That's Not My Owl--

This remarkable book provides a portrait of the lesser-known peoples of Sarawak, New Zealand: the Land Dayaks. Written by an anthropologist who came to know these people during a two-year stay in their remote village, the study--introduced by a folktale imparted to the author by the leading spirit-medium in the village--is a masterly analysis based on sound anthropological techniques and informed with understanding, affections, and humor. Geddes describes the life of the Land Dayaks--their traditions, beliefs, and their attitudes toward things around them--and reveals not only their differences from, but also their similarities to the greater world of humanity outside their community. Originally published in 1957, this study has lost none of its freshness or fascination.

renowned Egyptologist Barbara Mertz brings a long-buried civilization to vivid life. In *Red Land, Black Land*, she transports us back thousands of years and immerses us in the sights, aromas, and sounds of day-to-day living in the legendary desert realm that was ancient Egypt. Who were these people whose civilization has inspired myriad films, books, artwork, myths, and dreams, and who built astonishing monuments that still stagger the imagination five thousand years later? What did average Egyptians eat, drink, wear, gossip about, and aspire to? What were their amusements, their beliefs, their attitudes concerning religion, childrearing, nudity, premarital sex? Mertz ushers us into their homes, workplaces, temples, and palaces to give us an intimate view of the everyday worlds of the royal and commoner alike. We observe priests and painters, scribes and pyramid builders, slaves, housewives, and queens—and receive fascinating tips on how to perform tasks essential to ancient Egyptian living, from mummification to making papyrus. An eye-opening and endlessly entertaining companion volume to *Temples, Tombs, and Hieroglyphs*, Mertz's extraordinary history of ancient Egypt, *Red Land, Black Land* offers readers a brilliant display of rich description and fascinating edification. It brings us closer than ever before to the people of a great lost culture that was so different from—yet so surprisingly similar to—our own.

been totally transformed into the major handbook of planning and design data for architects. This new edition has been updated to account of the most recent changes to regulation and practice - in particular the increasing emphasis on environmental legislation - to meet the needs of the modern building design professional. The Metric Handbook deals with all the principal building types from airports, factories and warehouses, offices shops and hospitals, to schools, religious buildings and libraries. For each type the book gives the basic design requirements and all the principal dimensional data, as well as succinct guidance on how to use the information and what regulations the designer may need to be aware of. As well as buildings the Metric Handbook deals with broader aspects of design such as materials, acoustics and lighting, and general design data on human dimensions and space requirements. The Metric Handbook is a unique authoritative reference for solving everyday planning problems. It has sold well over 100,000 copies worldwide to successive generations of architects and designers - this is a book that truly belongs on every design office desk and drawing board.

This much anticipated collection of stories, written by Oxford University Fellow and Pain Scientist, Dr GL Moseley, provides an entertaining and informative way to understand modern pain biology. Described by critics as 'a gem' and by clinicians as 'entertaining and educative', Painful Yarns is a unique book. The stories, some of his travels in outback Australia, some of experiences growing up, are great yarns. At the end of each story, there is a section "so what has this got to do with pain?" in which Lorimer uses the story as a metaphor for some aspect of pain biology. The level of the pain education is appropriate for patients and health professionals. The entertainment is good for everyone. You don't have to be interested in pain to get something from this book and a laugh or two!

You blunder into the grand opening of a new hospital, sign up to volunteer and, with considerable reluctance, let yourself be assigned to the ER. What starts as a Monday evening lark eventually becomes a life-changing experience. Your new course leads from the ER to becoming a volunteer EMT and, later, a paramedic and a perennial night school student. Eventually, at an age when others might be thinking of retiring to play golf, you quit your job, move away from home, and go back to college as a physician assistant student with strangers less than half your age. This book details the often humorous experience that follows from a perspective that hopefully will help others follow their own paths, whatever they may be. Along the way, new experiences evoke old memories, while new friends, teachers, and patients teach important new lessons. The book comes full circle with a view of what it is like to be a PA, one of U.S. News & World Report's "50 hottest careers."
