"During the War of 1812 the U.S. Navy came of age. In fleet actions on the lakes and single ship engagements at sea, American men of war defeated Royal Navy ships of similar force. Naval officers such as Isaac Hull, Stephen Decatur, Oliver H. Perry, David Porter and Thomas Macdonough became heroes, and their ships, Constitution, United States, Niagara, Essex, and Saratoga, symbols for an American public proud of its navy. The three volumes will again call to mind the famous naval actions and events of our second war of independence with Great Britain"--Introduction.

Western Civilization leads the market as the first western civilization text to include a separate chapter on Late Antiquity and the first to use the new political history, the effect of power and politics on all members of society, at the center of its narrative. Recognizing that European history was affected by factors outside the continent, this text looks at Europe by examining its place in the world. With an emphasis on the experimental nature of political and social history, the text challenges students to explore why and how history unfolded as it did.
