Proactive Policing

This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: □ Polyfunctional versus monofunctional dictionary tools □ Developing theories of lexicography for electronic mediums □ Distinguishing between the database and the dictionary □ Online dictionaries not as data repositories but as sophisticated search engines This volume will appeal to scholars in lexicography and to practicing lexicographers.

Investing in Cultural Diversity and Intercultural Dialogue

DK Essential Managers: Doing Business

Africa has witnessed massive changes in the last fifty years – from independence through structural adjustment, rule by

military juntas in several countries and to a period now where the focus is on how best to prioritize their needs based on resources, national goals and human potential. There is general agreement that human capital is important in economic growth and development. There is always the need to ensure that resources and human capital are used appropriately to advance development. Gender disparities, whether in treatment, access to resources, resource utilization and the law, may in themselves retard or slow down development. Resources and human potential in all societies include how best to ensure there is no gender disparity and to fully tap the resources inherent in women for personal, social and national development. Beginning with the women's suffrage movement, there has been the push to encourage gender equality worldwide. The Fourth World Conference on Women in Beijing in 1995 embodies the commitment of the international community to implement policies that will enhance the political, social, economic, educational empowerment of women. This book highlights the issues affecting women in Eastern and Southern Africa - what role does custom and patriarchy play in gender disparities in education, access to health, problems in the workplace and family relationships? How have women writers in the last twenty years presented the issues of patriarchy, women's rights, globalism and women's holistic development? What are recent developments that have helped improve the situation for some women? These are some of the issues that are covered in this book. The thesis of this book is that there have been policies and strategies developed that have worked to empower women. However, vestiges of sexism, gender disparities in several fields still remain and traditions/customs and patriarchy have aided in still keeping women down.

Tobacco Control in Africa

This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

This volume utilizes the work initiated and executed under a recent major public health initiative, the African Tobacco Situational Analyses (ATSA), which was sponsored by the Canadian government's International Development Research Centre (IDRC) with funds from the Bill and Melinda Gates Foundation. The program was conceived to illuminate the factors that will facilitate the reform of major public health policies, particularly, but not limited to, tobacco. The results, presented in this volume, are an important contribution to the literature on global public health and international development, and comprise the most comprehensive evidence-based analysis of tobacco policy in the African region.

Geography is more than just maps and finding your destination. It is about the land, the people on that land, the delicate balance of nature, and our very interdependence upon it, despite the miracles of technology and grocery stores. It's about the effects of nature on places and people, as well as how politics, borders, cities, and towns affect our lives. The Handy Geography Answer Book traces the history of geography from Eratosthenes and Alexander von Humboldt to latitude and longitude, and the latest advances in the Global Positioning System (GPS). It provides insights into economic, social, historic, culture, religious, political, and climate geography, plus oceanography, demographics, and more. Completely revised and updated, it tours the world, its natural features, and the ever-changing mark humans make on our planet, answering 1,200 questions from the trivia (longest, hottest, tallest) to how geography has influenced history, religion, architecture, and the location of cities, including Who first had the idea that there is a magnetic North Pole? What is interesting about Google's "Streetview"? How many people are projected to live on the planet in 2050? Which state has the highest annual divorce rate? What are the largest and smallest counties in the U.S.?

Tut, Tut #6

This book reconsiders the role of order and structure in syntax, focusing on fundamental issues such as word order and grammatical functions. The first group of papers in the collection asks what word order can tell us about syntactic structure, using evidence from V2, object shift, word order gaps and different kinds of movement. The second group of papers all address the issue of subjecthood in some way, and examine how certain subject properties vary across languages: expression of subjects, expletive subjects, quirky and locative subjects. All of the papers address in some way the tension between modelling what can vary across languages whilst improving our understanding of what might be universal to human language. This book is complemented by *Order and structure in syntax I: Word order and syntactic structure*

So why do we continue to administer this modern cod liver oil-or even demand a larger dose? Kohn's incisive analysis reveals how a set of misconceptions about learning and a misguided focus on competitiveness has left our kids with less free time, and our families with more conflict. Pointing to stories of parents who have fought back-and schools that have proved educational excellence is possible without homework-Kohn demonstrates how we can rethink what happens during and after school in order to rescue our families and our children's love of learning.

She made her way down the cliff, and on to the beach. At the edge of the waves, she stopped, shaking her wet paws. She knew that somewhere ahead was her person, but far, far away. She miaowed plaintively; stood staring at the moving blur of uncrossable sea. She led the way to safety, out of the blazing hell of blitzed Coventry. People touched her for luck; feared her as an omen of disaster. Wherever she went, she changed lives . . . From her beginning to her end she never wavered. She was the Blitzcat. The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

The picture on the front of this book is an illustration for Totakahini: The tale of the parrot, by Rabindranath Tagore, in which he satirized education as a magnificent golden cage. Opening the cage addresses mathematics education as a complex socio-political phenomenon, exploring the vast terrain that spans critique and politics. Opening the cage includes contributions from educators writing critically about mathematics education in diverse contexts. They demonstrate that mathematics education is politics, they investigate borderland positions, they address the nexus of mathematics, education, and power, and they explore educational possibilities. Mathematics education is not a free enterprise. It is carried on behind bars created by economic, political, and social demands. This cage might not be as magnificent as that in Tagore's fable. But it is strong. Opening the cage is a critical and political challenge, and we may be surprised to see what emerges.

This book provides an overview of theoretical, empirical, and clinical conceptualizations of mental health following exposure to human rights violations (HRV). There are currently hundreds of millions of individuals affected by war and conflict across the globe, and over 68 million people who are forcibly displaced. The field of refugee and post-conflict mental health is

growing exponentially, as researchers investigate the factors that impact on psychological disorders in these populations, and design and evaluate new treatments to reduce psychological distress. This volume will be a substantial contribution to the literature on mental health in refugee and post-conflict populations, as it details the state of the evidence regarding the mental health of war survivors living in areas of former conflict as well as refugees and asylum-seekers.

Mental Health of Refugee and Conflict-Affected Populations

Proactive policing, as a strategic approach used by police agencies to prevent crime, is a relatively new phenomenon in the

United States. It developed from a crisis in confidence in policing that began to emerge in the 1960s because of social unrest, rising crime rates, and growing skepticism regarding the effectiveness of standard approaches to policing. In response, beginning in the 1980s and 1990s, innovative police practices and policies that took a more proactive approach began to develop. This report uses the term "proactive policing" to refer to all policing strategies that have as one of their goals the prevention or reduction of crime and disorder and that are not reactive in terms of focusing primarily on uncovering ongoing crime or on investigating or responding to crimes once they have occurred. Proactive policing is distinguished from the everyday decisions of police officers to be proactive in specific situations and instead refers to a strategic decision by police agencies to use proactive police responses in a programmatic way to reduce crime. Today, proactive policing strategies are used widely in the United States. They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread across the landscape of policing. Proactive Policing reviews the evidence and discusses the data and methodological gaps on: (1) the effects of different forms of proactive policing on crime; (2) whether they are applied in a discriminatory manner; (3) whether they are being used in a legal fashion; and (4) community reaction. This report offers a comprehensive evaluation of proactive policing that includes not only its crime prevention impacts but also its broader implications for justice and U.S. communities.

Management and Cost Accounting

This volume is a collection of research cases illustrating the interrelationships among education, dominance and identity in historical- and contemporary contexts. The cases reflect particular ways in which local-, group, and indigenous identities have been affected by a dominant discourse, how education can support or undermine identity, and how languages (including dominant and sub-dominant languages) and the language of instruction in schools are at the centre of challenges to hegemony and domination in many situations. Examining the issues in their research, the contributors reveal how members of minority-, disadvantaged-, or dominated groups (and the teachers and parents of children in their schools) struggle for recognition, for education in their own language, for acceptance within larger society, or for recognition of the validity of their responses to reform initiatives and policies that address a wider agenda but that fail to take into account key factors such as perceptions and subaltern status. Collectively, the chapters document research employing a variety of methodological approaches and theoretical perspectives, illustrating an array of universal and global issues in the field of comparative and international education. However, each of the cases its own unique character, as research findings and as personal reflections based on the authors' experiential knowledge in particular social, cultural and political contexts. The contexts and regional settings include Chile, Canada, the United States, Hungary and elsewhere in East-Central Europe, France, Germany, Spain, Malaysia, Tanzania, South Africa, Cyprus, Tunisia, Egypt, Iran and elsewhere in the Middle East.

It will include screenshots to show examples of good and poor interfaces; examples of case studies in speech processing tasks, going through the task creation process, reviewing options in the interface, in the choice of medium (MTurk or other) and explaining choices, etc. Provides an insightful and practical introduction to crowdsourcing as a means of rapidly processing speech data. Addresses important aspects of this new technique that should be mastered before attempting a crowdsourcing application. Offers speech researchers the hope that they can spend much less time dealing with the data gathering/annotation bottleneck, leaving them to focus on the scientific issues. Readers will directly benefit from the book's successful examples of how crowdsourcing was implemented for speech processing, discussions of interface and processing choices that worked and choices that didn't, and guidelines on how to play and record speech over the internet, how to design tasks, and how to assess workers. Essential reading for researchers and practitioners in speech research groups involved in speech processing

Welcome to Our Hillbrow is an exhilarating and disturbing ride through the chaotic and hyper-real zone of Hillbrow—microcosm of all that is contradictory, alluring, and painful in the postapartheid South African psyche. Everything is there: the shattered dreams of youth, sexuality and its unpredictable costs, AIDS, xenophobia, suicide, the omnipotent violence that often cuts short the promise of young people's lives, and the Africanist understanding of the life continuum that does not end with death but flows on into an ancestral realm. Infused with the rhythms of the inner-city

pulsebeat, this courageous novel is compelling in its honesty and its broad vision, which links Hillbrow, rural Tiragalong, and Oxford. It spills out the guts of Hillbrow—living with the same energy and intimate knowledge with which the Drum writers wrote Sophiatown into being.
