What We Say Matters

In *What We Say, Who We Are*, Parker English explores the commonality between Leopold Senghor's concept of "negritude" and Zora Neale Hurston's view of "Negro expression." For English, these two concepts emphasize that a person's view of herself is above all dictated by the way in which she talks about herself. Focusing on "performism," English discusses the presentational/representational and externalistic/internalistic facets of this concept and how they relate to the ideas of Senghor and Hurston.

In every walk of life, from relationships, to work, to politics, sport and the news, our everyday use of English harbours duplicities of meaning. We say 'I'm sorry' when we mean 'absolute nonsense', and write 'Yours faithfully' when we're thinking 'Sod you!' Jealousy, rage, love, affection we're equally good at disguising them all. *Leaves on the Line* compiles this secret language this 'double English' in a hilarious and forthright volume exposing the doublespeak of the British language. For the first time, everyday terms which we casually deploy to loved ones and total strangers, and have been thrown at us from the radio or TV will be 'glossed' (yes, we really mean 'stripped') to reveal the unadorned, raw truth below. The book will be over 200 hilarious phrases of common doublespeak and will be essential

We Say NO!

Johnnie Moore, vice president and campus pastor of Liberty University, inspires readers with an enthusiastic challenge to live out fully what they say they believe as Christians. In his uniquely confessional tone, Johnnie takes readers on a journey of belief from the hilltop home of the Dalai Lama to a mass grave of more than 250,000 people in Rwanda. He dares to address the doubts and challenges that have turned many well-intentioned Christians into hypocrites. Like a good pastor, Moore helps heal the wounds he opens, and he leaves his reader with one curious question, "What could happen if the world's Christians actually began to live what they say they believe?"

What Shall We Say?

Despite all the hype surrounding the "New Atheism," the United States remains one of the most religious nations on Earth. In fact, 95% of Americans believe in God--a level of agreement rarely seen in American life. The greatest divisions in America are not between atheists and believers, or even between people of different faiths. What divides us, this groundbreaking book shows, is how we conceive of God and the role He plays in our daily lives. America's Four Gods draws on the most wide-ranging, comprehensive, and illuminating survey of American's religious beliefs ever conducted to offer a systematic exploration of how Americans view God. Paul Froese and Christopher Bader argue that many of America's most intractable social and political divisions emerge from religious convictions that are deeply held but rarely openly discussed. Drawing upon original survey data from thousands of Americans and a wealth of in-depth interviews from all parts of the country, Froese and Bader trace America's cultural and political diversity to its ultimate source--differing opinions about God. They show that regardless of our religious tradition (or lack thereof), Americans worship four distinct types of God: The Authoritative God--who is both engaged in the world and judgmental; The

Benevolent God--who loves and helps us in spite of our failings; The Critical God--who catalogs our sins but does not punish them (at least not in this life); and The Distant God--who stands apart from the world He created. The authors show that these four conceptions of God form the basis of our worldviews and are among the most powerful predictors of how we feel about the most contentious issues in American life. Accessible, insightful, and filled with the voices of ordinary Americans discussing their most personal religious beliefs, *America's Four Gods* provides an invaluable portrait of how we view God and therefore how we view virtually everything else.

What Our Last Words Reveal About Life, Death, and the Afterlife A person's end-of-life words often take on an eerie significance, giving tantalizing clues about the ultimate fate of the human soul. Until now, however, no author has systematically studied end-of-life communication by using examples from ordinary people. his conversations and noticed that his personality underwent inexplicable changes. Smartt's father, once a skeptical man with a secular worldview, developed a deeply spiritual outlook in his final days — a change reflected in his language. Baffled and intrigued, Smartt began to investigate what other people have said while nearing death, collecting more than one hundred case studies through interviews and transcripts. In this groundbreaking and insightful book, Smartt shows how the language of the dying can point the way to a transcendent world beyond our own.

England to pledge to "say NO!" to participation in future wars. The response to his call was so overwhelmingly enthusiastic that the next year Sheppard published *We Say NO! The Plain Man's Guide to Pacifism* and founded the Peace Pledge Union, a pacifist organization that's still going strong in Britain today. His book, a best-seller during his lifetime, has become a classic in Christian pacifism. It contains the fundamentals of Sheppard's call for a Christian response to violence that remains loyal to the "constructively revolutionary" spirit of Jesus. Sheppard's commitment to the gospel of nonviolence made him slightly disreputable within the Church of England but earned him a lasting place among twentieth-century champions of pacifism. This new edition of *We Say NO!*, completely annotated and prefaced with an introduction that provides detailed information about Sheppard and the peace movement he launched, aims to present his case for Christian pacifism to a new generation. Must We Mean What We Say?

From “one of the most brilliant young psychologists of her generation” (Paul Bloom), a groundbreaking examination of how speech causes some of our deepest social divides—and how it can help us overcome them. We gravitate toward people like us; it’s human nature. Race, class, and gender shape our social identities, and thus who we perceive as “like us” or “not like us”. But one overlooked factor can be even more powerful: the way we speak. As the pioneering psychologist Katherine Kinzler reveals in *How You Say It*, the way we talk is central to our social identity because our speech largely reflects the voices we heard as children. We can change how we speak to some extent, whether by “code-switching” between dialects or learning a new language; over time, your speech even changes to

reflect your evolving social identity and aspirations. But for the most part, we are forever marked by our native tongue—and are hardwired to prejudge others by theirs, often with serious consequences. Your accent alone can determine the economic opportunity or discrimination you encounter in life, making speech one of the most urgent social-justice issues of our day. Our linguistic differences present challenges, Kinzler shows, but they also can be a force for good. Humans can benefit from being exposed to multiple languages—a paradox that should inspire us to master this ancient source of tribalism, and rethink the role that speech plays in our society.

Words at the Threshold

We all want our students to feel safe, collaborate well with others, feel ownership for their learning, and be joyfully engaged in their work. Nevertheless, many teachers end up using language patterns that undermine these goals. Do any of these scenarios sound familiar? We want students to take responsibility for their learning, yet we use language that implies teacher ownership. We want to build positive relationships with students, yet we use sarcasm when we get frustrated. We want students to think learning is fun, yet we sometimes make comments that suggest the opposite. We want students to exhibit good behavior because it's the right thing to do, yet we rely on threats and bribes, which implies students don't naturally want to be good. What teachers say to students—when they praise or

discipline, give directions or ask questions, and introduce concepts or share stories—affects student learning and behavior. A slight change in intonation can also dramatically change how language feels for students. In *What We Say and How We Say It Matter*, Mike Anderson digs into the nuances of language in the classroom. This book's many examples will help teachers examine their language habits and intentionally improve their classroom practice so their language matches and supports their goals.

Words matter. Every day in schools, language is used—whether in the classroom, in a student-teacher meeting, or by principals, guidance counselors, or other school professionals—implying, intentionally or not, that some subset of students have little potential. As a result, countless students “underachieve,” others become disengaged, and, ultimately, we all lose. Mica Pollock, editor of *Everyday Antiracism*—the progressive teacher’s must-have resource—now turns to what it takes for those working in schools to match their speech to their values, giving all students an equal opportunity to thrive. By juxtaposing common scenarios with useful exercises, concrete actions, and resources, *Schooltalk* describes how the devil is in the oft-dismissed details: the tossed-off remark to a student or parent about the community in which she lives; the way groups—based on race, ability, and income—are discussed in faculty meetings about test scores and data; the

Image-based research methods, such as arts-based research, can fill the absence of the voice of impoverished, under-privileged populations. In *What We See and What We Say*, Ephrat Huss argues that images are deep and universally psycho-neurological constructs through which people process their experiences. The theoretical model demonstrated in this book demonstrates that images can be used to enable three different levels of communication: with self, with others similar to oneself, and with others who differ in terms of culture and power. Dr. Huss centers her argument on a case study of impoverished Bedouin women's groups in Israel who used art as self-expression, and includes many additional examples such as unemployed women and teenage girls in slums, women who

This book has some of the qualities of a detective story and of a drama. As a drama, it resembles a dialogue between the author and his friends and foes. The book has a beginning, middle, and end that do not correspond to the economical, but quite ahistorical character of most scientific writing where the literature is reviewed and problems stated, the evidence presented and a conclusion reached. Instead, the beginning is an account of the author's confrontation with a nagging, persistent, and perhaps ultimately insoluble problem that faces every honest researcher - can we explain behaviour by giving evidence of attitudes? The middle develops new leads and materials but never abandons the central characters of the first act. The end, in Pirandello fashion, leaves us with a feeling of illumination, but illumination of the essential paradoxes and difficulties - not the light that breaks on a heroic solution.

The nation's premier communications expert shares his wisdom on how the words we choose can change the course of business, of politics, and of life in this country. In *Words That Work*, Luntz offers a behind-the-scenes look at how the tactical use of words and phrases affects what we buy, who we vote for, and even what we believe in. With chapters like "The Ten Rules of Successful Communication" and "The 21 Words and Phrases for the 21st Century," he examines how choosing the right words is essential. Nobody is in a better position to explain than Frank Luntz: He has used his knowledge of words to help more than two dozen Fortune 500 companies grow. He'll tell us why Rupert Murdoch's six-billion-dollar decision to buy DirectTV was smart because satellite was more cutting edge than "digital cable," and why pharmaceutical companies transitioned their message from "treatment" to "prevention" and "wellness."
