On February 10, 1911, we started for the South to establish depots, and continued our journey until April 11. We formed three depots and stored in them 3 tons of provisions, including 22 hundredweight of seal meat. As there were no landmarks, we had to indicate the position of our depots by flags, which were posted at a distance of about four miles to the east and west.

The first barrier afforded the best going, and was specially adapted for dog-sledging. Thus, on February 15 we did sixty-two miles with sledges. Each sledge weighed 660 pounds, and we had six dogs for each. The upper barrier ("barrier surface") was smooth and even. There were a few crevasses here and there, but we only found them dangerous at one or two points. The barrier went in long, regular undulations. The weather was very favourable, with calms or light winds. The lowest temperature at this station was -49 F., which was taken on March 4.

A photo-based exploration of modern-day witches from all over America, beautifully capturing the various ways "witch-ness" belongs to those who claim it. Based on her critically acclaimed exhibition, Major Arcana collects the work of photographer Frances F. Denny, who travelled around the U.S. photographing and interviewing a diverse group of people who identify as witches. This book is an exploration of contemporary witchery told through striking photographs and short, inspiring essays written by the "Terry Gross of witches," Pam Grossman, and the subjects themselves. From occultists and Neo-pagans, to herbalists and Wiccan High Priestesses, Denny's portraits capture the face of modern American witchcraft and challenge our assumptions about who and what a witch really is.
