LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.

Boys' Life

In 2007 English Heritage commissioned initial research into links with transatlantic slavery or its abolition amongst families who owned properties now in its care. This was part of the commitment by English Heritage to commemorate the bicentenary of the abolition of the British transatlantic slave trade with work that would make a real difference to our understanding of the historic environment in the longer term. The research findings and those of other scholars and heritage practitioners were presented at the 'Slavery and the British Country House' conference which brought together academics, heritage professionals, country house owners and community researchers from across Britain to explore how country houses might be reconsidered in the light of their slavery linkages and how such links have been and might be presented to visitors. Since then the conference papers have been updated and reworked into a cutting edge volume which represents the most current and comprehensive consideration of slavery and the British country house as yet undertaken.

Eclipses have long been seen as important celestial phenomena, whether as omens affecting the future of kingdoms, or as useful astronomical events to help in deriving essential parameters for theories of the motion of the moon and sun. This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope. In addition to cataloguing and assessing the accuracy of the various records, which come from regions as diverse as Ancient Mesopotamia, China, and Europe, the sources in which they are found are described in detail. Related questions such as what type of clocks were used to time the observations, how the eclipse predictions were made, and how these prediction schemes were derived from the available observations are also considered. The results of this investigation have important consequences for how we understand the relationship between observation and theory in early science and the role of astronomy in early cultures, and will be of interest to historians of science, astronomers, and ancient and medieval historians.

A Good Boat Speaks for Itself

Life

What happens when a Korean-American preacher's kid refuses to get married, travels the world, and quits being vegetarian? She meets her polar opposite on an online dating site while sitting at a café in Paris, France and ends up in Paris, Maine, learning how to hunt. A memoir and a cookbook with recipes that skewer human foibles and celebrates DIY food culture, *Deer Hunting in Paris* is an unexpectedly funny exploration of a vanishing way of life in a complex cosmopolitan world. Sneezing madly from hay fever, Lee recovers her roots in rural Maine by running after a headless chicken, learning how to sight in a rifle, shooting skeet, and butchering animals. Along the way, she figures out how to keep her boyfriend's conservative Republican family from "mistaking" her for a deer and shooting her at the clothesline.

Death Traps

The Civil War changed the United States in many ways—economic, political, and social. Of these changes, none was more important than Emancipation. Besides freeing nearly four million slaves, it brought agricultural wage labor to a reluctant

South and gave a vote to black adult males in the former slave states. It also offered former slaves new opportunities in education, property ownership—and military service. From late 1862 to the spring of 1865, as the Civil War raged on, the federal government accepted more than 180,000 black men as soldiers, something it had never done before on such a scale. Known collectively as the United States Colored Troops and organized in segregated regiments led by white officers, some of these soldiers guarded army posts along major rivers; others fought Confederate raiders to protect Union supply trains, and still others took part in major operations like the Siege of Petersburg and the Battle of Nashville. After the war, many of the black regiments took up posts in the former Confederacy to enforce federal Reconstruction policy. *Freedom by the Sword* tells the story of these soldiers' recruitment, organization, and service. Thanks to its broad focus on every theater of the war and its concentration on what black soldiers actually contributed to Union victory, this volume stands alone among histories of the U.S. Colored Troops.

Germans in Minnesota

'from time to time a study comes along that truly can be called 'path breaking,' 'seminal,' 'essential,' a 'must read.' *How the Irish Became White* is such a study.' John Bracey, W.E.B. Du Bois Department of Afro-American Studies, University of Massachusetts, Amherst The Irish came to America in the eighteenth century, fleeing a homeland under foreign occupation and a caste system that regarded them as the lowest form of humanity. In the new country – a land of opportunity – they found a very different form of social hierarchy, one that was based on the color of a person's skin. Noel Ignatiev's 1995 book – the first published work of one of America's leading and most controversial historians – tells the story of how the

oppressed became the oppressors; how the new Irish immigrants achieved acceptance among an initially hostile population only by proving that they could be more brutal in their oppression of African Americans than the nativists. This is the story of How the Irish Became White.

Observations and Predictions of Eclipse Times by Early Astronomers

Now an HBO® Film starring Oprah Winfrey and Rose Byrne #1 NEW YORK TIMES BESTSELLER Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor black tobacco farmer whose cells—taken without her knowledge in 1951—became one of the most important tools in medicine, vital for developing the polio vaccine, cloning, gene mapping, and more. Henrietta's cells have been bought and sold by the billions, yet she remains virtually unknown, and her family can't afford health insurance. This phenomenal New York Times bestseller tells a riveting story of the collision between ethics, race, and medicine; of scientific discovery and faith healing; and of a daughter consumed with questions about the mother she never knew.

Popular Mechanics

“Cooper saw more of the war than most junior officers, and he writes about it better than almost anyone. . . . His stories are vivid, enlightening, full of life—and of pain, sorrow, horror, and triumph.” —STEPHEN E. AMBROSE From his Foreword “In a down-to-earth style, *Death Traps* tells the compelling story of one man’s assignment to the famous 3rd Armored Division that spearheaded the American advance from Normandy into Germany. Cooper served as an ordnance officer with the forward elements and was responsible for coordinating the recovery and repair of damaged American tanks. This was a dangerous job that often required him to travel alone through enemy territory, and the author recalls his service with pride, downplaying his role in the vast effort that kept the American forces well equipped and supplied. . . . [Readers] will be left with an indelible impression of the importance of the support troops and how dependent combat forces were on them.” —Library Journal “[DEATH TRAPS] FILLS A CRITICAL GAP IN WW2 LITERATURE. . . . IT’S A TRULY UNIQUE AND VALUABLE WORK.” —G.I. Journal From the Paperback edition.

LIFE

A concise history of Germans in Minesota including immigration pattern, the Catholic and Lutheran churches, cultural

organizations, business and politics especially in the World War 1 year. Minnesota is often associated with its Scandinavian heritage, but in fact Germans are the largest single immigrant group in Minnesota history and were the largest ancestry group in the 2000 census. Author Kathleen Neils Conzen tells the story of German Americans and their profound influence on Minnesota history and culture. Conzen recounts their triumphs and struggles over the last 150 years in a clear and concise narrative. Landing in poverty, Germans transformed acres of wilderness into productive farms and brought to America their love of art, music and sociability. Immigrants came to America intent on creating in the words of one agent, "an earthly paradise of this Minnesota "and" a new Germany" soon rose in Stearns Country. Conzen explores not only the well known enclaves in Brown and Stearns Countries but also looks at the smaller communities of Winona, on the Iron Range, and along the North Shore, as well as in the Twin Cities. In recent times, a renewed interest in German heritage can be seen in towns like New Ulm, home to the thirty-two-foot statue of Hermann the German, hero of the wars against the ancient Roman legions, and Heritagefest, the ethnic heritage festival that occurs every summer. Germans in Minnesota is the fifth book in The People of Minnesota, a new series dedicated to telling the history of the state through the stories of its ethnic groups in accessible and illustrated paperbacks. Future volumes include Chinese in Minnesota (due Fall 2003), Mexicans in Minnesota (due Spring 2004), Swedes in Minnesota (due Spring 2004), Poles in Minnesota (due Fall 2004), Ojibwe in Minnesota, Dakota in Minnesota, and Hmong in Minnesota.

Dedicated to the Sailors and Marines who lost their lives on the final voyage of USS Indianapolis and to those who survived

the torment at sea following its sinking. plus the crews that risked their lives in rescue ships. The USS Indianapolis (CA-35) was a decorated World War II warship that is primarily remembered for her worst 15 minutes. . This ship earned ten (10) battle stars for her service in World War II and was credited for shooting down nine (9) enemy planes. However, this fame was overshadowed by the first 15 minutes July 30, 1945, when she was struck by two (2) torpedoes from Japanese submarine I-58 and sent to the bottom of the Philippine Sea. The sinking of Indianapolis and the loss of 880 crew out of 1,196 --most deaths occurring in the 4-5 day wait for a rescue delayed --is a tragedy in U.S. naval history. This historical reference showcases primary source documents to tell the story of Indianapolis, the history of this tragedy from the U.S. Navy perspective. It recounts the sinking, rescue efforts, follow-up investigations, aftermath and continuing communications efforts. Included are deck logs to better understand the ship location when she sunk and testimony of survivors and participants. For additional historical publications produced by the U.S. Naval History and Heritage Command, please check out these resources here: <https://bookstore.gpo.gov/agency/naval-history-heritage-command> Year 2016 marked the 71st anniversary of the sinking and another spike in public attention on the loss -- including a big screen adaptation of the story, talk of future films, documentaries, and planned expeditions to locate the wreckage of the warship.

Boys' Life

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Slavery and the British Country House

Beginning with Charlie Chaplin's *Shoulder Arms*, released in America near the end of World War I, the military comedy film has been one of Hollywood's most durable genres. This generously illustrated history examines over 225 Army, Navy and Marine-related comedies produced between 1918 and 2009, including the abundance of laughspinnners released during World War II in the wake of Abbott and Costello's phenomenally successful *Buck Privates* (1941), and the many lighthearted service films of the immediate postwar era, among them *Mister Roberts* (1955) and *No Time for Sergeants* (1958). Also included are discussions of such subgenres as silent films (*The General*), military-academy farces (*Brother Rat*), women in uniform (*Private Benjamin*), misfits making good (*Stripes*), anti-war comedies (*MASH*), and fact-based films (*The Men Who Stare at Goats*). A closing filmography is included in this richly detailed volume.
