Law Against Unfair Competition

The Germans and the Final Solution stand as the fullest assessment to date of the attitudes of the German public to the Nazi policy of antisemitism and its genocidal conclusion. David Bankier's pathbreaking work will be widely read by scholars and students of contemporary European Jewish history and the history of Nazi Germany.

Environment across Cultures

This ebook includes a copy of Robert Louis Stevenson's Treasure Island! A rip-roaring sequel to Treasure Island—Robert Louis Stevenson's beloved classic—about two young friends and their high-seas adventure with dangerous pirates and long-lost treasure. It's almost forty years after the events of Robert Louis Stevenson's Treasure Island: Jim Hawkins now runs an inn called the Hispaniola on the English coast with his son, Jim, and Long John Silver has returned to England to live in obscurity with his daughter, Natty. Their lives are quiet and unremarkable; their adventures have seemingly ended. But for Jim and Natty, the adventure is just beginning. One night, Natty approaches young Jim with a proposition: return to Treasure Island and find the remaining treasure that their fathers left behind so many years before. As Jim and Natty set sail in their fathers' footsteps, they quickly learn that this journey will not be easy. Immediately, they come up against murderous pirates, long-held grudges, and greed and deception lurking in every corner. And when they arrive on Treasure Island, they find terrible scenes awaiting them—difficulties which require all their wit as well as their courage. Nor does the adventure end there, since they have to sail homeward again Andrew Motion's sequel—rollicking, heartfelt, and utterly brilliant—would make Robert Louis Stevenson proud.

Cambridge IGCSE and O Level Economics

Accounting Information Systems 2e covers the four roles for accountants with respect to information technology: users of technology and information systems, managers of users of technology, designers of information systems, and evaluators of information systems. Accountants must understand the organization and how organizational processes generate information important to management. The focus of Accounting Information Systems, 2/e is on the accountant's role as business analyst in solving business problems by database modeling, database design, and business process modeling. Unlike other texts that provide a broad survey of AIS related topics, this text concentrates on developing practical, real-world business analysis skills. Whether you are developing a new course for AIS or incorporating AIS materials into your existing curriculum, Accounting Information Systems, 2/e will help prepare your students for their future careers.

How to Learn and Memorize Vietnamese Vocabulary

In this era of eroding commitment to government sponsored welfare programs, voluntarism and private charity have become the popular, optimistic solutions to poverty and hunger. The resurgence of charity has to be a good thing, doesn't it? No, says sociologist Janet Poppendieck, not when stopgap charitable efforts replace consistent public policy, and poverty continues to grow. In *Sweet Charity?*, Poppendieck travels the country to work in soup kitchens and "gleaning" centers, reporting from the frontlines of America's hunger relief programs to assess the effectiveness of these homegrown efforts. We hear from the "clients" who receive meals too small to feed their families; from the enthusiastic volunteers; and from the directors, who wonder if their "successful" programs are in some way perpetuating the problem they are struggling to solve. Hailed as the most significant book on hunger to appear in decades, *Sweet Charity?* shows how the drive to end poverty has taken a wrong turn with thousands of well-meaning volunteers on board.

Literary Skinheads?

Established in Amsterdam in 1935, the International Institute of Social History is one of the world's leading research centres. Its exceptional research collections owe much to its former director Jaap Kloosterman. The contributors offer a rare insight into the history of the institute and the motivation behind devoting a lifetime to collecting social history sources.

The Politics of Immorality in Ancient Rome

The decadence and depravity of the ancient Romans are a commonplace of serious history, popular novels and spectacular films. This book is concerned not with the question of how immoral the ancient Romans were but why the literature they produced is so preoccupied with immorality. The modern image of immoral Rome derives from ancient accounts which are largely critical rather than celebratory. Upper-class Romans habitually accused one another of the most lurid sexual and sumptuary improprieties. Historians and moralists lamented the vices of their contemporaries and mourned for the virtues of a vanished age. Far from being empty commonplaces these assertions constituted a powerful discourse through

which Romans negotiated conflicts and tensions in their social and political order. This study proceeds by a detailed examination of a wide range of ancient texts (all of which are translated) exploring the dynamics of their rhetoric, as well as the ends to which they were deployed. Roman moralising discourse, the author suggests, may be seen as especially concerned with the articulation of anxieties about gender, social status and political power. Individual chapters focus on adultery, effeminacy, the immorality of the Roman theatre, luxurious buildings and the dangers of pleasure. This book should appeal to students and scholars of classical literature and ancient history. It will also attract anthropologists and social and cultural historians.

Sociobiology and Conflict

Contains over 150,000 words and phrases on a variety of subjects, with special emphasis on usage, construction, and spelling.

The South Pole, Volume 1

This thesis is about mathematical optimization for the efficient use of railway infrastructure. We address the optimal allocation of the available railway track capacity - the track allocation problem. This track allocation problem is a major challenge for a railway company, independent of whether a free market, a private monopoly, or a public monopoly is given. Planning and operating railway transportation systems is extremely hard due to the combinatorial complexity of the underlying discrete optimization problems, the technical intricacies, and the immense sizes of the problem instances. Mathematical models and optimization techniques can result in huge gains for both railway customers and operators, e.g., in terms of cost reductions or service quality improvements. We tackle this challenge by developing novel mathematical models and associated innovative algorithmic solution methods for large scale instances. This allows us to produce for the first time reliable solutions for a real world instance, i.e., the Simplon corridor in Switzerland.

ACCOUNTING INFORMATION SYSTEMS

The study tackles the subject in a new and unique way: Due to the fact that the borders between classical academic disciplines disappear at the nanoscale, a truly interdisciplinary approach is chosen. A functional definition of nanotechnology is developed by the authors as basis for the further sections of the study. The most important results enable recommendations with respect to scientific progress, industrial relevance, economic potential, educational needs, potential adverse health effects and philosophical aspects of nanotechnology. The book addresses the relevant decision levels, media, and academia.

Volkswagen Chronicle - From the Beetle to a Global Player

"In his introduction to *The Life of Abraham Lincoln*, Henry Ketcham notes that there has been so much written about Lincoln that the legend has begun to obscure, if not to efface, the man. In this biography the single purpose has been to present

the living man with such distinctness of outline that the reader may have a sort of feeling of being acquainted with him. Ketcham's clearly-written, unadorned account of Lincoln's life achieves its stated purpose, never removing its focus from the man who became the 16th President of the United States and led the nation through some of its most turbulent and difficult times."--Amazon.com

The Cold War in the Classroom

Mein Leben Bis Zum Kriege

This book examines the present state of harmonization of unfair competition law in Europe. It discusses the particular approach to unfair competition law in the 10 new Member States and the possible impact on the future development of European unfair competition law. The book presents new insight in the importance of unfair competition law, especially in countries with a developing market economy.

The Concise Oxford-Duden German Dictionary

Combining guidance for writing over 40 types of professional documents with thorough coverage of grammar, usage, and style, the Handbook of Technical Writing functions as both a writer's handbook and a complete guide to technical communication. It provides quick access to hundreds of topics and scores of sample documents and visuals. [publisher's note]

School Education

The Shock Doctrine

Describes the investment strategies of the world's most famous stock investor, recounting how he made a fortune by purchasing pieces of outstanding companies since the early 1980s

Sweet Charity?

Disparate perceptions and conceptual frameworks of environment and the relationship between humans and nature often lead to confusion, constraints on cooperation and collaboration and even conflict when society tries to deal with today's urgent and complex environment research and policy challenges. Such disparities in perception and "world view" are driven by many factors. They include differences in culture, religion, ethical frameworks, scientific methodologies and approaches, disciplines, political, social and philosophical traditions, life styles and consumption patterns as well as alternative economic paradigms. Distribution of poverty or wealth between north and south may thus be seen as consequence of the above mentioned disparities, which is a challenge for it's universal reasoned evaluation. This volume discusses a wide range of factors influencing "Environment across Cultures" with a view to identifying ways and means to better understand,

reflect and manage such disparities within future global environmental research and policy agendas for bridging the gap between ecology and economy as well as between societies. The book is based upon the results of a scientific symposium on this topic and covers the following sections: Cross Cultural Perception of Environment; Ethics and Nature; Environment, Sustainability and Society. Corresponding contributions were made by well-known scientific authors representing different cultural spheres in accordance with the inter-cultural approach of this effort.

Banking and the Business Cycle

At a time when Europe is growing together, cooperation between countries is becoming increasingly necessary. One of the main reasons for pursuing transnational spatial development is to attain a common understanding of the facts of spatial planning. Hence, the INTERREG III B project "COMMIN" sought to establish a common communication basis for the exchange of knowledge and experience in spatial planning and thus to foster and develop this understanding in the Baltic Sea region. Therefore, on the basis of a standardized structure the COMMIN project partners prepared basic information about institutional settings and spatial planning systems and compiled a glossary of key terminology in spatial planning accompanied by a varying range of fact sheets with respect to planning cases taken as examples. The readers will now find on www.commin.org the whole range of information covering the respective national languages as well as English translations, although in some countries official translations for these issues were lacking. The project partners were aware of the fact that each translation requires a balancing act between legal precision and communicable classification and, at the end, is a question of definition power and of different senses for semantics. The German text on hand (status December 2006) one information package out of eleven was prepared by a team comprising planners, lawyers, economists, and administrative academics. Actually no other publication treating this subject in English exists and it will hopefully contribute not only to understanding planning issues in Europe but also to transferring in this respect information and knowledge within the country. Anyway, being aware of differences between countries is a point of departure for the mutual understanding process.

13th International Conference on Theory and Application of Fuzzy Systems and Soft Computing – ICAFS-2018

Contains, for each text chapter: pretest, chapter overview, detailed chapter review - including study tips, practice test questions and demonstration problems with worked-out solutions.

Treasures in Trusted Hands

"Riddle me this, riddle me that, guess me this riddle, and perhaps not: A we run things, things no run we. Who could that be?" One possible answer: Jamaican sprinters. Enquiring minds want to know: Why do Jamaicans run so fast? Usain Bolt may be the most recent and the most spectacular Jamaican practitioner of the art of speed, but he and Shelly-Ann Fraser stand on the shoulders of giants of both

genders, heirs to a pedigree that goes back at least a hundred years to the teenaged Norman Manley and before. For years before the explosion of "Lightning" Bolt on the Beijing Olympics track, the consistent speediness of men and women from this small island had been the subject of serious and humorous speculation, pride and "su-su". What is the "gold" that is mined so consistently by Jamaican sprinters that permits the little country to claim a place among the top five countries, measured in terms of medals per capita of population, in almost every Olympics since the Second World War - and all on the basis of athletics, mostly the sprints (400 metres and under)? Can science explain it? Does the touchy area of genetics - even though, scientifically speaking, there's no such thing as "race" - explain it? For instance, all the current world record holders for the sprints - and most of the former for the past fifty years or so - have been born in the Americas, descendants of slaves of West African lineage. Is running fast "in the blood", so to speak? Or is it as simple as the varieties of yam (twenty-two at last count) to be found on the hills of Jamaica and in the stomachs of its people? Behind the simple tales of the tape are theories and questions that have attracted fourteen specialists from a range of disciplines, from biochemistry to physiology, from genetics to psychiatry, each with an insight, a piece of the puzzle. *Jamaican Gold* presents research and argument, history and biography - and much more - for the specialist and the sports fan, for the academic and the coach, in one attractive, easy-to-read volume, packed with photographs and illustrations, including a special section of memorable photos of the heroes of yesteryear and today. With *Jamaican Gold* to hand, the London Olympics will be just as thrilling, and you'll be closer to answering the question: Why do those Jamaicans run so fast?

The Germans and the Final Solution

Many think they know the legends behind tulipmania and the legacy of the Dutch East India Tea Company, but what basic knowledge of Dutch history and culture should be passed on to future generations? *A Key to Dutch History* and its resulting overview of historical highlights, assembled by a number of specialists in consultation with the Dutch general public, provides a thought-provoking and timely answer. The democratic process behind the volume is reminiscent of the way in which the Netherlands has succeeded for centuries at collective craftsmanship, and says as much about the Netherlands as does the outcome of the opinions voiced.

The Warren Buffett Way

The only thing that gets recent widower Dan through the long lonely nights is Anni, his cherished dog. Stolen from Dan's front yard, Anni is rescued from an abusive tenant by Andrea Keller, who is recovering from the heartbreak of a messy divorce. As Anni works to find her way home, can she bring these two lost souls together?

Genocide

Awakening

On February 10, 1911, we started for the South to establish depots, and continued our journey until April 11. We formed three depots and stored in them 3 tons of provisions, including 22 hundredweight of seal meat. As there were no landmarks, we had to indicate the position of our depots by flags, which were posted at a distance of about four miles to the east and west. The first barrier afforded the best going, and was specially adapted for dog-sledging. Thus, on February 15 we did sixty-two miles with sledges. Each sledge weighed 660 pounds, and we had six dogs for each. The upper barrier ("barrier surface") was smooth and even. There were a few crevasses here and there, but we only found them dangerous at one or two points. The barrier went in long, regular undulations. The weather was very favourable, with calms or light winds. The lowest temperature at this station was -49 F., which was taken on March 4.

Nanotechnology

The collection brings together the latest work of researchers from Australia, Africa, Asia, and Europe focusing on early childhood leadership matters. It covers different aspects of leadership in early education: professional education and development, identity and leadership strategies as well as governance and leadership under different frame conditions.

Introduction to Financial Accounting

In the decades since Martin Heidegger's death, many of his early writings--notes and talks, essays and reviews--have made it into print, but in such scattershot fashion and erratic translation as to mitigate their usefulness for understanding the development, direction, and ultimate shape of his work. This timely collection, edited by two preeminent Heidegger scholars, brings together in English translation the most philosophical of Heidegger's earliest occasional writings from 1910 to the end of 1927. These important philosophical documents fill out the context in which the early Heidegger wrote his major works and provide the background against which they appeared. Accompanied by incisive commentary, these pieces from Heidegger's student days, his early Freiburg period, and the time of his Marburg lecture courses will contribute substantially to rethinking the making and meaning of Being and Time. The contents are of a depth and quality that make this volume the collection for those interested in Heidegger's work prior to his masterwork. The book will also serve those concerned with Heidegger's relation to such figures as Aristotle, Dilthey, Husserl, Jaspers, and Löwith, as well as scholars whose interests are more topically centered on questions of history, logic, religion, and truth. Important in their own right, these pieces will also prove particularly useful to students of Heidegger's thought and of twentieth-century philosophy in general.

Becoming Heidegger

Is there such a thing as an 'entrepreneurial personality'? What makes someone an entrepreneur is a question that has intrigued the lay person and the scholar for many years, but can such a personality be identified or is it simply a socially constructed phenomenon? Elizabeth Chell pursues an alternative line of argument:

to show that the entrepreneurial personality is, on the one hand, socially constructed, but on the other hand, presents consistency in behaviours, skills and competencies. This second edition of the highly acclaimed *The Entrepreneurial Personality* revisits the topic and updates the evidence from a multi-disciplinary perspective. The book carefully weaves together the arguments and views from economists, sociologists and psychologists in order to develop a strong conceptual foundation. It discusses the inferences that these experts have made about the nature of entrepreneurs and the entrepreneurial process, and explores whether such evidence has enabled psychometricians to develop robust instruments for assessing the characteristics of entrepreneurs. The evidence for a range of purported traits is reviewed and the models and research designs of interested social scientists are explained and evaluated. Throughout, Chell laces her argument richly with a set of cases derived from primary and secondary sources. This book presents a timely set of views on the entrepreneurial personality, and will be of great interest to academics in the fields of entrepreneurship, economics, management, applied psychology and sociology. This accessible text will also appeal to the interested general reader, as well as practitioners and consultants dealing with entrepreneurs in the field.

Silver

This book is open access under a CC BY 4.0 license. This book explores how the socially disputed period of the Cold War is remembered in today's history classroom. Applying a diverse set of methodological strategies, the authors map the dividing lines in and between memory cultures across the globe, paying special attention to the impact the crisis-driven age of our present has on images of the past. Authors analysing educational media point to ambivalence, vagueness and contradictions in textbook narratives understood to be echoes of societal and academic controversies. Others focus on teachers and the history classroom, showing how unresolved political issues create tensions in history education. They render visible how teachers struggle to handle these challenges by pretending that what they do is 'just history'. The contributions to this book unveil how teachers, backgrounding the political inherent in all memory practices, often nourish the illusion that the history in which they are engaged is all about addressing the past with a reflexive and disciplined approach.

Leadership in Early Education in Times of Change

Dieses Werk ist Teil der Buchreihe TREDITION CLASSICS. Der Verlag tredition aus Hamburg veröffentlicht in der Buchreihe TREDITION CLASSICS Werke aus mehr als zwei Jahrtausenden. Diese waren zu einem Grossteil vergriffen oder nur noch antiquarisch erhaltlich. Die Buchreihe dient zur Bewahrung der Literatur und Forderung der Kultur. Sie trägt so dazu bei, dass viele tausend Werke nicht in Vergessenheit geraten

Railway Track Allocation

This book tries to sort out the different meanings of uncertainty and to discover their foundations. It shows that uncertainty can be represented using various tools and mental guidelines. Coverage also examines alternative ways to deal with risk and risk attitude concepts. Behavior under uncertainty emerges from this book as something to base more on inquiry and reflection rather than on mere intuition.

Handbook of Technical Writing

Written with the international student in mind, this book is endorsed by Cambridge International Examinations and contains the most up-to-date case studies, global examples and statistics. - In-depth coverage of every aspect of the latest Cambridge IGCSE® and O Level Economics syllabuses to help students build the skills needed to succeed - Engaging and contemporary case studies and examples ensure the book is relevant to the international student - Accessible language and key terms defined to support ESL/EAL students - Student-focused CD-ROM provides useful weblinks to the latest case studies, interactive activities and answers to the questions in the textbook "A stimulating and exciting introduction to Economics that enables students from anywhere in the world to relate to the subject." Caroline Loewenstein, Economics and Business Education Association Cambridge International Examinations and Hodder Education Hodder Education works closely with Cambridge International Examinations and is an authorised publisher of endorsed textbooks for a wide range of Cambridge syllabuses and curriculum frameworks. Hodder Education resources, tried and tested over many years but updated regularly, are used with confidence worldwide by thousands of Cambridge students.

Bundle Pack Containing

The Life of Abraham Lincoln

The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting over the past few years, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

The Planning System and Planning Terms in Germany

A Key to Dutch History

Briefe aus dem Gefängnis by Rosa Luxemburg

Jamaican Gold

1. 1 THE STUDY OF CONFLICT Polemos Pantoon Pater Heraclitus Conflict on all levels of organic existence is pervasive, persistent, ubiquitous. Conflict is the universal experience of all life forms. Organisms are bound in multiple conflict-configurations and -coalitions, which have their own dynamic and their own logic. This does not mean, however, that the more paroxysmal forms of conflict behaviour, naked violence and destruction, are also universal. Conflict and cooperation are always intertwined. Conflicts do, however, have a propensity to gravitate towards violence. There is, as Pettman (1975) pointed out, no accepted or agreed list of the social units by which conflicts might be classified. To talk of conflict in intra personal, inter-personal, familial, group, class, ethnic, religious, intra-state or inter-state terms is to assume, perhaps erroneously, that 'each kind of social unit, having its own range of size, structure, and institutions, will also have its own modes of interaction and thus its own patterns of conflict with other social units' (Fink, 1968) like and unlike itself. Such an assumption merits scrutiny on its own, since, despite the plausibility of some sort of analytical link between the parties to a conflict and the nature of the confrontation that ensues, the link should be demonstrated and not allowed to stand by assertion alone. This volume is devoted to one type of analysis of conflict, the socio biological one.

The Entrepreneurial Personality

This book presents the proceedings of the 13th International Conference on Application of Fuzzy Systems and Soft Computing (ICAFS 2018), held in Warsaw, Poland on August 27-28, 2018. It includes contributions from diverse areas of soft computing such as uncertain computation, Z-information processing, neuro-fuzzy approaches, evolutionary computing and others. The topics of the papers include theory of uncertainty computation; theory and application of soft computing; decision theory with imperfect information; neuro-fuzzy technology; image processing with soft computing; intelligent control; machine learning; fuzzy logic in data analytics and data mining; evolutionary computing; chaotic systems; soft computing in business, economics and finance; fuzzy logic and soft computing in the earth sciences; fuzzy logic and soft computing in engineering; soft computing in medicine, biomedical engineering and the pharmaceutical sciences; and probabilistic and statistical reasoning in the social and educational sciences. The book covers new ideas from theoretical and practical perspectives in economics, business, industry, education, medicine, the earth sciences and other fields. In addition to promoting the development and application of soft computing methods in various real-life fields, it offers a useful guide for academics, practitioners, and graduates in fuzzy logic and soft computing fields.

Briefe Aus Dem Gefangnis

AWAKENING is a story of eleven rising-star managers who gather together in a secluded luxury lodge for a mysterious five-day leadership training course. Asked to pick a leader from amongst themselves, they soon realize that nothing is what it seems at this place, where managers are compared to ancient conquerors and one corporate taboo after another gets broken. As the group exercise progresses rapidly from a friendly election to a twisted web of no-holds-barred power plays, the players don't realize that soon some of them will be facing the harshest challenge of their lives. The unconventional workshop is about to take a very dangerous turn, testing the values and characters of its participants in the most brutal ways and presenting them with the ultimate question: how high a price are they willing to pay for power?

Hello Love

These two phenomena can be seen as manifestations of a general malaise, a disorientation that may last for quite some time, and Jay Rosellini approaches his subject with the belief that it would be irresponsible to ignore these disquieting trends." "This account is recommended for the general reader interested in international issues as well as for students and scholars of German, intellectual history, political science, and comparative sociology."--BOOK JACKET.

Uncertainty and Risk

How to Learn and Memorize Vietnamese Vocabulary Using a Memory Palace Specifically Designed for Vietnamese (and adaptable to many other languages too) If you'd like to improve your ability to learn Vietnamese vocabulary by as much as 100%, 200%, even 300% (or more) using simple memory techniques that you can learn in 15-20 minutes (or less), then this may be the most important book that you will ever read. Believe it or not, it really doesn't matter if you think you have a good memory or not. The information in this book will teach you: * Why memory is like a bicycle everyone can ride (with some minor personal adjustments). * The real reason why no one should ever be squeamish about memorization or learning a language. * Why and how some of the most famous memory skills are applicable to learning any language, especially Vietnamese. * How you can easily create a "letter location" memory system based on the Vietnamese alphabet. * How to quickly and easily learn and memorize the sounds of the Vietnamese alphabet * Unique techniques that will have you literally "tuning in" on the Vietnamese language. * How to separate Vietnamese words in the most effective manner for memorization. * Two secret ways you can use relaxation to aid the memorization process. These two methods alone are worth the price of this book because they will literally eliminate your stress and apprehension as you learn Vietnamese. * And much, much more These techniques have been used by real language learners, most of whom previously considered themselves owners of a "bad memory," to make real strides in learning Vietnamese vocabulary. Don't worry! None of these techniques involve brain surgery! Frankly, if you can memorize a short email address or the name of a movie, then you can use this system to memorize a language as rich and diverse as Vietnamese. Plus, everything you'll

learn in this book applies to every other language that shares the same alphabet with English. And with a little imagination, the ideas are easily transferable to other alphabet systems too. But there's really no time to lose. Every day that you are not using this simple vocabulary memorization system, you are literally stealing from yourself the joy of being able to read, speak and recall an abundance of Vietnamese vocabulary as you easily expand the natural abilities of your mind.

A Usable Collection

This pioneering study charts the one-way traffic of cultural and historical objects during five centuries of European colonialism. It presents abundant examples of disappeared colonial objects and systematizes these into war booty, confiscations by missionaries and contestable acquisitions by private persons and other categories. Former colonies consider this as a historical injustice that has not been undone. Former colonial powers have kept most of the objects in their custody. In the 1970s the Netherlands and Belgium returned objects to their former colonies Indonesia and DR Congo; but their number was considerably smaller than what had been asked for. Nigeria's requests for the return of some Benin objects, confiscated by British soldiers in 1897, are rejected. As there is no consensus on how to deal with colonial objects, disputes about other categories of contestable objects are analyzed. For Nazi-looted artworks the 1998 Washington Conference Principles have been widely accepted. Although non-binding, they promote fair and just solutions and help people to reclaim art works that they lost involuntarily. To promote solutions for colonial objects, nine Principles for Dealing with Colonial Cultural and Historical Objects are presented, based on the Washington Conference Principles. The nine are part of a model to facilitate mediation in disputes about them. This model can help to break the impasse in negotiations between former colonizers and colonies. Europe, the former colonizers, should do more pro-active provenance research into the acquisitions from the colonial era, both in public institutions and private collections. "This is a very commendable treatise which has painstakingly and with detachment explored the emotive issue of the return of cultural objects removed in colonial times to the metropolis. He has looked at the issues from every continent with clarity and perspicuity." Prof. Folarin Shyllon (University of Ibadan) "Momumentaal werk van hoge kwaliteit. Het hoofdstuk over Congo is bijzonder goed gedocumenteerd en leerrijk" Dr. Guido Gryseels (Director-General of the Royal Museum for Central Africa in Tervuren) CLUES is an international scientific series covering research in the field of culture, history and heritage which have been written by, or were performed under the supervision of members of the research institute CLUE+.
