Model Rules of Professional Conduct

'International Criminal Procedure, edited by two insiders to international criminal proceedings, Professor Linda Carter and Professor Fausto Pocar, a judge at the ICTY and a former President of this Tribunal, is a coherently organized, well-researched, very informative and not the least elegantly-written contribution to a young and rapidly developing legal sub-discipline. The book provides its reader with a highly accessible and up-to date introduction into key elements of international criminal procedure as well as with critical commentary and rich inspiration for improvements of current practices.' - Claus Kreß LL.M. (Cantab.), University of Cologne, Germany and Institute for International Peace and Security Law
'This book addresses compelling issues that have come before international criminal tribunals. They include the self-representation of accused persons,

plea bargaining and victim participation. It usefully approaches all of the issues and problems from a comparative law perspective. This excellent and accessible work is essential reading for practitioners, faculty and students of international criminal law.' - Richard Goldstone, Retired Justice of the Constitutional Court of South Africa and for Chief Prosecutor of the United Nations International Criminal Tribunals for the former Yugoslavia and Rwanda The emergence of international criminal courts, beginning with the International Criminal Tribunal for the former Yugoslavia and including the International Criminal Court, has also brought an evolving international criminal procedure. In this book, the authors examine selected issues that reflect a blending of, or choice between, civil law and common law models of procedure. The issues include background on civil law and common law legal systems; plea bargaining; witness proofing; written and oral evidence; self-representation and the use of assigned, standby, and amicus counsel; the role of victims; and the right to appeal. International Criminal Procedure will appeal to academics, students, researchers, lawyers and judges working in the field of international criminal law.

FBIS Report

Litigating disputes in international civil and commercial cases presents a number of special challenges. Which country's courts have jurisdiction, and where is it advantageous to sue? Given the international elements of the case, which country's law will the court apply? Finally, if a successful plaintiff cannot find enough local assets, what does it take to have the judgment recognized and enforced in a country with assets? Advanced Introduction to Private International Law and Procedure addresses these questions through a comparative overview of legal systems, contrasting Anglo-American common law and the civil law approach of the European Union.

Selected Fundamentals of Immigration Law and Practice

Report of the United States High Commissioner, Civil Affairs, Austria

Pursuing Citizenship in the Enforcement Era provides readers with the everyday perspectives of immigrants on what it is like to try to integrate into American society during a time when immigration policy is focused on enforcement and exclusion. The law says that everyone who is not a citizen is an alien. But the social reality is more complicated. Ming Hsu Chen argues that the citizen/alien binary should instead be reframed as a spectrum of citizenship, a concept that emphasizes continuities between the otherwise distinct experiences of membership and belonging for immigrants seeking to become citizens. To understand citizenship from the perspective of noncitizens, this book utilizes interviews with more than one-hundred immigrants of varying legal statuses about their attempts to integrate economically, socially, politically, and legally during a modern era of intense immigration enforcement.

Studying the experiences of green card holders, refugees, military service members, temporary workers, international students, and undocumented immigrants uncovers the common plight that underlies their distinctions: limited legal status breeds a sense of citizenship insecurity for all immigrants that inhibits their full integration into society. Bringing together theories of citizenship with empirical data on integration and analysis of contemporary policy, Chen builds a case that formal citizenship status matters more than ever during times of enforcement and argues for constructing pathways to citizenship that enhance both formal and substantive equality of immigrants.

Conceptualising Property Law offers a transsystemic and integrated approach to common law and civil law property. Property law has traditionally been excluded from comparative law analysis, common law and civil law property being deemed irreconcilable. With this book, Ya'll Emerich aims to dispel the myth that comparison between these two systems of property is impossible. By establishing a dialogue between common law and civil law property, it becomes clear that the two legal traditions share common ground in the way that they address legal, cultural, and social issues related to property and wealth.

political system shocks. Therefore this book is exceptionally rich and stimulating.' Geert Bouckaert, Katholieke Universiteit Leuven, Belgium While there is no universally accepted definition of civil servant and civil service, this authoritative and informative Handbook compares and contrasts various approaches to organising the structure and activities of different civil service systems. Underpinning theories and frameworks provide a disciplinary perspective from which to explore recurring topics and themes, and international comparisons are made via case studies from Africa, Asia, Australasia, Europe, and North and South America. The expert contributors consider the historical and theoretical context of public administration and public sector management, encompassing issues such as the Weberian legacy, joined-up government and the hollowed-out state thesis. The debate between Anglo-American influenced systems versus the continental European approach to organising the civil service is also addressed.

changes in the civil service with other changes in governing.' - B. Guy Peters, University of Pittsburgh, US Civil services in Western liberal democracies have undergone significant changes since the early 1980s, so much so that many of the traditional assumptions underpinning their role and operating practices have been fundamentally questioned. This volume explores a number of themes inherent in this transformation process and the significant problems encountered in modernizing civil services.
