A Symposium on the Dingo

Australia and New Zealand

I Sell what I Write

Hunters and Trackers

"Simple text and photographs present dingoes, their physical features, where they live, and what they do"--Provided by publisher.

Technically, It's Not My Fault

Offers the thoughts of an eleven-year-old boy who, through a collection of poetry and illustrations, ponders the many things he sees and experiences in the world around him.

The Dogs that Made Australia

The Cambridge Natural History: Mammalia

Wolves and Other Dogs

Handbook of Applied Dog Behavior and Training: Principles of behavioral adaptation and learning

Describes the physical characteristics, habitat, and relationship with people of the dingo, a wild dog of Australia, and explains why they may become extinct.

Australian Folklore

In this two-volume work of 1873, novelist Anthony Trollope recounts his two-year journey across Britain's colonies in the Antipodes.

The New Book of Popular Science: Mammals, human sciences

Rage Across Australia

Look Out for the Dingo!

This is the first book to collate and synthesize the recent burgeoning primary research literature on dog behaviour, evolution, and cognition. The author presents a new ecological approach to the understanding of dog behaviour, demonstrating how dogs can be the subject of rigorous and productive scientific study without the need to confine them to a laboratory environment. This second, fully updated edition of Dog Behaviour, Evolution and Cognition starts with an overview of the conceptual and methodological issues associated with the study of the dog, followed by a brief description of their role in human society. An evolutionary

perspective is then introduced with a summary of current research into the process of domestication. The central part of the book is devoted to issues relating to the cognitive aspects of behaviour which have received particular attention in recent years from both psychologists and ethologists. The book's final chapters introduce the reader to many novel approaches to dog behaviour, set in the context of behavioural development and genetics. This second edition recognises and discusses the fact that dogs are increasingly being used as model organisms for studying aspects of human biology, such as genetic diseases and ageing. Specific attention is also given in this edition to attachment behaviour which emerges between humans and dogs, the importance of inter-specific communication in the success of dogs in human communities and the broad aspects of social cognition and how this may contribute to human-dog cooperation. Directions for future research are highlighted throughout the text which also incorporates links to human and primate research by drawing on homologies and analogies in both evolution and behaviour. The book will therefore be of relevance and use to anyone with an interest in behavioural ecology including graduate students of animal behaviour and cognition, as well as a more general audience of dog enthusiasts, biologists, psychologists, veterinarians, and sociologists.

Chamber's Information for the People

The Dingo Debate explores the intriguing and relatively unknown story of

Australia's most controversial animal – the dingo. Throughout its existence, the dingo has been shaped by its interactions with human societies. With this as a central theme, the book traces the story of the dingo from its beginnings as a semi-domesticated wild dog in South-east Asia, to its current status as a wild Australian native animal under threat of extinction. It describes how dingoes made their way to Australia, their subsequent relationship with Indigenous Australians, their successful adaptation to the Australian landscape and their constant battle against the agricultural industry. During these events, the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species. The book concludes with a discussion of what the future of the dingo in Australia might look like, what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co-existence. The Dingo Debate reveals the real dingo beneath the popular stereotypes, providing an account of the dingo's behaviour, ecology, impacts and management according to scientific and scholarly evidence rather than hearsay. This book will appeal to anyone with an interest in Australian natural history, wild canids, and the relationship between humans and carnivores.

The Wide World

Surveys the dog family as a whole and describes the characteristics of individual breeds.

The Lone Hand: May-October 1907

The Friend of All

The Dingo

In the arid expanses of Australia's red deserts, a killer is preying on British female backpackers. Dubbed 'The Dingo' by the media, he stalks his prey then disappears without a trace. In a bid to catch the man responsible, the local police call on the talents of Melbourne's finest, ex British cop, Lawrence James and leading criminal psychologist Jesse Sandersen. Meanwhile, James has unfinished business with Melbourne crime kingpin, Cyrus Bain, a gangster who will do whatever it takes to stay out of jail. When another young girl disappears, it is a race against time to catch the killer. Can James bring The Dingo to justice? Will he escape with his life intact? In their hunt for the murderer, James and Sandersen unearth some disturbing secrets that many would rather remain buried.

Official Record of Debates

New Perspectives on Our Lives with Companion Animals

The Lone Hand

Dogs are the world's most common and widespread carnivores and are nearly ubiquitous across the globe. The vast majority of these dogs, whether owned or un-owned, pure-bred or stray, spend a large portion of their life as unconfined, free-roaming animals, persisting at the interface of human and wildlife communities. Their numbers are particularly large throughout the developing world, where veterinary care and population control are often minimal and human populations are burgeoning. This volume brings together the world's experts to provide a comprehensive, unifying, and accessible review of the effects of dogs on native wildlife species. With an emphasis on addressing how free-ranging dogs may influence wildlife management and native species of conservation concern, chapters address themes such as the global history and size of dog populations, dogs as predators, competitors, and prey of wildlife, the use of dogs as hunting companions, the role of dogs in maintaining diseases of wildlife, and the potential for dogs to hybridize with wild canid species. In addition, the potential role of dogs as mediators of conservation conflict is assessed, including the role of dogs as livestock guardians, the potential for dogs to aid researchers in locating rare

wildlife species of conservation interest, and the importance of recognizing that some populations of dogs such as dingoes have a long history of genetic isolation and are themselves important conservation concerns. A common theme woven throughout this volume is the potential for dogs to mediate how humans interact with wildlife and the recognition that the success of wildlife conservation and management efforts are often underpinned by understanding and addressing the potential roles of free-ranging dogs in diverse natural ecosystems. *Free-Ranging Dogs and Wildlife Conservation* is aimed at professional wildlife and conservation ecologists, managers, graduate students, and researchers with an interest in human-dog-wildlife interactions. It will also be of relevance and use to dog welfare researchers, veterinary scientists, disease ecologists, and readers with an interest in the interface of domestic animals and wildlife.

Once a Month

The Dingo - A Complete Anthology of the Dog -

Austral English

Octave Mirbeau's Literary and Intellectual Evolution as a French Writer, 1880-1914

Proceedings of the International Conference on the Human-Companion Animal Bond, held at the University of Pennsylvania, October 5, 6, 7, 1981.

The Living Age

The Dingo Debate

Summary: William, a pomeranian, and Benbow, a redsetter set out on a sixty mile journey through bush to join the family who have gone on vacation. On the way they help rescue an Australian terrier who has been kidnapped by Dirty Dick, the dingo and his mob.

Dog Behaviour, Evolution, and Cognition

Presents the major fields of science and discusses their applications in today's world.

An Encyclopaedia of Rural Sports; Or, Complete Account of Hunting, Shooting Etc

The Dingo - A Complete Anthology of the Dog gathers together all the best early writing on the breed from our library of scarce, out-of-print antiquarian books and documents and reprints it in a quality, modern edition. This anthology includes chapters taken from a comprehensive range of books, many of them now rare and much sought-after works, all of them written by renowned breed experts of their day. These books are treasure troves of information about the breed - The physical points, temperaments, and special abilities are given; celebrated dogs are discussed and pictured; and the history of the breed and pedigrees of famous champions are also provided. The contents were well illustrated with numerous photographs of leading and famous dogs of that era and these are all reproduced to the highest quality. Books used include: The Kennel Encyclopaedia by J. Sidney Turner (1908), Dogs Of The World by Arthur Craven (1931), Hutchinson's Dog Encyclopaedia by Walter Hutchinson (1935) and many others.

Kings of the Dingoes

Free-Ranging Dogs and Wildlife Conservation

On the evening of 14 August 1829 the government brig Cyprus was sheltering in Recherche Bay on the remote south-east coast of Tasmania when she was captured by eighteen convicts under the leadership of William Swallow, a prisoner for life. Eight years earlier he had stowed away on a ship to England only to be eventually arrested and sent to Hobart for the second time. After marooning the crew, military guard and passengers on the desolate shore, Swallow skilfully sailed the brig across the Pacific to Tahiti then back to the Tongan Islands and on to Japan before finally scuttling her off the Chinese coast.

Our Antipodes, Or Residence and Rambles in the Australasian Colonies

Looks at the lives of members of the dog family from around the world, including wolves, foxes, zorros, dingos, and coyotes.

The Chronicles of Early Melbourne, 1835 to 1852

Dogs, Wild and Domestic

Hunter. Worker. Legend. The untold story of the dog's role in building our nation.

The Dogs That Made Australia pays tribute to the dogs that gave their all for our prosperity: the fearless hounds that saved fledgling colonies from famine; the courageous heelers and tireless collies that powered the rise of beef and wool; the tough little home-grown terriers that protected the homestead and garden; and the extraordinary police dogs, ahead of their time, loved by the nation. The selfless exploits of our heroic dogs are writ indelibly in our nation's heritage and identity. The Dogs That Made Australia is a vivid and meticulously researched history of Australia told from the perspectives of the dingo and of the dogs that were imported and developed here, as well as the humans who loved, feared and worked them. PRAISE 'A highly readable book about Australia's dog heroes and their contribution to Australia's development. This is a book for the ages. I loved every page!' Tony Parsons, OAM, author of The Kelpie 'This should be on every school list for every primary school. It is a fantastic Australian history reference' Narelle Hammond, Secretary, Australian Cattle Dog Society of NSW

Dingoes

This fun and fact-filled book about Australia's great predator, the dingo, is sure to thrill readers. This volume introduces readers to a dingo's anatomy, habitat, and diet, as well as their pack behavior and hunting techniques. The book also covers the dangers of encountering a dingo and the danger that dingoes face because of humans—complete extinction. Amazing color photographs bring this Outback

animal to life while exciting and accessible text gives readers a well-rounded reading experience. Fact boxes will fascinate readers and deepen their understanding of the topic.

Walkabout

The Big Book of Animal Devotions

This work shows how the literary and political ideas of Mirbeau generated a vision of reality foreshadowing Modernity. Through Mirbeau's descriptions of the effects of technological, scientific developments of the day and the temporal and spatial implications of such developments on the literary process, coupled with his advocacy of a radical political ideology to expose the inadequacies of social democracy, it covers the relationship between literature and politics, showing how innovation in the creative process provides a reflective framework for the expression of political difference.

The Dog Fancier

The Hunt for the Dingo

"Teaches children about God's creation while also using each animal to illustrate a character-development lesson from the Bible. Each reading includes a Scripture verse, discussion questions, and a concise nugget of take-away wisdom"--Provided by publisher.
