Report on the Administration of Nauru

Publications - Fels Research Institute for the Study of Human Development

A complete course of oral & mental arithmetic

The format of Mental Arithmetic differs from that of traditional mental arithmetic materials in that pupils read the questions themselves, use rough paper for workings out, and write down their answers. It provides intensive practice in all areas of the maths curriculum.

The Neuropsychology Toolkit

I spent more than ten years writing this book. I take it very seriously. I corrected all the mistakes I could find in this book in September, 2017, but the old comment is still here. If any one can find two or more mistakes in this book, email me, I will mail you an updated new book. Amanda Yang homathandchess@hotmail.com October 2017
