### Cheese and Microbes

Describes how cheese is made, from a sample's beginnings on a Wisconsin dairy farm until a cheese factory ships the final product across America.

### Whales and Other Sea Mammals

Tells the story of the Graves Family Dairy, whose three horses pulled the wagons delivering milk to families in the years before trucks and shopping centers replaced them.

### Lawn Boy

'The title epitomizes Esbensen's creative presentation of an important concept: how whales differ from the fish they seem to resemble and share characteristics with other mammals.... An excellent addition to the Let's-Read-and-Find-Out series.'—K. 'Introduces a full range of information about whale anatomy, development, and behavior.... Esbensen's simple, informative text keeps its young audience clearly in view.'—BL.

## **The TB12 Method**

Set on a small Irish dairy farm, this tender and funny debut novel follows two lost souls as they try to carve out new lives amid a colorful cast of characters reminiscent of those in the hit film *Waking Ned Divine*. Abby has been estranged from the family farm since her rebellious mother ran off with her when she was a small child. Kit is a burned out New York stockbroker who's down on his luck. But that's all about to change, now that he and Abby have converged on the farm just in time to help Corrie and Fee, two old cheesemakers in a time of need. Full of delightful and quirky characters--from dairy cows who only give their best product to pregnant, vegetarian teens to an odd collection of whiskey-soaked men and broken-hearted women who find refuge under Corrie and Fee's roof--*BLESSED ARE THE CHEESEMAKERS* is an irresistible tale about taking life's spilled milk and turning it into the best cheese in the world.

Sewing the Rainbow is the powerful story of Gilbert Baker and the creation of the rainbow flag. This book takes readers from Gilbert's childhood in a small town in Kansas, to his historic artistic career in San Francisco. Includes a "Note to Parents and Caregivers" with more about Gilbert and the flag's history.

### **Frankenstein's Cat**

The horse loves hay, the chickens need feed, the geese munch on corn, the hogs devour slop, the dog eats treats, but the cow loves...COOKIES? With an original twist on the ordinary barnyard book, the latest read-aloud from bestselling author Karma Wilson is a clever exploration of a curious incident on the farm. As the farmer makes his rounds each day, most of the animals chew on the foods a young reader would expect. But when it's time to feed the cow, she feasts on a special treat. Wilson's signature style and Marcellus Hall's spirited watercolors will delight children on and off the farm—because when it comes down to it, who doesn't love milk and cookies?

### **The Cow Loves Cookies**

A professional cheesemonger recounts his life and career along with information on the various aspects of the cheese

movement, including animal rights, co-operatives, and the politics of cheese.

### **Extra Cheese, Please!**

In dreamlike sequences, a man symbolically confronts the trauma of his family's incarceration in the Japanese internment camps during World War II. This infamous event is made emotionally clear through his meeting a group of children all with strange name tags pinned to their coats. The man feels the helplessness of the children. Finally, desperately he releases the name tags like birds into the air to find their way home with the hope for a time when Americans will be seen as one people—not judged, mistrusted, or segregated because of their individual heritage. Sixty years after thousands of Japanese Americans were unjustly imprisoned, the cogent prose and haunting paintings of renowned author and illustrator Allen Say remind readers of a dark chapter in America's history.

### **Galimoto**

## **Abiyoyo**

## **Skinny Bitch**

A scientific overview of the association of microbes with cheese, through the lens of select cheese varieties that result due to surface mold ripening, internal mold ripening, rind washing, cave aging, or surface smear rind development. Over the past decade, there has been explosive growth in the U.S. artisan cheese industry. The editor, Ms. Donnelly, was involved in developing a comprehensive education curriculum for those new to cheese making, which focused on the science of cheese, principally to promote cheese quality and safety. Many of the chapters in this book focus on aspects of that requisite knowledge. • Explains the process of transformation of milk to cheese and how sensory attributes of cheese are evaluated. • Provides an overview of cheese safety and regulations governing cheese making, both in the US and abroad, to ensure safety. • Explores how the tools of molecular biology provide new insights into the complexity of the microbial biodiversity of cheeses. • Examines the biodiversity of traditional cheeses as a result of traditional practices, and overviews research on the stability of the microbial consortium of select traditional cheese varieties. • Key text for cheese makers, scientists, students, and cheese enthusiasts who wish to expand their knowledge of cheeses and traditional foods.

Winner of 2014 AAAS/Subaru SB&F Prize for Best Young Adult Science Book Longlisted for the PEN/E.O. Wilson Literary Science Writing Award One of Nature's Summer Book Picks One of Publishers Weekly's Top Ten Spring 2013 Science Books For centuries, we've toyed with our creature companions, breeding dogs that herd and hunt, housecats that look like tigers, and teacup pigs that fit snugly in our handbags. But what happens when we take animal alteration a step further, engineering a cat that glows green under ultraviolet light or cloning the beloved family Labrador? Science has given us a whole new toolbox for tinkering with life. How are we using it? In *Frankenstein's Cat*, the journalist Emily Anthes takes us from petri dish to pet store as she explores how biotechnology is shaping the future of our furry and feathered friends. As she ventures from bucolic barnyards to a "frozen zoo" where scientists are storing DNA from the planet's most exotic creatures, she discovers how we can use cloning to protect endangered species, craft prosthetics to save injured animals, and employ genetic engineering to supply farms with disease-resistant livestock. Along the way, we meet some of the animals that are ushering in this astonishing age of enhancement, including sensor-wearing seals, cyborg beetles, a bionic bulldog, and the world's first cloned cat. Through her encounters with scientists, conservationists, ethicists, and entrepreneurs, Anthes reveals that while some of our interventions may be trivial (behold: the GloFish), others could improve the lives of many species—including our own. So what does biotechnology really mean for the world's wild things? And what do our brave new beasts tell us about ourselves? With keen insight and her trademark spunk, Anthes highlights both the peril and the promise of our scientific superpowers, taking us on an adventure into a world where our grandest science fiction fantasies are fast becoming reality.

### **Clarabelle**

A biography for younger readers about one of the most influential activists of our time, who was an early advocate for African Americans and for gay rights. "Bayard had an unshakable optimism, nerves of steel, and, most importantly, a faith that if the cause is just and people are organized, nothing can stand in our way."—President Barack Obama "Bayard Rustin was one of the great organizers and activists of the Civil Rights Movement. Without his skill and vision, the historic impact of the March on Washington might not have been possible. I am glad this biography will make young people aware of his life and his incredible contribution to American history.—Congressman John Lewis "'We need, in every community, a group of angelic troublemakers,' declared Bayard Rustin in the late 1940s. A proponent of nonviolent resistance and a stalwart figure in the civil rights movement, Rustin organized a profound and peaceful milestone in American history—the 1963 March on Washington. . . . Troublemaker for Justice describes not only how Rustin orchestrated the March on Washington in two months but also how he stood up for his Quaker principles throughout his life. The three authors, Jacqueline Houtman, Walter Naegle and Michael G. Long, show the difficulties Rustin faced as a gay black man in 20th-century America, and that he shouldered them with strength, intelligence, and a quest for peace and justice."—Abby Nolan, The Washington Post "An excellent biography that belongs in every young adult library. Readers will find Rustin's story captivating; his story could encourage young people to fight for change."—Michelle Kornberger, Library Journal,\*Starred Review "In today's political landscape, this volume is a lesson in the courage to live according to one's truth and the dedication it takes to create a better world."—Kirkus Reviews, \*Starred Review "A long-overdue introduction to a fascinating, influential change maker."—Publishers Weekly, \*Starred Review "This biography is an indispensable addition to the literature of both civil and gay rights."—Michael Cart, Booklist, \*Starred review Bayard Rustin was a major figure in the Civil Rights movement. He was arrested on a bus 13 years before Rosa Parks and he participated in integrated bus rides throughout the South 14 years before the Freedom Riders. He was a mentor to Dr. Martin Luther King, Jr., teaching him the techniques and philosophy of Gandhian nonviolent direct action. He organized the March on Washington in 1963, one of the most impactful mobilizations in American history. Despite these contributions, few Americans recognize his name, and he is absent from most history books, in large part because he was gay. This biography traces Rustin's life, from his childhood and his first arrest in high school for sitting in the "whites only" section of a theater, through a lifetime of nonviolent activism. Praise for Troublemaker for Justice: "In Troublemaker for Justice children and teens can finally discover the story of the man who possibly was the most influential person in the struggle for Civil Rights—Bayard Rustin."—Rob Sanders, author of *Pride: The Story of Harvey Milk and the Rainbow Flag Teachers: Discussion Guide Available!
