The best of WonderScience

Computer Integrated Instruction Inservice Notebook

Over 300 hands-on science activities for elementary school-aged children are brilliantly described and illustrated in four-color throughout the text. All WONDERSCIENCE activities are preceded with handy Teacher Tips and reference material unifying each activity to National Science Education Standards.

Proceedings of the Blended Learning in Science, Teaching and Learning Symposium

Australian National Bibliography

Making Sense of Statistical Studies consists of 15 hands-on investigations that provide students with valuable experience in designing and analyzing

Measurement in the Middle Grades

Designed for preservice teachers, this text consolidates social studies content into a framework for practical instruction and lesson planning. It places social studies in a thoroughly modern context and explores how such factors as language diversity and standards²at the local, state, and national level²affect teachers. The text retains its hallmark features, such as model unit lessons, teacher-tested activities, technology updates, and authentic children's work, and the Resource Handbook serves as a valuable tool for on-the-job use. The emphasis on current topics includes coverage of constructivist learning,

21st Century continues to help teachers let the secret out-to open up to their students the wonderful discoveries and challenges of the pattern-making and problem-solving aspects of a fascinating subject: mathematics. The rationale remains the same-to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students. Changing demographics, knowledge of how people learn, and technology all impact the way we educate our young people. This edition incorporates lessons and strategies from programs that have proven success in many types of classrooms. Many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts. Although technology is constantly being upgraded, ways to increase student motivation through its application remains a goal. For example--since applets can enhance a lesson whether the teacher uses a computer projector, a "smart" board, or has students work individually on computers--we have identified several sources of mathematics applets that can be correlated to various lessons. Research citations and summaries have been updated to reflect current information on teaching and learning. For future teachers.

Making Sense of Statistical Studies

The purpose of this notebook is to assist educators who are designing and implementing inservice education programs to facilitate the effective use of computer integrated instruction (CII) in schools. It is divided into the following five sections: (1) Effective Inservice (a brief summary of inservice literature focused on inservice dimensions and design principles); (2) Background Information (an overview of computers in education and a discussion of the roles of computers in problem solving); (3) Initiating/Planning an Inservice (suggestions for preliminary planning and activities and a sample timeline for those activities); (4) An Eight-Session Social Studies Inservice (2-hour sessions cover an introduction to databases, database management systems, making your own database, an introduction to computer simulations, another simulation, teacher productivity tools, graphing to represent data, and problem solving, telecommunications, and closure); and (5) Instruments and Evaluation (a variety of

instruments for needs assessment, formative evaluation, and summative evaluation). Each 2-hour science inservice session contains some or all of the following: narrative overview, script (topics, objectives, materials, activities), timeline, handouts, and readings. References are listed throughout the notebook and a software bibliography is included in section 4. (DB)

Informal Learning and Field Trips

Index to Media and Materials for the Mentally Retarded, Specific Learning Disabled, Emotionally Disturbed

Presents proceedings of the annual Uniserve Conference. The papers contained in this book includes topics as: teaching science online tutorial benefits of online assignments, blended learning, and other related issues in relation to teaching science at a university level.

Data: Kids, Cats, and Ads

The author shows teachers how to incorporate constructivist philosophy and inquiry-based learning techniques for standards-aligned, off-site learning experiences and provides guidelines for developing corresponding classroom activities.
