Essential Joinery

A psychological thriller in the tradition of Patricia Highsmith about two couples caught in a web of conflicting passions while deep-sea diving off the beautiful Canary Islands In the late 1990s, Sven Fiedler and his girlfriend, Antje, left Germany for the island of Lanzarote, rejecting what Sven considered a vulgar culture of materialism and judgment. The young couple set up a diving service catering to tourists eager to bask in the warm sunshine and explore the silent, gleaming marine paradise that makes this otherwise barren volcanic island such a remarkable retreat. Sven's approach was simple: take the mechanics of diving seriously, instruct his clients clearly, and stay out of their personal business as best he can. And life on the island goes smoothly until two German tourists--Jola von der Pahlen, a daytime soap star on the verge of cinematic success, and Theo Hast, a stalled novelist--engage Sven for a high-priced, intensive two-week diving experience. Staying in a guest house on Sven and Antje's property, the two visitors and their hosts quickly become embroiled in a tangle of jealousy and suspicion. Sven is struck by Jola's beauty, her evident wealth, and her apparently volatile

relationship with the much older Theo. Theo quickly leaps to the conclusion that Sven and Jola are having an affair, but, oddly, he seems to facilitate it rather than trying to intervene. Antje, looking on, grows increasingly wary of these particular clients. As the point of view shifts from one character to the next, the reader is constantly kept guessing about who knows what, and, more important, who is telling the truth. A brutal game of delusion, temptation, and manipulation plays out, pointing toward a violent end. But a quiet one, down in the underwater world beneath the waves.

Myths, Lies and Old Age

Myths, Lies and Old Age: a collection of poems by Bob Eccleston. Within these pages there are myths: some known, some newly created, some yet to occur and some which may prove to be reality. There are vistas of old age from a viewpoint which does not preclude a future or a sense of humour; where the use of set forms indicates maturity and balance. There are lies aplenty although different readers may have different views as to where they occur. There is love and murder, hope and despair, tragedy and comedy; even nonsense. There is a modicum of sex involving two amorous seals. In short, there is variety and, hopefully, enjoyment.

Torn Trousers: A True Story of Courage and Adventure: How A Couple Sacrificed Everything To Escape to Paradise

Hybrid woodworking is incredibly gratifying if for only the fact that there are no wasted motions. We let the power tools do the grunt work, while taking our time to finesse the work with our hand tools. It truly is the best of both worlds and it is a method that is incredibly appealing to the modern woodworker.

Boleros for the Disenchanted and Other Plays

Democracy in South Africa turns twenty on 27 April 2014. In *A Rumour of Spring*, Max du Preez investigates and analyses the progress and lack of progress the country has made during these twenty years. *A Rumour of Spring* looks at the legacies of Nelson Mandela and Thabo Mbeki in an attempt to understand how we got here, and examines Jacob Zuma's presidency to better understand where we are. In the context of blatant corruption, populism and tragedies such as the Marikana massacre, the book considers the current state of the ruling party and the opposition, and dissects the big issues currently afflicting our society, including the state of education, land reform, crime and policing, the judiciary, nationality and race. And then, with images of the Arab Spring fresh in our collective memory, it dares to look to the future and what it may hold. An honest and balanced account, *A Rumour of Spring* tackles the questions asked by ordinary South Africans every day: How are we really doing? What is really going on in our country? How should we understand what is happening here? And will it get any better?

A Rumour of Spring

What could possibly go wrong in paradise? Tired of mortgage payments, thirty-something Andrew and Gwynn sold nearly everything they owned but their Siamese cat and escaped their humdrum nine-to-five existence for life in paradise—a tiny island in one of the remotest spots on Earth: the Okavango Delta in Botswana. Woefully inexperienced, they took control of a luxury game lodge that catered to the likes of French aristocrats, Hollywood directors, Mafia lawyers, and the captain of the England cricket team. Not forgetting the hippos who liked to crash cocktail hour. Trouble soon followed as the reality of running a hotel on an island accessible only by boat or plane burst upon them. Andrew and Gwynn learned it's one thing for guests to wake up with gentle giraffes outside their windows, but it's quite another to keep them safe from poisonous snakes, temperamental elephants, and a hyena with a taste for plastic. All that was child's play compared to figuring out how to feed their guests when a 'quick run' to the grocery store required a plane, a bush pilot, and moderate risk to life, limb, and property. By turns funny, touching, and suspenseful, *Torn Trousers* is a real modern fairytale about getting exactly what you wished for...and then having to live with it. Scroll up and buy to escape to Africa today!

Assessment of Fuel Economy Technologies for Light-Duty Vehicles

On February 10, 1911, we started for the South to establish depots, and continued our journey until April 11. We formed three depots and stored in them 3 tons of provisions, including 22 hundredweight of seal meat. As there were no landmarks, we had to indicate the position of our depots by flags, which were posted at a distance of about four miles to the east and west. The first barrier afforded the best going, and was specially adapted for dog-sledging. Thus, on February 15 we did sixty-two miles with sledges. Each sledge weighed 660 pounds, and we had six dogs for each. The upper barrier ("barrier surface") was smooth and even. There were a few crevasses here and there, but we only found them dangerous at one or two points. The barrier went in long, regular undulations. The weather was very favourable, with calms or light winds. The lowest temperature at this station was -49 F., which was taken on March 4.

Forty-something with two grown-up sons, Jeannie believes her marriage to Craig is stable and happy. But Craig is a man of secrets, and Valerie is determined to make him her own. When Jeannie's sister Karen announces that she will soon be visiting from Australia,, Jeannie cannot anticipate the suddenness with which her world will come crashing down. Still, it remains anyone's guess who will come out the victor in this contest of love and glory. Set in Johannesburg amidst the phrenetic build-up to a soccer world cup, this fast-paced novel explores the fragility of relationships and the cost of commitment. It is also a celebration of spirit, an inspiring reminder that, notwithstanding difficulties and unforeseen disaster, life offers us all the chance to make good.

With the knowledge of only a handful of essential joints, a woodworker can build anything he can imagine. Whether it's a kitchen cabinet or an 18th century highboy, the foundation for all types of woodworking can be boiled down to a handful of essential joinery skills. Once learned, these joinery methods can be used to create almost anything the woodworker's mind can imagine. From the workshop of The Wood Whisperer, the popular YouTube host and best-selling author Marc Spagunolo teaches his preferred, time-tested methods for creating these joints. Rather than working solely by hand or machine, Spagunolo teaches woodworkers how to choose the joinery methods that make the most sense for the task at hand. And, in his easy-going and accessible style that promotes comfort and confidence, he provides several styles and methods for creating each joint. With Essential Joinery, beginners and pros alike will learn to hone the joinery skills that will take their woodworking to the next level.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the

2017-2025 CAFE standards.

By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva agriscience, sulfoxaflor, is now listed for use in Cucurbitae and ornamentals under full protection for control of aphids and whitefly.

Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars, sport-utility vehicles, minivans, and other light-duty vehicles without compromising vehicle performance or safety. Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines: spark-ignition gasoline, compression-ignition diesel, and hybrid. According to its estimates, adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark-ignition engines could reduce fuel consumption by 29 percent at an additional cost of \$2,200 to the consumer. Replacing spark-ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately \$5,900 per vehicle, and replacing spark-ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of \$6,000 per vehicle. The book focuses on fuel consumption--the amount of fuel consumed in a given driving distance--because energy savings are directly related to the amount of fuel used. In contrast, fuel economy measures how far a vehicle will travel with a gallon of fuel. Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions, the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information.
