A Quarter's Worth of Humor

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that

their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where they met world famous action movie star Jordie Paine -- star of such films as *I Plan to Kill You Now* and the sequel, *I Plan to Kill You Now, Too*, the ninja film, *Chuck Butcher: Sword Wielding Jackal*, as well as the light-hearted romp, *Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska* -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.

"Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results" is the simple, nontechnical introduction to the most complex multivariate statistics presented in empirical research articles.

"wwwStatsInResearch.com, " is a companion website that provides free sample chapters, exercises, and PowerPoint slides for students and teachers. A free 600-item test bank is available to instructors. "Advanced Statistics in Research" does not show how to "perform" statistical procedures--it shows how to read, understand, and interpret them, as they are typically presented in journal articles and research reports. It demystifies the sophisticated statistics that stop most readers cold: multiple regression, logistic regression, discriminant analysis, ANOVA, ANCOVA, MANOVA, factor analysis, path analysis, structural equation modeling, meta-analysis--and more. "Advanced Statistics in Research" assumes that you have never had a course in statistics. It begins at the beginning, with research design, central tendency, variability, z scores, and the normal curve. You will learn (or re-learn) the big-three results that are common to most procedures: statistical significance, confidence intervals, and effect size. Step-by-step, each chapter gently builds on earlier concepts. Matrix algebra is avoided, and complex topics are explained using simple, easy-to-understand examples. "Need help writing up your results?" Advanced Statistics in Research shows how data-analysis results can be summarized in text, tables, and figures according to APA format. You will see how to present the basics (e.g., means and standard deviations) as well as the advanced (e.g., factor patterns, post-hoc tests, path models, and more). "Advanced Statistics in Research" is appropriate as a textbook for graduate students and upper-level undergraduates (see supplementary materials at StatsInResearch.com). It also serves as a handy shelf reference for investigators and all consumers of research.

Ageism is prevalent in a great deal of current scholarship in the social sciences as scholars fault youth for being delinquent or politically apathetic. Researchers ignore young people's actual voices, despite their leadership in recent global uprisings, some of which unseated entrenched dictators. Neoliberalism must be exposed in its focus on youth sub-cultures and styles rather than economic barriers caused by growing inequality and rising youth unemployment rates. Ageism in Youth Studies

also discusses the debate about "Generation We or Me" and if Millennials are narcissistic. Resources about global youth studies are included, along with the results of the author's surveys and interviews with over 4,000 young people from 88 countries.
