New UK GAAP Supplement 2016 complements our existing publication, EY's New UK GAAP 2015 and provides a comprehensive guide to the changes made to the new UK accounting standards since August 2014, particularly: The amendments to FRSs 100, 101 and 102 published in July 2015, which include the ability to use IFRS-style primary financial statements; The new accounting regime for Small Entities using FRS 102; and FRS 104 - Interim Financial Reporting New UK GAAP 2015 and the New UK GAAP Supplement 2016 are an essential tool for anyone applying, interpreting, regulating, studying or teaching the new accounting standards. Written by financial reporting professionals from the Financial Reporting Group of EY, this book provides a clear explanation of the recent changes to the new accounting standards, most of which are mandatory for periods beginning on or after 1 January 2016, as well as the new requirements for Small Entities and those preparing interim financial statements, and will prove invaluable in implementing these new requirements. It also addresses the related UK Companies Act and relevant statutory instrument changes, as well as providing practical worked examples. Also available is International GAAP® 2016 - a three volume comprehensive guide to interpreting and implementing IFRS, setting IFRS in a relevant business context and providing insights into how complex practical issues should be resolved in the real world of global financial reporting.

A pronounced move from print subscriptions to electronic resources in all types of libraries has fundamentally impacted the library and its users. With the influx of resources such as e-journals; e-books; index, abstract, and/or full-text databases; aggregated databases; and others, the shift to electronic resources is rapidly changing library operational and organizational procedures. *Electronic Resource Management in Libraries: Research and Practice* provides comprehensive coverage of the issues, methods, theories, and challenges connected with the provision of electronic resources in libraries, with emphasis on strategic planning, operational guidelines, and practices. This book primarily focuses on management practices of the life-cycle of commercially acquired electronic resources from selection and ordering to cataloging, Web presentation, user support, usage evaluation, and more.

Perhaps more than anywhere else in the world, the nineteenth century encounter between East Asia and the Western world has been narrated as a legal encounter. Commercial treaties--negotiated by diplomats and focused on trade--framed the

relationships among Tokugawa-Meiji Japan, Qing China, Choson Korea, and Western countries including Britain, France, and the United States. These treaties created a new legal order, very different than the colonial relationships that the West forged with other parts of the globe, which developed in dialogue with local precedents, local understandings of power, and local institutions. They established the rules by which foreign sojourners worked in East Asia, granting them near complete immunity from local laws and jurisdiction. The laws of extraterritoriality looked similar on paper but had very different trajectories in different East Asian countries. P?r Cassel's first book explores extraterritoriality and the ways in which Western power operated in Japan and China from the 1820s to the 1920s. In Japan, the treaties established in the 1850s were abolished after drastic regime change a decade later and replaced by European-style reciprocal agreements by the turn of the century. In China, extraterritoriality stood for a hundred years, with treaties governing nearly one hundred treaty ports, extensive Christian missionary activity, foreign controlled railroads and mines, and other foreign interests, and of such complexity that even international lawyers couldn't easily interpret them. Extraterritoriality provided the springboard for foreign domination and has left Asia with a legacy of suspicion towards international law and organizations. The issue of unequal treaties has had a lasting effect on relations between East Asia and the West. Drawing on primary sources in Chinese, Japanese, Manchu, and several European languages, Cassel has written the first book to deal with exterritoriality in Sino-Japanese relations before 1895 and the triangular

sermon that had been delivered by the rabbi of a prominent local congregation over the holiday of Passover. In it, he said, “The truth is that virtually every modern archeologist who has investigated the story of the exodus, with very few exceptions, agrees that the way the Bible describes the exodus is not the way it happened, if it happened at all.” This seeming challenge to the biblical story captivated the local public. Yet as the rabbi himself acknowledged, his sermon contained nothing new. The theories that he described had been common knowledge among biblical scholars for over thirty years, though few people outside of the profession know their relevance. New understandings concerning the Bible have not filtered down beyond specialists in university settings. There is a need to communicate this research to a wider public of students and educated readers outside of the academy. This volume seeks to meet this need, with accessible and engaging chapters describing how archeology, theology, ancient studies, literary studies, feminist studies, and other disciplines now understand the Bible.
