Bruno Taut ranks the Ise Shrine with the Parthenon in architectural importance. John Burchard, in his preface, characterizes Ise as "one of the great architectural achievements of history. I suppose," he comments, "Ise has many lessons for contemporary architects once they get over being embarrassed by it." Robin Boyd, in his book, 'Kenzo Tange', observes that it was only after the Second World War that the West realized that many qualities of modern architecture were quite old. "These qualities had existed for centuries in Japanese buildings. It [Japanese

tradition] relied on the use of ingenious construction and untreated natural material to build a sort of refined extension of nature: a concentration of nature's own kind of beauty. Thus Japan was rediscovered." The Ise Shrine, situated some 270 miles west of Tokyo, is both old and new. The shrine dates from at least A.D. 685, but every twenty years it is completely rebuilt. Each rebuilding--there have been 59 so far--is scrupulously undertaken to guarantee an exact and identical reproduction of the preceding shrine. In 1953, after the most recent renewal, but prior to the transfer of religious objects, not only were the authors allowed to inspect the prohibited area--it is ringed by four fences and contains the most important buildings--but they were granted unprecedented permission to photograph it. This book represents the first opportunity for most Westerners to view and study one of the architectural wonders of the world. 'ISE : Prototype of Japanese Architecture begins with a preface by John Burchard and a foreword by the internationally recognized architect, Kenzo Tange. Tange also has written one of the two main essays in the book; the other is by Noboru Kawazoe, in which Ise is examined primarily in terms of Japanese mythology and history. Tange discusses Ise in an architectural perspective; he writes, "In the subsequent history of Japanese architecture, extending over more than a thousand years, it has proved impossible to advance beyond the form of Ise. Along with the Parthenon Ise represents the peak in the history of world architecture. 'ISE : Prototype of Japanese Architecture belongs' in every fine arts collection and in every architectural library. The photographs, reproduced with exquisite care, make this

book an invaluable architectural study, a work of genuine scholarship, and a visual delight. The text, especially prepared for a Western audience, invites the attention of all those interested in Japanese culture. Scholars of comparative religion and cultural anthropology will also find the book of value."--Publisher's description.

The Morning of the Magicians

That Marcello Gandini is one of the greatest of automobile designers ever has never been disputed, and whether he is the greatest ever, only time and the directions automobile design takes, will tell. But there is no doubting Marcello Gandini's immense impact on automobile design in the last four decades of the 20th century that still remains valid well into the 21st century. From the Lamborghini Miura to the Maserati Quattroporte IV, the humble Innocenti Mini to the epic Cizeta V16T, Marcello Gandini has designed some of the most epochal of all automobiles. Iconic cars like the first-generation BMW 5 Series, the Audi 50/VW Polo, the Fiat X1/9, the Lamborghini Countach and the Diablo, the Lancia Stratos, the Renault Magnum super truck, and many others have all flowed his stylistic pen. -- Designing automobiles that really defined the late 1960s, 1970s, 1980s, even the 1990s, Marcello Gandini is, arguably, the one man who had the greatest impact, the one who changed automotive design the most.

“Japan's pop culture, once believed unexportable, is now hitting the shores of other nations like a tsunami. In North America, young fans consume vast amounts of manga and anime, while academics increasingly study the entire J-pop phenomenon to understand it. One community has passion while the other has discipline, and what has been lacking is a bridge between the two. Mechademia is the bridge, and with a name like that, how can one go wrong? So why wait? Hop in your giant mobile suit and stomp down to the local real or virtual bookstore to purchase a copy right now!” —Frederik L. Schodt, author of *Manga! Manga! The World of Japanese Comics* *Networks of Desire*—the second volume in the *Mechademia* series, an annual forum devoted to critical and creative work on Japanese anime, manga, and the fan cultures that have coalesced around them—explores the varieties of desire that structure and influence much of contemporary anime and manga in manifestations that range from the explicitly sexual to more sublimated text and imagery. Collecting original essays by scholars, artists, and fans, *Networks of Desire* considers key issues at play in a Japanese society increasingly uncertain of its place in a globalized world: from idealized

representations of same-sex desire in such shjo manga (girls's comics) as *The Rose of Versailles*, to fan fiction inspired by the gender-switching manga *Ranma ½*, to desire in otaku communities. Deftly weaving together desire and discourse, *Mechademia 2* illuminates the techno-carnal fantasies, animalistic consumption, political nostalgia, and existential hunger underlying the most popular and influential expressions of Japanese popular culture today. The groundbreaking and classic study that first popularized occultism, alchemy, and paranormal phenomena in the 1960s • Provides profound insights into our perceptions of reality, telepathy, mutants, and parallel universes • Reveals the occult influences on the Nazis and introduces the alchemist Fulcanelli and the work of Charles Fort and Gurdjieff • Over Half a Million Copies Sold This groundbreaking, international bestseller, first published in 1960, couples profound insights into the hidden history of humanity and our perceptions of reality with the scientific evidence that supports the existence of paranormal activity, telepathy, and extraterrestrial communications. The first book to explore in depth the Nazi fascination with the occult, Pauwels and Bergier also broke new ground with their study of pyramidology, alchemy and its close kinship with atomic energy, and the possibility of a widespread mutation of humanity that would herald the dawn of a new age for the earth. Their study of secret societies, starting with the Rosicrucians, suggests that such changes are actively being pursued in the present day by a “conspiracy” of the most spiritually and intellectually advanced members of the human race. The Morning of the Magicians also explores the anomalous

events collected by Charles Fort, the work of Gurdjieff, and the history of the mysterious Fulcanelli, who was widely believed to have manufactured the philosopher's stone--which provided the Nazis the motive for mounting an intensive search for him during their occupation of Paris. Much more than a collection of strange facts defying conventional wisdom, this book remains a sophisticated philosophical exploration of repressed phenomena and hidden histories that asks its readers to look at reality with ever "awakened eyes."

Ise, Prototype of Japanese Architecture

This early work by Earl Derr Biggers was originally published in 1930 and we are now republishing it with a brand new introductory biography. "Charlie Chan Carries On" is the fifth novel in the Charlie Chan series. Inspector Duff, a Scotland Yard detective and friend of Chan's, first introduced in Behind That Curtain, is pursuing a murderer on an around-the-world voyage; so far, there have been murders in London, France, Italy and Japan. While his ship is docked in Honolulu, the detective is shot and wounded by his quarry; though he survives, he is unable to continue with the cruise, and Chan takes his place instead. Earl Derr Biggers was born on 26th August 1884 in Warren, Ohio, USA. Biggers received his further education at Harvard University, where he developed a reputation as a literary rebel, preferring the popular modern authors, such as Rudyard Kipling and Richard Harding Davis to the established figures of classical literature. Following in their footsteps upon

graduating, he himself began a career as a popular writer, penning humorous articles and reviews for the Boston Traveler. While on holiday in Hawaii, Biggers heard tales of a real-life Chinese detective operating in Honolulu, named Chang Apana. This inspired him to create his most enduring legacy in the character of super-sleuth Charlie Chan. The first Chan story “The House Without a Key” (1925) was published as a serialised story in the Saturday Evening Post and then released as a novel in the same year. Biggers went on to write five more Chan novels and all were licensed for movie adaptations by Fox Films. These films were hugely popular with several different actors taking the lead role of Chan. Eventually; over 40 films were produced featuring the character. Biggers only saw the early on-screen successes of Charlie Chan due to his death at the age of only 48 from a heart attack in April 1933.

This Italian reference grammar provides students, teachers and others interested in the Italian language with a comprehensive, accessible and jargon-free guide to the forms and structure of Italian. Whatever their level of knowledge of the language, learners of Italian will find this book indispensable: it gives clear and detailed explanations of everything from the most elementary facts such as the relation between spelling and pronunciation, or the forms of the article, to more advanced points such as the various nuances of the subjunctive. Formal or archaic

discourse is distinguished from informal, everyday usage, and regionalisms are also indicated where appropriate. The authors have taken care to make it an easy and illuminating reference tool: extensive cross-referencing enables readers to quickly find the information they require, and also stimulates them to discover new, related facts.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

The Animated Bestiary

A sparkling collection of Zadie Smith's nonfiction over the past decade. Zadie Smith brings to her essays all of the curiosity, intellectual rigor, and sharp humor that have attracted so many readers to her fiction, and the result is a collection

that is nothing short of extraordinary. Split into four sections—"Reading," "Being," "Seeing," and "Feeling"—*Changing My Mind* invites readers to witness the world from Zadie Smith's unique vantage. Smith casts her acute eye over material both personal and cultural, with wonderfully engaging essays—some published here for the first time—on diverse topics including literature, movies, going to the Oscars, British comedy, family, feminism, Obama, Katharine Hepburn, and Anna Magnani. In her investigations Smith also reveals much of herself. Her literary criticism shares the wealth of her experiences as a reader and exposes the tremendous influence diverse writers—E. M. Forster, Zora Neale Hurston, George Eliot, and others—have had on her writing life and her self-understanding. Smith also speaks directly to writers as a craftsman, offering precious practical lessons on process. Here and throughout, readers will learn of the wide-ranging experiences—in novels, travel, philosophy, politics, and beyond—that have nourished Smith's rich life of the mind. Her probing analysis offers tremendous food for thought, encouraging readers to attend to the slippery questions of identity, art, love, and vocation that so often go neglected. *Changing My Mind* announces Zadie Smith as one of our most important contemporary essayists, a writer with the rare ability to turn the world on its side with both fact and fiction. *Changing My Mind* is a gift to readers, writers, and all who want to look at life more expansively.

During the Cold War, it was in Europe that the conflict of a divided Germany reached a decisive turning point in the 1960s, leading to the era of détente. The Conference on Security and Cooperation in Europe (CSCE), with its Final Act in Helsinki in August 1975 that incorporated the non-aligned and neutral states in Europe, led to a rapprochement between East and West in the fields of security, economy, and culture. This volume offers a pilot study in what the authors perceive as the key issues: the “German problem” (i.e., the recognition of the post-war territorial status quo) and the western strategy of transformation through a

multiplication of contacts between the two blocs.

Cartoonists and animators have given animals human characteristics for so long that audiences are now accustomed to seeing Bugs Bunny singing opera and Mickey Mouse walking his dog Pluto. The *Animated Bestiary* critically evaluates the depiction of animals in cartoons and animation more generally. Paul Wells argues that artists use animals to engage with issues that would be more difficult to address directly because of political, religious, or social taboos. Consequently, and principally through anthropomorphism, animation uses animals to play out a performance of gender, sex and sexuality, racial and national traits, and shifting identity, often challenging how we think about ourselves. Wells draws on a wide range of examples, from the original King Kong to Nick Park's *Chicken Run* to Disney cartoons such as *Tarzan*, *The Jungle Book*, and *Brother Bear* to reflect on

people by looking at the ways in which they respond to animals in cartoons and films.

Helsinki 1975 and the Transformation of Europe

Harry Ferguson's contribution to agriculture was enormous. His Ferguson System took farm mechanisation a giant leap forward and was universally copied by other manufacturers. Indeed it remains a basic feature of tractor and implement design worldwide today. He was also an innovator in offering in addition to his tractor a complete range of implements designed specifically for it, from ploughs to post-hole borer, something no manufacturer had done before, and a strategy that greatly increased sales of Ferguson products. He really knew how to sell, and in addition he outdid all his competitors in the promotion and marketing of the Ferguson range. This book brings together a wide selection of Ferguson advertisements published in journals and magazines in both the UK and the USA, from the days of the Ferguson Brown tractor through the Ford Ferguson, TE20, TO20, TO30, TO35 and Ferguson FE35 to the Ferguson 40, the last of the line prior to the introduction of the Massey-Ferguson MF35. Implements and farm equipment made for Fergusons are also covered. Author John Farnworth is well known through his previous publications, and here he studies a subject that has a broad appeal to tractor enthusiasts and to the army of collectors of Ferguson memorabilia, while at the same time providing an overview of the life and times of the Ferguson brand.

The Girl from Vajont

For more than 120 years (1714–1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics,

monarchy and the public sphere, been so thoroughly investigated.

Historical Essay on the Neapolitan Revolution of 1799

Dramatic advances in genetics, cloning, robotics, and nanotechnology have given

rise to both hopes and fears about how technology might transform humanity. As the possibility of a posthuman future becomes increasingly likely, debates about how to interpret or shape this future abound. In Japan, anime and manga artists have for decades been imagining the contours of posthumanity, creating dazzling and sometimes disturbing works of art that envision a variety of human/nonhuman hybrids: biological/mechanical, human/animal, and human/monster. Anime and manga offer a constellation of posthuman prototypes whose hybrid natures require a shift in our perception of what it means to be human. *Limits of the Human*—the third volume in the *Mechademia* series—maps the terrain of posthumanity using manga and anime as guides and signposts to understand how to think about humanity's new potentialities and limits. Through a wide range of texts—the folklore-inspired monsters that populate Mizuki Shigeru's manga; Japan's Gothic Lolita subculture; Tezuka Osamu's original cyborg hero, Atom, and his manga version of Fritz Lang's *Metropolis* (along with Ôtomo Katsuhiro's 2001 anime film adaptation); the robot anime, *Gundam*; and the notion of the uncanny in *Ghost in the Shell 2: Innocence*, among others—the essays in this volume reject simple human/nonhuman dichotomies and instead encourage a provocative rethinking of the definitions of humanity along entirely unexpected frontiers.
