A Life Apart

Annotation Human Development Network Series. As the new millennium approaches, Education will determine who has the keys to the treasures the world can furnish. This is particularly important for the poor, who have to rely on their human capital as the main, if not the only, means of escaping poverty. In this way, new challenges and opportunities arise for education. Immense progress has been achieved in education in the last 50 years. However, immense challenges still remain. This report lays out the vision for education and the ambitious international goals to which the Bank subscribes. It notes the progress so far and the gaps that remain. It describes the rich group of partners associated with the

educational endeavor and how the Bank's role has evolved. It conveys the Bank's global priorities and programs to help countries progress toward the international education goals and improve the quality of teaching and learning. It illustrates the processes and operating principles that will help Bank staff contribute more effectively to better educational outcomes in each client country and to monitor success in implementing this strategy. Also available in French (Stock no. 14632) and Spanish (Stock no. 14633).

Maggie for Hire

1884—Deep in the Sudanese deserts a crazed religious fanatic spawns violent bloodshed. In Victorian England Edward and Richard are twins, with a blessed life, enjoying their elite private school for boys, and with prospects of army commissions ahead. But then a woman's greed tears them apart and destroys their comfortable world. Even though their love is forbidden, for Edward there is no other in his life but Richard, and for Richard a life without Edward is unbearable. Has fate determined that they must lead their lives apart? As members of the British force engaged in a doomed bid to save heroic Gordon of Khartoum, besieged by the frenzied armies of the Mahdi, Edward and Richard, cruelly separated by events, and ignorant of the other's presence, are thrown into their own desperate adventures as the conflict rages on around them... One an officer, the other a lowly cavalry trumpeter, both find Muslim allies willing to risk all to see them through... Two lovers far from each other in a hostile world of enervating heat, unforgiving sand, rocky wastes, but also burning passions—will the young men overcome the ordeal of a life apart to achieve their dream of a destiny together?

WRITING WITH A THESIS: A RHETORIC AND READER is based on the persuasive principle—the development and support of a thesis in order to persuade a reader, which is exactly the skill beginning writers in freshman composition just like you need to develop. The book dispenses clear and practical writing advice in a clear and practical way. Leavened with lots of good humor—in both its advice and in its examples of good professional writing—WRITING WITH A THESIS is renowned for being useful and enjoyable to read. Nineteen of the book's 50 professional essays are new to this edition and 3 of 10 student essays are also new, providing fresh

voices, variety, and relevance. Almost all of the essays are short and easy to read so that class time can be devoted not to what the readings mean, but to what they mean for your writing. Students receive the most up-to-date information on MLA documentation with the enclosed tri-fold card providing NEW 2009 MLA Handbook formats.

A new India is visibly emerging from within the folds of its many pasts. This new India needs to be seen with new eyes, free from the baggage of yesterdays characterizations. This is exactly what Santosh Desai, one of Indias best-known social commentators, does in this warm, affectionate and deliciously witty look at the changing urban Indian middle class. Writing as an insider, from personal experience, Desai cuts through the chaos and confusion of everyday India both yesterday and today, and suddenly, makes us see things clearly. Holding a mirror to our inner selves, Desai makes us see what drives us, what makes us tick, what makes our hearts beat, and how our mindsets and attitudes are changing, even as the past never quite leaves us. And Desai does so in short masterful essays, written with great humour and sensitivity. A big book about small things that truly matter.

First published in 1976, this play from one of Africa's foremost dramatists is in the classic cannon. It is an incisive examination of the problems of independence and freedom in post-colonial Africa states, where few believe they have a stake in the future. In the words of one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future". Francis Imbuga is a playwright and actor. He is the recipient of the Kenya National Academy of Sciences Distinguished Professional Award in Play Writing.

This book on linear algebra and geometry is based on a course given by renowned academician I.R. Shafarevich at Moscow State University. The book begins with the theory of linear algebraic equations and the basic elements of matrix theory and continues with vector spaces, linear transformations, inner product spaces, and the theory of affine and projective spaces. The book also includes some subjects that are naturally related to linear algebra but are usually not covered in such courses: exterior algebras, non-Euclidean geometry, topological properties of projective spaces, theory of quadrics (in affine and projective spaces), decomposition of finite abelian groups, and finitely generated periodic modules (similar to Jordan normal forms of linear operators). Mathematical reasoning, theorems, and concepts are illustrated with numerous examples from various fields of mathematics, including differential equations and differential geometry, as well as from mechanics and physics.

Small Business Management

"A poignant expression of the durability, grace, and potential of the human spirit" set in a post-nuclear dystopia where words are worth killing for (Jean M. Auel, author of the Earth's Children series). By the late twenty-first century, civilization has nearly been destroyed by overpopulation, economic chaos, horrific disease, and a global war that brought a devastating nuclear winter. On the Oregon coast, two women—writer Mary Hope and painter Rachel Morrow—embark on an audacious project to help save future generations: the preservation of books, both their own and any they can find at nearby abandoned houses. For years, they labor in solitude. Then they encounter a young man who comes from a group of survivors in the South. They call their community the Ark. Rachel and Mary see the possibility of civilization rising again. But they realize with trepidation that the Arkites believe in only one book—the Judeo-Christian bible—and regard all other books as blasphemous. And those who go against the word of God must be cleansed from the Earth . . . In this "thought-provoking" novel of humanity, hope, and horror, M.K. Wren displays "her passionate concern with what gives life meaning (Library Journal).

Writing with a Thesis (with 2009 MLA Update Card)

For the last forty years, two claims have been at the core of disputes about scientific change: that scientists reason rationally and that science is progressive. For most of this time discussions were polarized between philosophers, who defended traditional Enlightenment ideas about rationality and progress, and sociologists, who espoused relativism and constructivism. Recently, creative new ideas going beyond the polarized positions have come from the history of science, feminist criticism of science, psychology of science, and anthropology of science. Addressing the traditional arguments as well as building on these new ideas, Miriam Solomon constructs a new epistemology of science. After discussions of the nature of empirical success and its relation to truth, Solomon offers a new, social account of scientific rationality. She shows that the pursuit of empirical success and truth can be consistent with both dissent and consensus, and that the distinction between dissent and consensus is of little epistemic significance. In building this social epistemology of science, she shows that scientific communities are not merely the locus of distributed expert knowledge and a resource for criticism but also the site of distributed decision making. Throughout, she illustrates her ideas with case studies from late-nineteenth- and twentieth-century physical and life sciences. Replacing the traditional focus on methods and heuristics to be applied by individual scientists, Solomon emphasizes science funding, administration, and policy. One of her goals is to have a positive influence on scientific decision making through practical social recommendations.
