should spend precious years working at a job they dislike or worrying about how to make ends meet. Perhaps the biggest surprise: You need less money to "retire" at age 30 than you do at age 65. Financial Freedom is not merely a laundry list of advice to follow to get rich quick--it's a practical roadmap to living life on one's own terms, as soon as possible.

For more than a century, Rolex has stood apart as the most legendary brand of watch in the world. A Rolex connotes many things: a luxury timepiece, a tool of power for movers and shakers and the symbol of passage into adulthood. New labels pop up, styles come and go, but the brand at the top never changes. Ever the record setter—the Daytona that had belonged to Paul Newman was auctioned by Phillips in New York in October 2017 for \$17.8 million— it comes as no surprise that Rolex is the most collected watch label in the world. The Vintage Watch Company is the only store of its kind in the world, with a devoted client base of Rolex aficionados, from royalty to sporting legends to stars of the silver screen. Throughout, father and son, John and David Silver have been carefully cataloguing and amassing one of the largest pictorial records of vintage Rolex watches in the world. Published to celebrate the company's 25th anniversary in late 2020, the book contains a unique pictorial collection of vintage Rolex watches that have passed through the shop during the past 25 years. who can at last regard her existence with a modicum of mercy and forgiveness a story of true self-salvation and transformation.”—Elizabeth Gilbert As a young college graduate a year into treatment with a psychiatrist, Cree LeFavour's began to organize her days around the cruel, compulsive logic of self-harm: with each newly lit cigarette, the world would drop away as her focus narrowed to an unblemished patch of skin calling out for attention and the fierce, blooming release of pleasure-pain as the burning tip was applied to the skin. Her body was a canvas of cruelty; each scar a mark of pride and shame. In sharp and shocking language, *Lights On, Rats Out* brings us closely into these years, allowing us to feel the pull of a stark compulsion taking over a mind. We see the world as Cree did—turned upside down, the richness of life muted and dulled, its pleasures perverted. The heady, vertiginous thrill of meeting with her psychiatrist, Dr. X—whose relationship with Cree is at once sustaining and paralyzing—comes to be the only bright spot in her mental solitude. Her extraordinary access to and inclusion of the notes kept by Dr. X during treatment offer concrete evidence of Cree's transformation over 3 years of therapy. But it is her own evocative and razor-sharp prose that traces a path from a lonely and often sad childhood to her reluctant commitment to and emergence from a psychiatric hospital, to the saving refuge of literature and eventual acceptance of love. Moving deftly between the dialogue and observations from psychiatric records and elegant, incisive reflection on youth and early adulthood, *Lights On, Rats Out* illuminates a fiercely bright and independent woman's charged attachment to a mental health professional and the dangerous

compulsion to keep him in her life at all costs.

of artisanal mastery, the mechanical wristwatch has never possessed more forms, functions or facets than it does today. The Wristwatch Handbook is written from the epicenter of a renaissance, a place in time between the Quartz revolution and the rise of the smart device - where the mechanical wristwatch is the antidote to the microprocessor and the permanent buzz of your inbox. From the multi-axis tourbillon, to the split-second chronograph, to the sidereal sky chart, The Wristwatch Handbook covers it all and does so with more than 470 rich illustrations from over 90 of the World's leading brands. The book is separated into two sections. The first section provides the reader with a comprehensive understanding of the mechanical movement. Its chapters explore power, transmission, distribution and regulation illustrating the basic concepts before considering the innovation and complexity that takes place further toward the cutting edge. From the fifty-day power reserve, to the constant force mechanism, and the 1,000Hz mechanical escapement, section 1 will allow the reader to understand and appreciate what is happening beneath the dial of their watch. Section two allows the reader to take this understanding and apply it to the vast range of complications (functions) that exist in modern horology. Each chapter showcases a distinct category of complication. For example, the regatta timer, pulsometer, and monopusher chronograph join a host of others in a chapter entitled 'Recording Lapses of Time'; The power reserve indicator, dynamograph, and crown position indicator are featured in a chapter for 'Power and Performance Indication'; The moon phase indicator, annual calendar, and planetarium can be found in the

'Astronomical Complications' chapter. Once the functional categories are exhausted, the final three chapters explore whimsical complications that have little regard for practical function, novelty time indication, and the 'super-complicated' watch - a rare breed of timepiece that houses an intimidating host of complications featured throughout the book. Upon completion of *The Wristwatch Handbook* the reader will be able to identify even the most exotic complication from across the room, and be able to share their appreciation and understanding of what makes it so useful and compelling. *The Wristwatch Handbook* is "brand agnostic", using only those watches that most aptly illustrate the given subject-matter. As a consequence the book places equal emphasis on the classic and the cutting edge, on watches produced in large volume or exclusive runs, by industry-leading technology or at the hand of a master. In doing so the book provides an unparalleled range of watches from over 90 brands, allowing the reader to determine for themselves which brands, complications, and styles they will build their collection from.

You’ll find all dials with their variants of color (Stella dial) and material (lapis lazuli, root wood, meteorite, etc). Furthermore: the first Rolex Day-Date, 1800 series, “pie-pan” dials, 18000 series, personalized dials, special series, vintage advertisements, box, papers, Oysterquartz Day-Date, 18200 and 18300 series, Day-Date II, Day-Date 40 and much more. We can read from an official Rolex document: « THE BIRTH OF THE “DATEJUST” AND THE “DAY-DATE”

Not satisfied with having realized a selfwinding waterproof watch, we decided to dedicate ourselves to studying the calendar watch. This is how the “Datejust”, which clearly indicates the date on the dial in a small aperture with a Cyclops lens which enlarges it so as to make it easier to read, was born. The next stage was the launch of the “Day-Date”, a perfected model which also indicates, with letters, the days of the week. The day and the date automatically change every evening at midnight. » These are the words of Roger Federer, a living tennis legend, about his Day-Date II: “The reason I like my Day-Date so much is because it is a legendary watch, elegant but with a certain spirit, with a touch of modernity added to its

stylish black dial”.

Watches" explains how and why these little objects are so precious, fascinating and exciting. The Magic of Watches loves paradoxes: why a one-million-dollar watch might be less precise and more fragile than one that costs 15 dollars. The Magic of Watches comes back to the origins of the measurement of time: how did we go from the water clock to the wristwatch? The Magic of Watches dares to speak about technique: how does a mechanical movement work? How does a quartz watch work? The Magic of Watches delves into details: what is a "complication" and when do we speak about "chronometer"? The Magic of Watches likes art: how do we enamel a dial? The Magic of Watches is unique: it focuses in detail on the basics in order to understand and love watches better.
