Strategies for Teaching Mathematics

Enhance mathematics instruction and build students understanding of mathematical concepts with this exceptional resource notebook. Choose from a wide range of easy-to-implement strategies that enhance mathematical content. Topics include developing students mathematical vocabulary and problem-solving

abilities, assessing students mathematics thinking, and using manipulatives. Highlights include tips on planning instruction and managing the mathematics classroom, plus differentiation strategies for each lesson. Includes Teacher Resource CD with reproducibles including rubrics and assessment materials. 296pp.

Canal Record, Published Weekly Under Authority and Supervision of Isthmian Canal Commission

Effective Police Supervision, 9th ed., is a time-tested text providing complete coverage of the organizational dynamics surrounding leadership of teams in an effective police department. This revised edition provides readers with the tools to excel and advance with up-to-date and timely scholarly research and legal case law on supervision. Special attention is given to recruitment, selection, and retention of police, commonly believed to be the most challenging internal issue facing agencies today. Supervisory tactics are evaluated in terms of how they work not only in the United States but in the United Kingdom and Canada as well, and chapters are enhanced with boxed features that help the reader connect ideas with realistic situations. Combining behavioral theory and updated case studies, Effective Police Supervision is the preferred textbook for college-level classes on police supervision and is an essential resource for preparation for promotional exams and career development for law enforcement officers and supervisors. Information has been included to respond to current issues facing law enforcement with Covid-19 and managing protests.

Management and Supervision of Social Workers

Supervision is the marketing leading text because of its focus on practical skills. The text and supplements are organized around the learning objectives to create a comprehensive teaching and testing system--an integrated learning system. Three skills applications are also included at the end of each chapter.

Administration and Supervision in the Box Elder School District

Yearbook

Teams, groups, and task forces in law enforcement agencies are becoming progressively more significant as a greater number of agencies have gained experience with their use. The goal of this text is to bring to reality the importance of teams to police managers, operational personnel, and members of the community. Learning objectives appear at the beginning of each chapter that will allow the reader to grasp the complexity and intricacy of these teams. The book contains helpful information to gain essential knowledge about groups in an organization with emphasis on teams, groups, and task forces in law enforcement.

This is followed by a chapter on leadership and the leader, including the leadership continuum concept. Of special interest are chapters that address commitment, accountability, and team performance which serve as a basis for the behavioral and social skills needed to integrate and foster the creation of a real team. This is the glue that holds the team together and guides it in such a way that tasks are accomplished, which is an essential ingredient of human resource management. Other topics include professional growth, developmental skills techniques, emphatic team communication, motivation and inspiring team members, the operating environment, logic models and problem solving for teams, and the application of the principles of assessment. In addition, the questions/discussion at the end of each chapter provides a concise and up-to-date integration of the chapter content and brings together a practical and operational approach that is clearly useful and informative. Law enforcement professionals, policymakers, investigators and the general public will find the book to be a significant resource in the development of teams, groups, and task forces.

American Book Publishing Record

Supervision: Concepts and Practices of Management

This thorough and practical guide to teaching mathematics for grades K-6 is a perfect combination of a math methods text and resource book for pre-service and in-service elementary school teachers. The text's organization uses the Common Core State Standards as its overarching framework. Over 275 lesson activities reinforce the standards and include many examples of cooperative learning strategies, take-home activities, and activities using technology such as apps. Content chapters first develop a math topic, and then extend the same topic, providing foundational material that can be used throughout the elementary grades. Other useful features highlight misconceptions often held about math operations and concepts, ways to be inclusive of various cultural backgrounds, and key technology resources. The Rivers Flow on

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing*. Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Differentiate yourself in a competitive marketplace with *SUPERVISION: CONCEPTS AND PRACTICES OF MANAGEMENT*, 13E. A blend of traditional management concepts and emerging insights, the text draws from the authors' firsthand business experience to deliver the leadership skills hiring managers want but rarely find in new recruits. This comprehensive single source for supervisory management expertise addresses the most critical challenges in business today, including globalization, economic turbulence, transitional and temporary workers, virtual employees, technology, outsourcing, and downsizing. Hands-on and practical, the text complements chapter readings with skill-building techniques and captivating video cases from well-known organizations, letting you experience supervisory roles yourself. Special attention to diversity and ethics also helps you develop a better sense of life beyond the classroom and enhances the text's extensive coverage of communication, decision making, conflict resolution, and other essential supervisory skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Municipal Journal

The unique focus of this book is its dual focus on management and supervision. The book offers a critical analysis of the contemporary debates related to issues

and the challenges peculiar to social work management and supervision of social workers. Social welfare policy changes in South Africa in the past two decades, have had a radical impact on social work and affected all involved in social development. This has resulted in a requirement for increased accountability, improved quality and efficiency of service delivery. The book critically addresses both the management and supervision of social workers within a social development paradigm. It draws on South African and African practice examples as well as relevant research, but may also apply to other contexts and social service professions. Comprehensive, detailed, sound theoretical and conceptual frameworks are all essential in management and supervision in social work, as reflected in this exciting new book.
